ZONING MAP

THE NEW YORK CITY PLANNING COMMISSION

Major Zoning Classifications:
 The number(s) and/or letter(s) that follows an R, C or M District designation indicates use, bulk and other controls as described in the text of the Zoning Resolution.

- R – RESIDENTIAL DISTRICT
- C – COMMERCIAL DISTRICT
- M – MANUFACTURING DISTRICT

SPECIAL PURPOSE DISTRICT
 The letter(s) within the shaded area designates the special purpose district as described in the text of the Zoning Resolution.

AREA(S) REZONED

Effective Date(s) of Rezoning:
 10-11-2012 C 120226 ZMM

Special Requirements:
 For a list of lots subject to CEQR environmental requirements, see APPENDIX C.
 For a list of lots subject to "D" restrictive declarations, see APPENDIX D.
 For Inclusionary Housing designated areas on this map, see APPENDIX F.

No. 34 is an unusually distinguished structure to have been erected on such a short side street as this. The effectiveness of this 1868 five-story facade, only three bays wide, is explained by the fact that it was designed by the renowned architect James Renwick and his associate Joseph Sands. Although nothing but the cast-iron pilasters remain on what was the ground floor entrance, the building still catches one's eye by its effective use of neo-Grec detailing on both its cast-iron second-floor facade and the marble facade of the remaining three floors.

The use of a two-story cast-iron storefront such as the one on this building is unusual, especially considering its early date. (Badger only listed two two-story storefronts in New York in his 1865 catalog, neither of which were in the Historic District.) This cast-iron second floor seems even odder when it is considered that the detailing of the marble facade above is nearly as elaborate as the cast-iron section. In most instances cast iron was used for an inexpensive imitation of intricate stonework.

The three bays on the second floor of the iron front are separated by smooth pilasters that rise from the ground level. The bay heads are flat on top with rounded corners and two round-arched windows are set within each bay. Above each of these window groups is a rosette and a stylized two-dimensional frieze imitating a balustrade.

For its upper three floors the windows have segmental-arched tops and ornamental keystones. They are bordered by variations of a bead-and-reel molding and flanked by pilasters incised with various neo-Grec designs. On the fifth floor the pilaster capitals incorporate acroteria or "ears", a characteristic neo-Grec motif. Above these capitals rise small paired brackets that support a relatively simple cornice.
