

You are invited to:

## FLUSHING BAY LTCP – ALTERNATIVES MEETING

Wednesday, October 26, 2016 from 6:30 PM to 8:30 PM

**USTA Billie Jean King National Tennis Center**

Chase Center Hospitality Pavilion – Indoor Training Center

Classrooms 1 – 3

Flushing Meadow, Corona Park, Flushing NY 11368

Last fall, the NYC Department of Environmental Protection (DEP) kicked off a Long Term Control Plan (LTCP) for Flushing Bay. The goal of the LTCP is to better understand the water quality impacts of combined sewer overflows\* (CSOs) in Flushing Bay and to propose appropriate solutions.

Since the kickoff meeting DEP has been evaluating potential CSO controls and the related water quality benefits and costs. Join us on October 26th for a presentation and discussion on the various "alternatives" that have been evaluated. We seek your input and feedback before a final proposal is submitted to the New York State Department of Environmental Conservation (DEC).

*\*Sometimes when there are heavy rains and the sewer system is at full capacity, a mixture of rain water and sewage, also known as combined sewer overflows (CSOs) are released into local waterways.*

To learn more about DEP's CSO Program visit [www.nyc.gov/dep/ltcp](http://www.nyc.gov/dep/ltcp).
