

## INITIAL INFORMATION FROM THE WORLD TRADE CENTER HEALTH REGISTRY— DATA THROUGH SEPTEMBER 30, 2003

This report is the first in a series that will contain summary characteristics of people who have enrolled—i.e., completed the telephone health survey—in the World Trade Center (WTC) Health Registry. It presents basic demographic information on the 6,313 people who were interviewed for the WTC Health Registry between its launch on September 5, 2003 and September 30, 2003. Enrollees are categorized into four exposure groups:

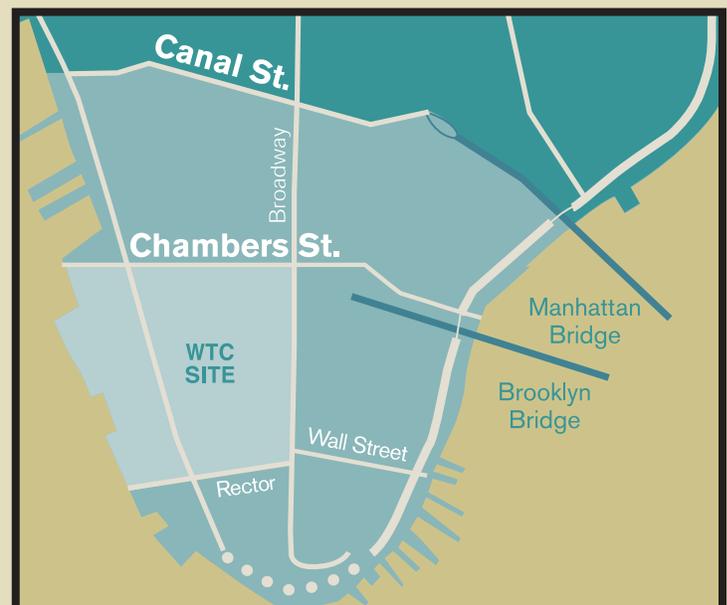

- People who were in a building, on the street, or on the subway south of Chambers Street on September 11, 2001.
- Workers and volunteers involved in rescue, recovery, clean up or other activities at the WTC site and/or WTC Recovery Operations on Staten Island any time between September 11, 2001 and June 30, 2002.
- School children and staff at schools (pre K-12) or day care centers south of Canal Street on September 11, 2001.
- People who were living south of Canal Street on September 11, 2001.

Future reports will contain data for three-month periods, along with statistics on health and mental health data, as these data are completed.

Through September 30, 2003, a total of 12,902 people signed up to be interviewed—i.e., pre-enrolled—in the WTC Health Registry, either by entering their contact information online at [www.wtcregistry.org](http://www.wtcregistry.org), or by calling 1-866-NYC-WTCR (1-866-692-9827),

or 311, New York City's toll-free information line. Of the people who pre-enrolled for the WTC Health Registry, 6,313 had been interviewed by September 30, 2003.

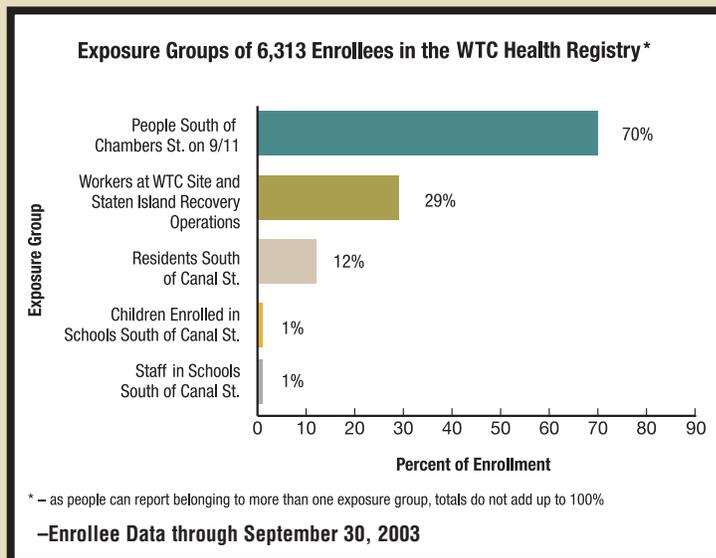

WTC Health Registry staff are in the process of contacting all individuals who either signed-up online or over the phone. Additionally, as of September 30, 2003, WTC Health Registry staff have obtained the contact information for 27,140 individuals who may be eligible to enroll. In the coming weeks and months, interviewers will contact each of these individuals to discuss the registry with them.

The following figures present information about exposure groups, residence, age, and the gender of the 6,313 enrollees in the WTC Health Registry through September 30, 2003.

## EXPOSURE GROUP
