

NYC Clean Fleet RFI

- On December 15, 2015 DCAS released a Request for Information (RFI) to support the NYC Clean Fleet initiative.
- The response by industry, non-profits, and fleets was tremendous with nearly 100 companies and organizations responding and engaging this initiative.
- By February 16, 2016, the due date for proposals, 76 companies and organizations had provided official RFI responses.
- RFI responses came in from companies promoting alternative fuels, vehicle add-ons, infrastructure development, and waste idle management.
- The City has also already met with or received related presentations from additional companies and organizations to advance the NYC Clean Fleet initiative, including some who met prior to the RFI and some who also provided RFI responses.

Participating organizations, Thank You
