

*A Watershed Moment: Celebrating the Homecoming of the Relief Map of the New York City Water Supply System, Queens Museum of Art, New York, 2008, (installation view)*

## Professional Development Opportunity

Have you seen the recently restored model of NYC's Water Supply System?

The Queens Museum of Art and the NYC Department of Environmental Protection invite you to an Open House and Workshop where you will learn how teaching from the 700 square foot watershed model and the Panorama of NYC can integrate water lessons into science, math, social studies, and art education.

Thursday, October 30, 2008

4:30 - 6:30pm

Refreshments will be served.

The model is part of the permanent exhibition, *A Watershed Moment: Celebrating the Homecoming of the Relief Map of the New York City Water Supply System*, a collaborative project between the Queens Museum of Art and the NYC Department of Environmental Protection.

Please feel free to forward this invitation to anyone who may be interested.
