Esopus Creek Bridge - Photographs from Archives

Description: Ashokan Reservoir. Camera on substituted highway. Road 1, looking north showing Boiceville Bridge over the Ulster & Delaware Railroad and Esopus Bridge over the Esopus Creek, constructed for substituted highway, Road 1, at the most northerly end of the west basin. Substituted highway, Road 2, leading along the northerly shore of the west basin can be seen in the background. Esopus Creek, just above the most northerly flow line of the Ashokan Reservoir can be seen, and the Ulster & Delaware Railroad Bridge. Just at the right of this bridge is where the relocated line joins the original line of the Ulster & Delaware Railroad.
