LIST OF ACRONYMS

Acronym	Definition
ASML	Above Mean Sea Level
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes
CAMP	Community Air Monitoring Plan
EC	Engineering Control
ESA	Environmental Site Assessment
GQS	Groundwater Quality Standard
HASP	Health and Safety Plan
HDPE	High-Density Polyethylene
IC	Institutional Control
MS/MSD	Matrix Spike / Matrix Spike Duplicate
NYC VCP	New York City Voluntary Cleanup Program
NYC DOB	New York City Department of Buildings
NYC OER	New York City Office of Environmental Remediation
NYSDEC	New York State Department of Environmental Conservation
PCB	Polychlorinated Biphenyl
PCE	Perchloroethylene
PE	Professional Engineer
PID	Photoionization Detector
PWGC	P.W. Grosser Consulting Inc.
QA/QC	Quality Assurance/Quality Control
RAR	Remedial Action Report
RAWP	Remedial Action Work Plan
RIR	Remedial Investigation Report
SCG	Standards, Criteria and Guidance
SCO	Soil Cleanup Objective
SMMP	Soil/Materials Management Plan

SVOCs	Semi-Volatile Organic Compounds
TAL	Target Analyte List
TCE	Trichloroethylene
USEPA	United States Environmental Protection Agency
UST	Underground Storage Tank
VOCs	Volatile Organic Compounds

CERTIFICATION

I, Paul K. Boyce, PE, am currently a registered professional engineer licensed by the State of New York. I had primary direct responsibility for implementation of the remedial program for the 105 Metropolitan Ave, LLC Site Number 11CBCP013K.

I certify that the New York City Office of Environmental Remediation (NYC OER)-approved Remedial Action Work Plan (RAWP) dated June 2011 and Stipulations in a letter dated July 18, 2011; were implemented and that all requirements in those documents have been substantively complied with. I certify that contaminated soil, fill, liquids or other material from the property were taken to facilities licensed to accept this material in full compliance with applicable laws and regulations.

EXECUTIVE SUMMARY

Site Location and Prior Usage

The Site is located at 105 Metropolitan Avenue in the Williamsburg section of Brooklyn, New York and is identified as Block 2358 and Lot 36 on the New York City Tax Map. **Figure 1** shows the Site location. The Site is 2,112-square feet and is bounded by a commercial/office building to the north, Metropolitan Avenue to the south, a mixed use building to the east, and an industrial building to the west. A map of the site boundary is shown in **Figure 2**. Prior to remedial action, the Site was vacant with no buildings or structures.

Summary of Redevelopment Plan

The proposed future use of the Site is industrial and will consist of a machine shop and office space. Layout of the proposed site development is presented in **Figures 3** and **4**. The current zoning designation is M1-2/R6A Mixed Use. The proposed use is consistent with existing zoning for the property.

The proposed redevelopment includes the construction of a two-story industrial building with a basement. The building will total 6,347 square feet in size and will be utilized as a machine shop and office space. The basement level and ground floors will be utilized as a machine shop, while the second floor of the proposed building will be utilized as office space. Excavation to a depth of approximately 12 feet below sidewalk grade was required for foundation construction.

Summary of Past Uses of Site and Environmental Findings

Based on information contained in the Phase I Environmental Site Assessment (ESA), the subject site was historically utilized as a residence. Sanborn Fire Insurance maps show a 2-story dwelling from 1887 to at least 1983. The building was demolished and the site remained vacant from at least 1986 to present.

The Remedial Investigation Report (RIR), dated June 2011, included the

completion of a magnetometer survey to determine the absence/presence and location of underground storage tanks and the installation of three soils borings. To evaluate soils and groundwater quality six soil samples and two groundwater samples were collected for chemical analysis. To supplement the data collected as part of this investigation, a soil vapor sample and additional soil samples were collected.

The findings of the remedial investigation were:

1. Elevation of the property ranges from 23 to 24 feet above mean sea level (AMSL) and site grade is approximately four feet below sidewalk grade.
2. Depth to groundwater ranges from 20 to 25 feet below ground surface (BGS) at the Site.
3. Groundwater flow is generally from east to west beneath the Site.
4. Depth to bedrock is approximately 150 feet BGS at the Site.
5. The stratigraphy of the site, from the surface down, consists of 150 feet of glacial till underlain by bedrock.
6. Soil chemistry findings are unremarkable and do not indicate a source of contamination on this property. No polychlorinated biphenyls (PCBs) were detected in soil. No semi-volatile organic compounds (SVOCs) were reported above Unrestricted Use Soil Cleanup Objectives (SCOs) specified in New York State Department of Environmental Conservation (NYSDEC) Part 375 (Track 1 SCOs). Soil/fill samples collected during the remedial investigation showed only one volatile organic compound (VOC) marginally above Track 1, but at a level orders of magnitude less than the corresponding Track 2 industrial SCO. Similarly, two pesticides were observed above Track 1 SCOs but were several orders of magnitude below Track 2 Industrial SCOs. Four metals were observed at concentrations greater than Track 1 SCOs. Only one (arsenic) was identified marginally greater than Track 2 industrial SCOs. Deeper soils contained concentrations that were less than concentrations observed in shallow soils. The findings for soil analysis are consistent with observations of several feet of historical fill in the surface horizon of the property.

7. No groundwater impacts were observed on this property. Groundwater samples collected during the remedial investigation showed no VOCs (except one analyte also found in a lab blank), SVOCs, pesticides or PCBs at concentrations exceeding 703.5 Class GA Groundwater Quality Standards (GQS). Several metals were detected at concentrations greater than the GQS in dissolved samples; however, these metals are naturally occurring (iron, magnesium, manganese and sodium) and were likely due to suspended materials in the samples and/or saline intrusion. These results support the overall findings of the remedial investigation that there is no onsite contaminant source area.
8. The soil vapor sample collected as part of the remedial investigation detected benzene, toluene, ethylbenzene, and xylenes (BTEX) and its derivatives at generally low concentrations. Only one VOC (1,3 butadiene) was detected at concentrations slightly exceeding the United States Environmental Protection Agency (USEPA) Target Shallow Soil Gas Concentrations. Perchloroethylene (PCE) and trichloroethylene (TCE) were not detected. The soil vapor findings suggest influence of automotive fuel impacts. Past usage of the property and results of soil and groundwater indicate that these impacts are from an offsite source and are not associated with the site.

Summary of the Remedial Action

The Remedial Action was performed pursuant to the NYC OER-approved RAWP in a manner that has rendered the property protective of public health and the environment consistent with its intended use. A Pre-Application Meeting was held on May 11, 2011. A remedial investigation was performed on June, 2007/ June, 2011 and a RIR dated June, 2011 was prepared to evaluate data and information necessary to develop a RAWP. A Site Contact List was established and a RAWP dated July, 2011 was prepared and released with a Fact Sheet on June 26, 2011 for a 30-day public comment period. The RAWP and Stipulation List dated July 18, 2011 was approved by the NYC OER on July 29, 2011. A Pre-Construction Meeting was held on February 23, 2012. A

Fact Sheet providing notice of the start of the remedial action was issued on February 28, 2012 and the remedial action was begun in March, 2012 and completed in August, 2013.

The following remedial actions were completed in this program:

1. Prepared a Community Protection Statement and implemented a Citizen Participation Plan.
2. Performed a Community Air Monitoring Program for particulates and volatile organic carbon compounds.
3. Established Track 1 SCOs. Excavated and removed soil/fill exceeding SCOs. Soil/fill was excavated to a depth of 12 feet below grade beneath the entire property and 17 feet below grade beneath the elevator pits. A total of 1,577.38 tons of contaminated non-hazardous soil/fill was excavated and removed from the property and was disposed at Clean Earth of Carteret, New Jersey.
4. Collection and analysis of end-point samples to determine the performance of the remedy with respect to attainment of SCOs. End point samples show that Track 1 SCOs were achieved on this project.
5. As part of development, installed a Vapor Barrier System that consisted of the placement of Grace Ice and Water Shield 40-mil high-density polyethylene (HDPE) on the foundation sidewalls, Florprufe 120 20-mil beneath the footprint of the building, and liquid bituthene on the north and west sidewalls and the base of the passenger elevator pit. The contractor for construction of the Vapor Barrier System was Boss Associates.
6. Transported and disposed of all soil/fill material at permitted facilities in accordance with applicable laws and regulations for handling, transport, and disposal, and this plan. Sampled and analyzed excavated media as required by disposal facilities. Appropriately segregated excavated media onsite.
7. Screened excavated soil/fill during intrusive work for indications of contamination by visual means, odor, and monitoring with a photoionization detector (PID).
8. Mobilized site security, equipment, utility mark outs, and marking and staking excavation areas.

9. Implemented storm-water pollution prevention measures in compliance with applicable laws and regulations.
10. Performed all activities required for the Remedial Action, including permitting requirements and pretreatment requirements, in compliance with applicable laws and regulations.
11. Submitted a Remedial Action Report (RAR) that describes the Remedial Action, certifies that the remedial requirements have been achieved, defines the Site boundaries, and lists any changes from the RAWP.
12. Submitted a Sustainability Report.

REMEDIAL ACTION REPORT

1.0 SITE BACKGROUND

105 Metropolitan Ave, LLC has enrolled in the New York City Voluntary Cleanup Program (NYC VCP) to investigate and remediate a property located at 105 Metropolitan Avenue in Williamsburg section of Brooklyn, New York. The boundary of the property subject to this Remedial Action is shown in **Figure 1** and include, in their entirety, Brooklyn Block 2358 and Lot(s) 36.

1.1 SITE LOCATION AND PRIOR USAGE

The Site is located at 105 Metropolitan Avenue in the Williamsburg section of Brooklyn, New York and is identified as Block 2358 and Lot 36 on the New York City Tax Map. **Figure 1** shows the Site location. The Site is 2,112-square feet and is bounded by a commercial/office building to the north, Metropolitan Avenue to the south, a mixed use building to the east, and an industrial building to the west. A map of the site boundary is shown in **Figure 2**. Prior to the remedial action, the Site was vacant with no buildings or structures.

1.2 REDEVELOPMENT PLAN

The proposed future use of the Site is industrial and will consist of a machine shop and office space. Layout of the proposed site development is presented in **Figures 3** and **4**. The current zoning designation is M1-2/R6A Mixed Use. The proposed use is consistent with existing zoning for the property.

The proposed redevelopment includes the construction of a two-story industrial building with a basement. The building will total 6,347 square feet in size and will be utilized as a machine shop and office space. The basement level and ground floors will be utilized as a machine shop, while the second floor of the proposed building will be utilized as office space. Excavation to a depth of approximately 12 feet below sidewalk grade will be required for foundation construction. The building footprint (and basement area) will occupy the entire property.

1.3 DESCRIPTION OF SURROUNDING PROPERTY

Industrial, commercial and residential properties surround the subject site. Based on information obtained from the NYC OER SPEED Database, no sensitive receptors, such as hospitals, schools, or daycare facilities exist within a 500 foot radius of the site.

Figure 2 shows the surrounding land usage.

1.4 REMEDIAL INVESTIGATION

A remedial investigation was performed and the results are documented in a companion document called “*Remedial Investigation Report, 105 Metropolitan Avenue*”, prepared by P.W. Grosser Consulting, Inc. (PWGC) and dated June 2011.

Summary of Past Uses of Site and Areas of Concern

Based on information contained in the Phase I ESA, the subject site was historically utilized as a residence. Sanborn Fire Insurance maps show a 2-story dwelling from 1887 to at least 1983. The building was demolished and the site remained vacant from at least 1986 to present.

Summary of the Work Performed under the Remedial Investigation

The remedial investigation included the completion of a magnetometer survey to determine the absence/presence and location of underground storage tanks and the installation of three soils borings. To evaluate soils and groundwater quality, six soil samples and two groundwater samples were collected for chemical analysis. To supplement the data collected as part of this investigation, a soil vapor sample and additional soil samples were collected.

Summary of Environmental Findings

1. Elevation of the property ranges from 23 to 24 feet AMSL and site grade is approximately four feet below sidewalk grade.
2. Depth to groundwater ranges from 20 to 25 feet BGS at the Site.

3. Groundwater flow is generally from east to west beneath the Site.
4. Depth to bedrock is approximately 150 feet BGS at the Site.
5. The stratigraphy of the site, from the surface down, consists of 150 feet of glacial till underlain by bedrock.
6. Soil chemistry findings are unremarkable and do not indicate a source of contamination on this property. No PCBs were detected in soil. No SVOCs were reported above Unrestricted Use SCOs specified in NYSDEC Part 375 (Track 1 SCOs). Soil/fill samples collected during the remedial investigation showed only one VOC marginally above Track 1, but at a level orders of magnitude less than the corresponding Track 2 industrial SCO. Similarly, two pesticides were observed above Track 1 SCOs but were several orders of magnitude below Track 2 Industrial SCOs. Four metals were observed at concentrations greater than Track 1 SCOs. Only one (arsenic) was identified marginally greater than Track 2 industrial SCOs. Deeper soils contained concentrations that were less than concentrations observed in shallow soils. The findings for soil analysis are consistent with observations of several feet of historical fill in the surface horizon of the property.
7. No groundwater impacts were observed on this property. Groundwater samples collected during the remedial investigation showed no VOCs (except one analyte also found in a lab blank), SVOCs, pesticides or PCBs at concentrations exceeding the NYSDEC AWQS. Several metals were detected at concentrations greater than the NYSDEC AWQS in dissolved samples; however, these metals are naturally occurring (iron, magnesium, manganese and sodium) and were likely due to suspended materials in the samples. These results support the overall findings of the remedial investigation that there is no onsite contaminant source area.
8. The soil vapor sample collected as part of the remedial investigation detected BTEX and their derivatives at generally low concentrations. Only one VOC (1,3 butadiene) was detected at concentrations slightly exceeding the USEPA Target

Shallow Soil Gas Concentrations. PCE and TCE were not detected. The soil vapor findings suggest influence of automotive fuel impacts. Past usage of the property and results of soil and groundwater indicate that these impacts are from an offsite source and are not associated with the site.

For more detailed results, consult the RIR. Based on an evaluation of the data and information from the RIR and the RAWP, disposal of significant amounts of hazardous waste were not suspected at this site.

2.0 DESCRIPTION OF REMEDIAL ACTIONS

The Remedial Action was performed pursuant to the NYC OER-approved RAWP in a manner that has rendered the property protective of public health and the environment consistent with its intended use. This RAR describes the remedial action performed under the RAWP. The remedial action described in this document provides for the protection of public health and the environment, complies with applicable environmental standards, criteria and guidance (SCG) and applicable laws and regulations.

The remedial action was evaluated in an alternatives analysis and was determined to be protective of human health and the environment, compliant with SCGs, effective in the short-term, effective in the long-term, capable of attaining appropriate levels of reduction of toxicity, mobility, or volume of contaminated material, implementable, cost effective, acceptable to the community, consistent with land uses, and sustainable.

A general summary of the Remedial Action is as follows:

- A Pre-Application Meeting was held (May 11, 2011).
- A remedial investigation was performed and a RIR was prepared (June, 2011).
- A RAWP was prepared (July, 2011).
- An Application Fact Sheet was released announcing a 30-day public comment period on the RAWP (June 26, 2011).
- The RAWP and Stipulation List dated (July 18, 2011) was approved by the NYC OER (July 29, 2011).
- A Pre-Construction Meeting was held (February 23, 2012).
- A Fact Sheet providing notice of the start of the Remedial Action was issued (February 28, 2012).
- Remedial Action was begun in March, 2012 and completed in August, 2013.

The following Remedial Actions were completed in this program:

1. Prepared a Community Protection Statement and implemented a Citizen Participation Plan.
2. Performed a Community Air Monitoring Program for particulates and volatile organic carbon compounds.
3. Established Track 1 SCOs. Excavated and removed soil/fill exceeding SCOs. Soil/fill was excavated to a depth of 12 feet below grade beneath the entire property and 17 feet below grade beneath the elevator pits. A total of 1,577.38 tons of contaminated non-hazardous soil/fill was excavated and removed from the property and was disposed at Clean Earth of Carteret, New Jersey.
4. Collection and analysis of end-point samples to determine the performance of the remedy with respect to attainment of SCOs. End point samples show that Track 1 SCOs were achieved on this project.
5. As part of development, installed a Vapor Barrier System that consisted of the placement of Grace Ice and Water Shield 40-mil high-density polyethylene (HDPE) on the foundation sidewalls, Florprufe 120 20-mil beneath the footprint of the building, and liquid bituthene on the north and west sidewalls and the base of the passenger elevator pit. The contractor for construction of the Vapor Barrier System was Boss Associates.
6. Transported and disposed of all soil/fill material at permitted facilities in accordance with applicable laws and regulations for handling, transport, and disposal, and this plan. Sampled and analyzed excavated media as required by disposal facilities. Appropriately segregated excavated media onsite.
7. Screened excavated soil/fill during intrusive work for indications of contamination by visual means, odor, and monitoring with a PID.
8. Mobilized site security, equipment, utility mark outs, and marking and staking excavation areas.
9. Implemented storm-water pollution prevention measures in compliance with applicable laws and regulations.

10. Performed all activities required for the Remedial Action, including permitting requirements and pretreatment requirements, in compliance with applicable laws and regulations.
11. Submitted a RAR that describes the Remedial Action, certifies that the remedial requirements have been achieved, defines the Site boundaries, and lists any changes from the RAWP.
12. Submitted a Sustainability Report.

3.0 COMPLIANCE WITH REMEDIAL ACTION PLAN

3.1 HEALTH & SAFETY PLAN

The remedial construction activities performed under this program were in compliance with the Health and Safety Plan (HASP) and applicable laws and regulations. The Site Safety Coordinator was Ryan Morley of PWGC.

3.2 COMMUNITY AIR MONITORING PLAN

The Community Air Monitoring Plan (CAMP) provided for the collection and analysis of air samples during remedial construction activities to ensure proper protections were employed to protect workers and the neighboring community. Monitoring was performed in compliance with the CAMP in the approved RAWP. The results of Community Air monitoring are shown in **Appendix 3**.

3.3 SOIL MATERIALS MANAGEMENT PLAN

The Soil/Materials Management Plan (SMMP) provided detailed plans for managing all soil/materials that were disturbed at the Site, including excavation, handling, storage, transport and disposal. It also included a series of controls to assure effective, nuisance free remedial activity in compliance with applicable laws and regulations. Remedial construction activities performed under this program were in compliance with the SMMP in the approved RAWP.

3.4 STORM WATER POLLUTION PREVENTION

Storm water pollution prevention included physical methods and processes to control and/or divert surface water flows and to limit the potential for erosion and migration of Site soils, via wind or water. Remedial construction activities performed under this program were in full compliance with methods and processes defined in the RAWP for storm water prevention and applicable laws and regulations.

3.5 DEVIATIONS FROM THE REMEDIAL ACTION WORK PLAN

Deviations from the RAWP, dated June 2011, and the RAWP Stipulation List, dated July 18, 2011, include the following items:

Modified Oversight During Underpinning and Footing Installation

The original requirement in the NYC OER-approved RAWP was for the screening of excavated soil/fill during intrusive work for indications of contamination by visual means, odor, and monitoring with a PID. PWGC was onsite to screen the excavation of previously undisturbed soil/fill excavated for the underpinning and footing installation activities. Once PWGC was satisfied that there were no indications of contamination by visual or olfactory means or by monitoring with a PID, PWGC left the site and movement of the excavated soil previously screened was placed back into the excavation. A designated representative of the general contractor was trained by PWGC in inspecting the soil for indications of contamination and in how to mitigate dust issues. The designated representative was also instructed to contact the Site Safety Officer if any new soils were to be disturbed, if there were any indications of contamination in the soil, or if any objects, such as underground tanks, drums, or cesspools, were identified. The letter detailing the deviation from the RAWP is included as **Appendix A**.

This deviation, as taken, is protective of public health and the environment.

Endpoint Sample Collection

The collection of endpoint samples was not included in the scope of the approved RAWP. The analytical results of the remedial investigation revealed that the soil left beneath the proposed depth of the basement met Track 1 requirements; therefore, the collection of endpoint samples was deemed unnecessary.

During the February 23, 2012 pre-construction meeting between the NYC OER, the contractors, the developers, and PWGC, the NYC OER stated that they will require the collection of two endpoint samples at the bottom of the excavation. Due to an elevated PID response in soils located in the southwest section of the site, the NYC OER requested on June 29, 2012 that endpoint samples be analyzed for VOCs in addition to

metals. The endpoint sampling methodology and results are further detailed in Section 4.3.

This deviation, as taken, is protective of public health and the environment.

Vapor Barrier Installation

The RAWP identified Bituthene 4000 as the approved vapor barrier to be installed along the below grade foundation walls. The site foundation contractor requested that Grace Ice and Water Shield membrane be approved as an equivalent vapor barrier. A PWGC professional engineer (PE) approved the Grace Ice and Water Shield as an equivalent replacement. The NYC OER concurred with the deviation on April 16, 2012. The approved vapor barrier to be installed beneath the building slab, Florprufe 120, was not altered.

As the Grace Ice and Water Shield membrane is an equivalent alternative to the Bituthene 4000 membrane, this deviation, as taken, is protective of public health and the environment.

A RAWP addendum was prepared on December 4, 2012 to address the vapor barrier installation in the passenger elevator pit. The RAWP addendum has been included in **Appendix A**. The passenger elevator pit was installed without the required Florprufe 120 vapor barrier. To remedy this, a sealant was applied to the concrete base of the pit and the interior concrete walls up to a height that overlaps with the liquid bituthene membrane installed along the north and west walls. The east and west walls are the foundation walls that were previously protected with the Grace Ice and Water Shield membrane. The sealant that was proposed for use in the December 4, 2012 RAWP addendum was Stamp Seal ST OTC. The actual sealant that was used was Liquid Bituthene. As the Liquid Bituthene sealant is an acceptable alternative to the Stamp Seal ST OTC sealant and is compatible with the Florprufe 120 vapor barrier, this deviation, as taken, is protective of public health and the environment.

4.0 REMEDIAL PROGRAM

4.1 PROJECT ORGANIZATION

Principal personnel who participated in the remedial action include Paul W. Grosser, PhD., PE and Andrew Lockwood. The PE for this project is Paul K. Boyce, PE.

The PE certified all remedial information listed in this Final RAR. Certification is attached at the beginning of this report.

4.2 SITE CONTROLS

Site Preparation

A pre-construction meeting was held with NYC OER, PWGC, the site owner, and the general contractor on February 23, 2012. A NYC OER Project Notice was erected at the project entrance and remained in place during all phases of the Remedial Action.

On February 28, 2012, new fencing and a gate were installed and debris was cleared in preparation of construction activities. Equipment was mobilized to the site on March 1, 2012 and excavation activities began on March 5, 2012. The New York City Department of Buildings (NYC DOB) permit for earthwork was renewed on March 27, 2012. A NYC OER Project Notice was erected at the project entrance and in place during all phases of the Remedial Action.

Prior to the commencement of any remedial work, all field personnel were required to attend an orientation meeting, in which the general site operations were outlined, along with health and safety and field procedures.

Soil Screening

Soils throughout the site consisted mainly of light brown, fine to medium grained sands and were screened with a PID during earth disturbing activities. With the exception of a small area located near the southwest corner of the site, there was no visual or olfactory evidence of contaminated soil or elevated PID readings observed during earth disturbing activities. On March 16, 2012, while excavating to install underpinning along the southern property boundary in the western section of the site, a

petroleum odor and elevated PID readings were observed (maximum reading of 260 ppm, isobutylene equivalent); there was no visual indication of contamination. Perimeter screening of the breathing zone during this time did not result in elevated PID readings or odors.

To prevent the possibility of off-site migration of odors, the soil was covered with two layers of polyethylene sheeting pending off-site disposal.

Stockpile Management

Small, temporary stockpiles were generated during the underpinning process. Once the form work was completed for the underpinning, the soils were placed back into the excavation. Soils were not stockpiled overnight.

Truck Inspection

Soils were loaded directly into tri-axle dump trucks for off-site disposal. Once the truck was filled, a cover was put over the load to secure it and the tires were brushed to remove soil from the treads. Residual soils tracked into the sidewalk and street were promptly swept up and brought back on-site.

Site Security

The site contained a large plywood fence, painted blue, with a gate at the entrance. The gate was secured with a chain and lock during non-working hours.

Nuisance Controls

There were no nuisance complaints involving odor or dust issues filed during earth disturbing activities. Dust concentrations were measured with a PDR-1000 Dust Monitor and a MiniRAE 2000 was used to detect VOCs. At the perimeter of the site, elevated dust and PID readings were not observed.

A small area of soil located near the southwest corner of the site did result in elevated PID readings and had a petroleum odor. To prevent migration of odors off-site, the soil was covered with double layers of polyethylene sheeting pending off-site disposal.

Reporting

Daily reports of site activities were prepared on days when remedial activities were performed. Daily reports consisted of the date the work took place, the weather, the name of the site safety officer overseeing the RAWP implementation, a summary of the work performed and where on the site it was performed, if there were any problems encountered, if samples were collected, results of the perimeter air monitoring, the amount of soil loaded for off-site disposal, and a photolog of the day's activities.

Daily reports are included as **Appendix A**.

Digital photographs of the remedial action are included in **Appendix B**.

4.3 MATERIALS EXCAVATION AND REMOVAL

Soils were excavated and achieved Track 1 SCO criteria, as displayed on **Tables 1 and 2**. Soils were excavated to a depth of 12 feet bgs across the entire site. The elevator pits, located in the southwest and northern sections of the site, were excavated to a depth of 17 feet bgs. A total of 1,577.38 tons of soil were removed and disposed of at a properly permitted facility (see Section 4.4); excavated materials were not re-used on the site.

Groundwater, underground structures, and underground storage tanks (USTs) were not encountered during excavation activities.

A map showing the location where excavations were performed is shown in **Figure 5**.

END POINT SAMPLE RESULTS

Once final excavation depths were reached, two soil endpoint samples were collected. The locations of the soil samples were chosen to represent the overall soil quality across the site. A stainless steel hand auger was utilized to retrieve soil samples from approximately 6 to 12 inches below the final grade to ensure that samples collected were representative of the actual soil quality and were not influenced by construction equipment driving over the soil. At each location, soil was placed into a stainless steel

bowl and mixed to ensure the sample was homogeneous. Soils were placed in laboratory supplied glassware and packed in a cooler, on ice, under proper chain of custody procedures. Non-disposable sampling equipment was cleaned using distilled water and Alconox detergent with a distilled water rinse prior to the collection of each sample. The following sample analyses were performed based upon SCO exceedances identified during the remedial investigation and at the request of the NYC OER:

- VOCs by USEPA method 8260.
- Target Analyte List (TAL) metals by USEPA method 6010,

In addition to the two endpoint samples, a field blank sample, a blind duplicate sample, a matrix spike / matrix spike duplicate (MS/MSD) sample, and a trip blank sample were collected for quality assurance / quality control (QA/QC) purposes and sampled for the above analyses.

Analytical results for several metals were slightly above Track 1 SCOs in the two endpoint samples and metals concentrations were detected in the field blank; therefore, the two locations were re-sampled for metals and an additional field blank, blind duplicate, and MS/MSD sample were collected and analyzed for metals.

A tabular and map summary of end-point sampling results is included in **Tables 3** and **4** and **Figure 6**, respectively. QA/QC sample data is included in **Tables 3** through **6**. Based upon the analytical results on the second set of endpoint samples, Track 1 SCOs have been achieved for the site. Laboratory data sheets are included in **Appendix C**.

Data usability was established for all data generated in this remedial performance evaluation program. Based on the review of the results reported by the laboratory, the overall Quality Control data provided in the laboratory reports and the case narrative; the data are representative of adequate method accuracy and precision with regard to the project objectives.

4.4 MATERIALS DISPOSAL

The tonnage and destination of material removed and disposed of off-Site is presented below:

Inline Table 1

Destination	Type of Material	Quantity
Clean Earth of Carteret, Inc	Non-Hazardous Soil	1,577.38 tons

Letters from 105 Metropolitan Ave, LLC to disposal facility providing materials type, source, and data, and acceptance letters from disposal facility stating it is approved to accept above materials are attached in **Appendix D**. Manifests are included in **Appendix E**. **Inline Table 1** above shows the total quantities of each class of material removed from the Site and the disposal location.

Soil disposal occurred on May 18, May 21, July 26, August 1, August 9, and August 10, 2012.

4.5 BACKFILL IMPORT

No backfill material was imported to the site.

4.6 DEMARCATION

A demarcation barrier was not required as Track 1 SCOs were met.

5.0 ENGINEERING CONTROLS

A Track 1 Remedial Action was achieved and Engineering Controls (ECs) are not required. However, as part of construction, several protective systems were installed.

These are:

- (1) A Composite Cover System consisting of concrete covered sidewalks and concrete building slabs;
- (2) Vapor Barrier System;

Composite Cover System

The Composite Cover System is comprised of a 6 inch thick concrete slab underlain by a clean sub grade material which encompasses the entire site. The contractor for construction of the Composite Cover System was Boss Associates. **Figure 7** shows the location of each cover type built at the Site. Photographs of construction of the Composite Cover System are included in **Appendix B**.

Vapor Barrier System

A Grace Ice and Water Shield vapor barrier was installed along the below grade foundation walls and a Florprufe 120 vapor barrier was installed beneath the building slab. The passenger elevator pit was protected with Liquid Bituthene sealant. The vapor barriers prevent potential future vapor migration into the planned building structure. Manufacturer's specifications for the membranes, including permeability and chemical resistance information, are provided in **Appendix F**. The vapor barrier covers the entire footprint of the building and covers the foundation walls below grade. The Grace Ice and Water Shield is self-adhesive; the seams are overlapped to create a seal. The seams of the Florprufe 120 vapor barrier were sealed with fabrication tape supplied by the manufacturer. Liquid bituthene was applied to the concrete slab in the bottom of the passenger elevator pit and along the north and west walls of the elevator pit; the east and south walls are protected by the Grace Ice and Water Shield vapor barrier. Pipe and other penetrations through the membrane were sealed with fabrication tape, liquid bituthene, or other manufacturer approved methods. The installation of the membrane was inspected

by a PWGC inspector to make sure that the liner was installed in accordance with the manufacturer's specifications. Following PWGC approval of the membrane installation, concrete was poured.

6.0 INSTITUTIONAL CONTROLS

A Track 1 Remedial Action was achieved in the Remedial Action and Institutional Controls (ICs) are not required.

7.0 SITE MANAGEMENT PLAN

A Track 1 Remedial Action was achieved and Site Management is not required.

APPENDIX 1

SUSTAINABILITY REPORT

This RAWP provides for sustainable remediation and redevelopment through a variety of means that are defined in this Sustainability Report.

Recontamination Control. Recontamination after cleanup and redevelopment is completed undermines the value of work performed, may result in a property that is less protective of public health or the environment, and may necessitate additional cleanup work later that could impede future redevelopment. Recontamination can arise from future releases that occur within the property or by influx of existing contamination from off-Site.

The method used to provide recontamination controls includes the installation of Grace Ice and Water Shield, Florprufe 120, and Liquid Bituthene vapor barriers. The area of the Site that utilizes recontamination controls under this plan is 100 %, or 2,112 square feet of land.

Paperless Brownfield Cleanup Program. 105 Metropolitan Ave, LLC participated in NYC OER's Paperless Brownfield Cleanup Program. Under this program, submission of electronic documents replaced submission of hard copies for the review of project documents, communications and milestone reports. A best estimate of the mass (pounds) of paper saved under this plan is 40 pounds.

Low-Energy Project Management Program. 105 Metropolitan Ave, LLC participated in NYC OER's low-energy project management program. Under this program, whenever possible, meetings were held using remote communication technologies, such as videoconferencing and teleconferencing to reduce energy consumption and traffic congestion associated with personal transportation. A gross estimate of the number of miles of personal transportation that was conserved in this process is 200 miles.

APPENDIX 2

SOIL/MATERIALS MANAGEMENT PLAN

A Track 1 Remedial Action was achieved and Soil/Materials Management is not required.

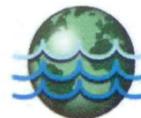

APPENDIX 3

COMMUNITY AIR MONITORING PLAN

A Track 1 Remedial Action was achieved and Community Air Monitoring is not required.

APPENDIX A
CORRESPONDENCE WITH NYCOER

P.W. GROSSER CONSULTING

December 4, 2012

Mr. William Wong
New York City Office of Environmental Remediation
100 Gold Street, 2nd Floor
New York, NY 10038

**Re: Remedial Action Plan Addendum
105 Metropolitan Avenue, Brooklyn, NY – OER Project #11CBCP013K**

Dear Mr. Wong:

P.W. Grosser Consulting, Inc (PWGC) has prepared this letter on behalf of the property developer, 105 Metropolitan Avenue, LLC, to document the proposed modification to the June 2011 Remedial Action Work Plan (RAWP) and the July 18, 2011 RAWP Stipulation List prepared by PWGC for the above referenced site as discussed with the New York City Office of Environmental Restoration (NYCOER) during our November 30, 2012 phone conversation.

The basement elevator pit was installed without the required Florprufe 120 vapor barrier. To remedy this, a sealant will be applied to the four interior walls and floor of the elevator pit under the direction of the PE of record. The sealant will be applied to the concrete floor and walls of the elevator pit and will overlap with bituthene liquid membrane along the top of the west and north elevator pit walls, which will then overlap with the previously approved Florprufe 120 vapor barrier along the basement slab. The east and south walls of the elevator pit are the previously installed and inspected foundation walls protected by the Grace Ice and Water Shield vapor barrier. The sealant that will be applied is Stamp Seal ST OTC. The Stamp Seal ST OTC product data sheets are attached.

Please call, if you have any questions, or require additional information.

Very truly yours,

P.W. Grosser Consulting, Inc.

Jennifer Lewis
Senior Hydrogeologist

Erik Dee-Olsen, PE
Senior Engineer

STAMP SEAL ST OTC

350 VOC COMPLIANT, UV RESISTANT, LOW VISCOSITY 25% CURING AND SEALING COMPOUND

PRODUCT DESCRIPTION

STAMP SEAL ST OTC is a VOC compliant, UV resistant, low viscosity 25% solids solvent based acrylic copolymer curing and sealing compound, as well as a dust-proofer for concrete surfaces. **STAMP SEAL ST OTC** offers improved resistance to rain, the sun, freezing temperatures, stains, and other pollutants that sometimes can be hazardous to concrete. **STAMP SEAL ST OTC** forms a moisture retentive film on freshly placed concrete.

BENEFITS/FEATURES

- ◆ Can be used as a means of dustproofing most concrete surfaces.
- ◆ It's low viscosity formula makes this product very easy to spray.
- ◆ Formulated with ease of use in mind, it sprays or rolls out smooth with no roller streaks.
- ◆ It's ease of use, UV resistant medium gloss, and low cost make this a contractor's favorite.

RECOMMENDED APPLICATIONS

STAMP SEAL ST OTC is recommended for both interior and exterior freshly placed, finished, and aged concrete where a medium gloss solvent based curing and sealing compound is specified.

TECHNICAL INFORMATION

Solids.....	25%	Wet Appearance.....	Clear
Drying Time.....	1 - 2 hours	Dry Appearance.....	Clear with Medium Gloss
Re-Coat Time.....	4 - 24 hours	VOC Content.....	<350 g/l
Foot Traffic.....	4 - 6 hours	Blush Resistance.....	Superior
Wheel Traffic.....	24 - 48 hours	Solvent Resistance.....	Minimal
Application Temp.....	40°F - 85°F	Concrete Adhesion.....	Excellent

***Please note that low air and/or concrete temperatures and/or relative humidity may extend drying times. Follow recommended coverage rates for best results.

SPECIFICATIONS/COMPLIANCES

ASTM C 309, Type 1, Class A & B *ASTM C 1315, Type 1, Class A AASHTO Specification M-148, Type 1, Class A & B DRIED COATING IS USDA ACCEPTED
This product complies with federal AIM Rule VOC regulations and with VOC standards in Ohio, Illinois, Maryland, New York, New Jersey, Delaware, Pennsylvania, Maine, New Hampshire, Virginia, and the District of Columbia. *Does not meet Flashpoint requirement for ASTM C 1315

APPROXIMATE COVERAGE RATES

<u>Application Surface</u>	<u>First Coat</u>	<u>Optional Second Coat</u>
New (unsealed) concrete	250-350 ft ²	350-400 ft ²
Old (sealed) concrete	350-400 ft ²	350-400 ft ²

*Coverage rates vary depending upon surface porosity and texture, and application method. Excessive build up should be avoided.

SHELF LIFE

STAMP SEAL ST OTC has a shelf life of up to two years in it's original, sealed, unopened container.

PACKAGING

STAMP SEAL ST OTC is packaged in 5 gallon pails and 55 gallon drums.

SEALANT DEPOT, INC.

1100 Taylor's Ln. Cinnaminson, NJ 08077
Phone: (856) 829-7325 Fax: (856) 829-7325
Visit us online at: www.sealantdepot.com

CURE & SEALS

STAMP SEAL ST OTC

INSTRUCTIONS FOR USE

SURFACE PREP: Concrete surface must be clean and free of all contaminants and water. Do not apply if rain is forecast within 24 hours. If moisture is present or if the surface is not clean and free of all contaminants, the sealer may have white spots and have premature de-lamination and failure. May be applied when damp (not "wet") to freshly placed concrete surfaces as a cure & seal.

Substrate temperature must be no less than 40 degrees F and not exceed 80 degrees F. If applied outside these limits the sealer may not achieve adequate film formation and may have excessive air entrapment, bubbles, blushing or hazing.

MIXING: Stir well before using. Material may separate during long term storage.

APPLICATION: Apply using an 3/8" long nap roller cover using long even uniform strokes at approximately 250-400 square feet per gallon depending on porosity and texture of substrate. An airless sprayer containing a .519 tip size may be used as well. Thick or puddle areas may prevent the solvent from evaporating and may be susceptible to moisture intrusion which may cause milky white spots. Applying too thin may cause sealer to prematurely delaminate, flake or wear away. Allow sealer to dry for 24 hours for light traffic and at least 48 hours for heavy traffic. If applying two coats, wait approximately 4 – 6 hours between coats.

PLEASE NOTE: It is always recommended to test the product in a small, inconspicuous area (on the same concrete substrate) for desired results prior to application. Coverage rates may vary for all coatings and substrates depending on porosity, density, texture etc. When applying, do not exceed 400 sq. ft. per gallon. Applying too thin of a coating may cause inadequate film formation or performance expectations may be limited. **DO NOT USE ON BRICK.**

CLEAN-UP

Use Xylene. Dispose of containers in accordance with local and federal regulations.

PRODUCT REMOVAL

Dried, cured sealer may be removed with a commercial paint stripper, such as *Nock-Off* or by using a diamond grinding method, sandblasting method or similar mechanical action.

PRECAUTIONS AND LIMITATIONS

- ▶ **STAMP SEAL ST OTC** will not freeze during storage, however, allow temperature to rise to 50 degrees F prior to application.
- ▶ All HVAC ventilation ducts should be somehow blocked prior to application so solvents fumes are not distributed.
- ▶ Keep away from open flames. **STAMP SEAL ST OTC** is flammable and is very susceptible to ignition.
- ▶ It is not recommended to apply **STAMP SEAL ST OTC** over carpet, tile, and other types of floor adhesives.
- ▶ Coverage rates depend upon many conditions including application method, surface porosity, applicator, ect.
- ▶ **STAMP SEAL ST OTC** was designed as a cure & seal and to be applied in one-two medium coats, not one thick coat.
- ▶ Please be aware that this product when cured may be slippery when wet.
- ▶ **STAMP SEAL ST OTC** is not resistant to brake fluid, gasoline, and many similar products.

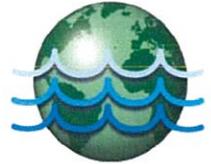

SPECIAL NOTES

Please consult Material Safety Data Sheet (MSDS) and read Warranty information prior to use. This information can be requested by contacting customer service at 856-829-7325.

**Re: 105 Metropolitan Avenue, Brooklyn, NY
RAWP and CHASP Coverage During Underpinning Activities**

Dear Boris:

P.W. Grosser Consulting, Inc. (PWGC) has prepared this letter to detail the requirements for soil excavating activities during the underpinning and sheet installation activities at the above referenced site.

During excavation of undisturbed soils, PWGC will be on-site to conduct the Remedial Action Work Plan (RAWP) and Construction Health and Safety Plan (CHASP) oversight. Soils will be observed for visual or olfactory evidence of contamination and will be field screened with a photoionization detector (PID). If evidence of contamination exists, PWGC will remain on-site to continue RAWP and CHASP oversight.

If contamination is not evident and to minimize oversight costs during the underpinning and sheet installation activities, a designated representative of the general contractor will be trained by PWGC on the following duties:

- Inspecting the soil for visual or olfactory evidence of contamination:
 - If contamination is evident, contact PWGC immediately.
 - If during excavation activities, objects such as storage tanks, drums, cesspools, etc. are located, contact PWGC immediately.
 - If additional excavation of undisturbed soils will occur before the end of the day, contact PWGC immediately.
- Mitigating dust issues:
 - Dust may be created from wind blowing dry soil, machines driving over soil, or excavating activities.
 - Visible dust should not leave the site.
 - To prevent dust, soils should be watered down.
 - Stockpiles need to be covered at the end of the day with plastic sheeting. The plastic sheeting needs to be weighed down to prevent it from blowing off.

The designated site representative should be on-site everyday during underpinning and sheet installation activities. At the end of the day, the designated site representative

shall call Jennifer Lewis with an update on the activities performed at the site for that day.

Contact info for PWGC is as follows:

PWGC Site Safety Officer	Phone Number
Jennifer Lewis	516-315-6028
Ryan Morley	516-424-4603

Prepared By:

BCP Project No:	11CBCP013K	E-Number:	11EHAZ309K	Date:	Mar 15, 2012
Project Name:	105 Metropolitan Avenue				

Consultant: P.W. Grosser Consulting	Safety Officer: Ryan Morley
Contractor: Adam's Concrete Foundations	

Work Activities Performed (Since Last Report):

- Excavated three sections for underpinning along the southern property boundary in the east, west, and center grids.

Working In Grid #: East, West, Center

Samples Collected (Since Last Report):

No samples collected.

Air Monitoring (Since Last Report):

No limits exceeded.

Problems Encountered:

No problems encountered.

Planned Activities for Next Week:

- Continue excavating for underpinning.

Example:

Facility # Name/ location type of waste	No soil removal today		Solid		Solid		Liquid		##### Clean Earth Carteret, NJ petroleum soils trucks (cy) Solid <u>Or</u> Liquid	
	Trucks	Cu. Yds.	Trucks	Cu. Yds.	Trucks	Cu. Yds.	Trucks	Gallons	Trucks	Cu. Yds. <u>Or</u> Gallons
Today (trucks, cu.yds.)									5	120
Totals (trucks, cu.yds.)									25	600

Site Grid Map

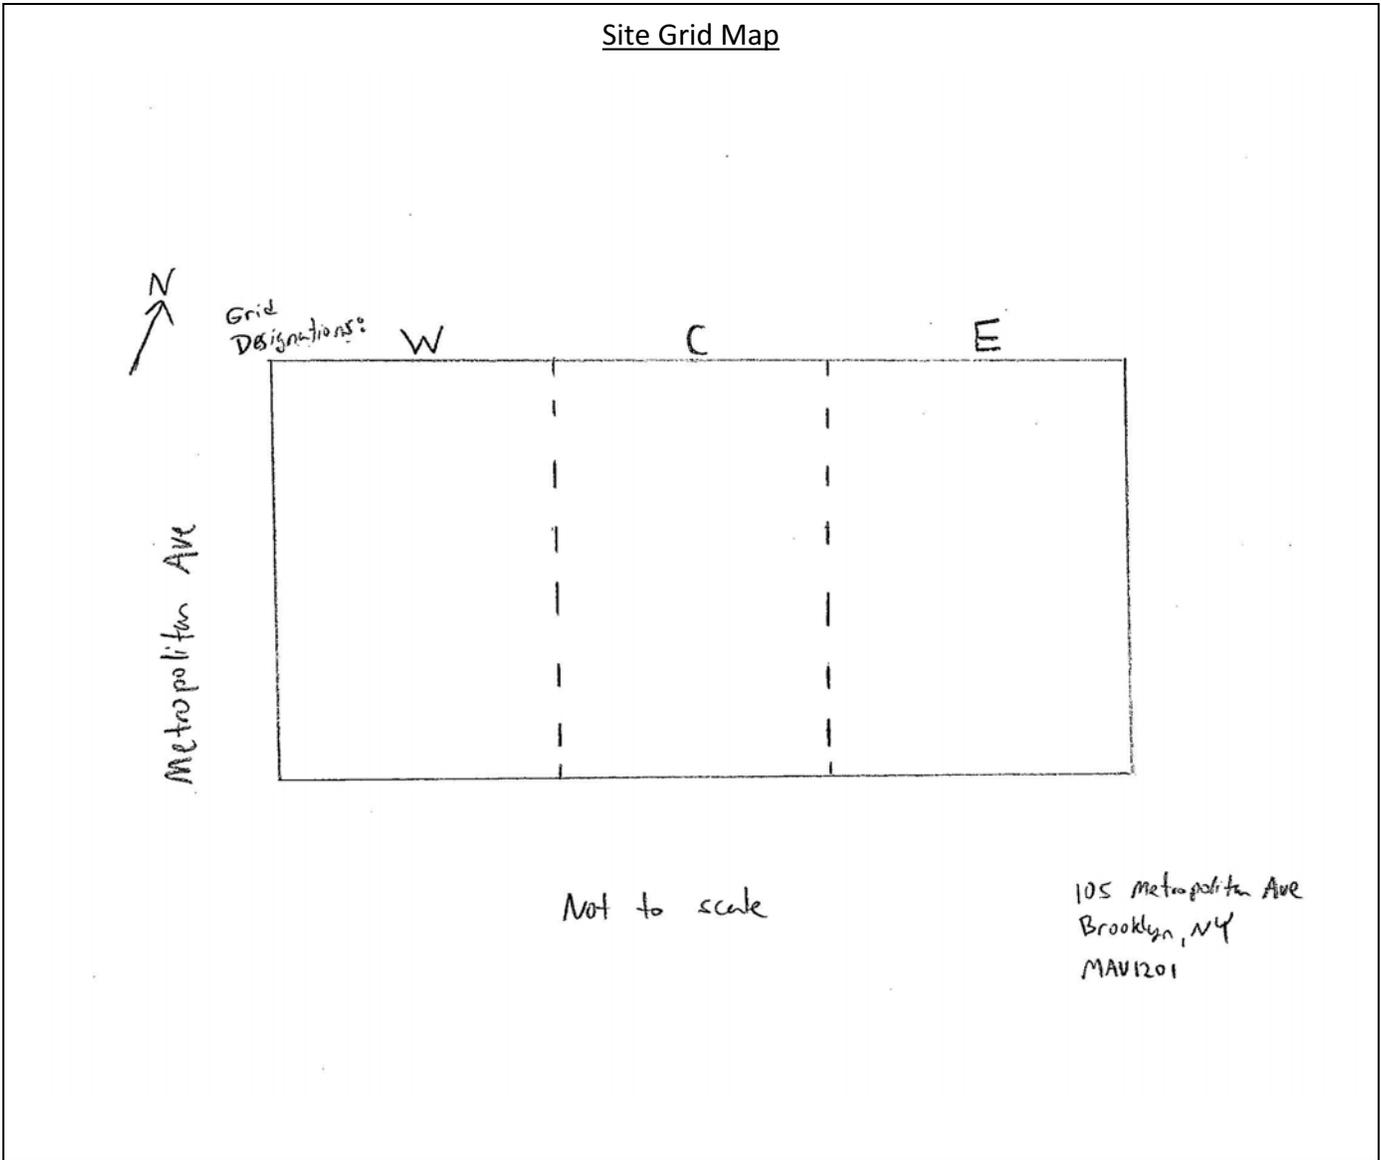

Photo Log

Photo 1 –

Forms are in place for a concrete pour along the northern property boundary in the eastern grid.

Photo 2 –

A section along the southern property boundary in the eastern grid being excavated for underpinning.

Photo 3 –

A section along the southern property boundary being excavated for underpinning. There was no visual or olfactory evidence of contamination.

DAILY STATUS REPORT

WEATHER	Snow	<input type="checkbox"/>	Rain	<input checked="" type="checkbox"/>	Overcast	<input checked="" type="checkbox"/>	Partly Cloudy	<input type="checkbox"/>	Bright Sun	<input type="checkbox"/>
TEMP.	TO 32	<input type="checkbox"/>	32-50	<input checked="" type="checkbox"/>	50-70	<input type="checkbox"/>	70-85	<input type="checkbox"/>	>85	<input type="checkbox"/>

Prepared By:

Project Name:	105 Metropolitan Avenue				

Consultant: P.W. Grosser Consulting	Safety Officer: Ryan Morley
Contractor: Adam's Concrete Foundations	

Work Activities Performed (Since Last Report):

- Excavated three sections for underpinning along the southern property boundary in the east, west, and center grids.

Working In Grid #: East, West, Center

Samples Collected (Since Last Report):

No samples collected.

Air Monitoring (Since Last Report):

No limits exceeded.

Problems Encountered:

During excavation of the underpinning in the southwestern section of the site, a small section of soil exhibited a minor petroleum odor, but no staining was evident. The soil was excavated, placed on poly sheeting, and covered.

Planned Activities for Next Week:

- Continue excavating for underpinning.

Example:

Facility # Name/ location type of waste	No soil removal today		Solid		Solid		Liquid		##### Clean Earth Carteret, NJ petroleum soils trucks (cy) Solid <u>Or</u> Liquid	
	Trucks	Cu. Yds.	Trucks	Cu. Yds.	Trucks	Cu. Yds.	Trucks	Gallons	Trucks	Cu. Yds. <u>Or</u> Gallons
Today (trucks, cu.yds.)									5	120
Totals (trucks, cu.yds.)									25	600

Site Grid Map

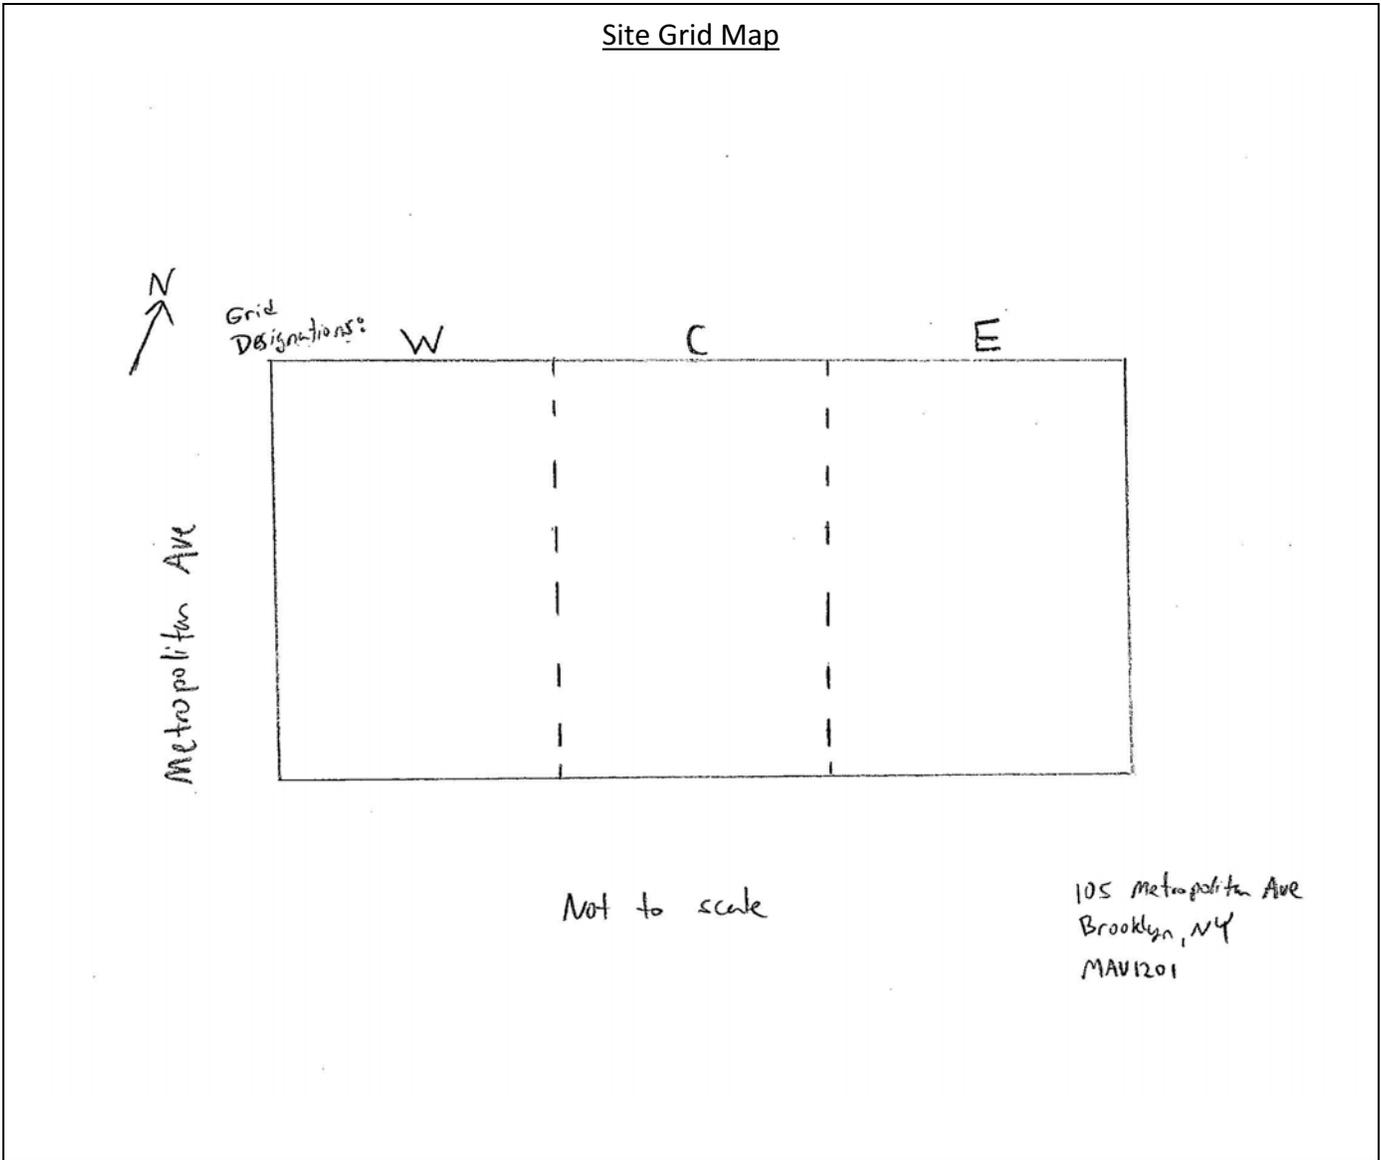

Photo Log

Photo 1 –

Excavating for underpinning along the southern property boundary in the western grid.

Photo 2 –

Soil exhibiting minor olfactory evidence of contamination in the southwestern section was segregated and placed on poly sheeting. The soil did not exhibit visual evidence of contamination.

Photo 3 –

The segregated soil was covered with poly sheeting to prevent off-site migration.

Prepared By: Ryan Morley

BCP Project No:	11CBCP013K	E-Number:	11EHAZ309K	Date:	April 5, 2012
Project Name:	105 Metropolitan Avenue				

Consultant: P. W. Grosser Consulting	Safety Officer: Ryan Morley
Contractor: Adam's Concrete Foundation	

Work Activities Performed (Since Last Report):

- Continuing to install shoring in the east grid.
- Excavated for underpinning in the eastern grid, along the southern property boundary.

Working In Grid #: East

Samples Collected (Since Last Report):

No samples collected

Air Monitoring (Since Last Report):

No limits exceeded

Problems Encountered:

No problems encountered

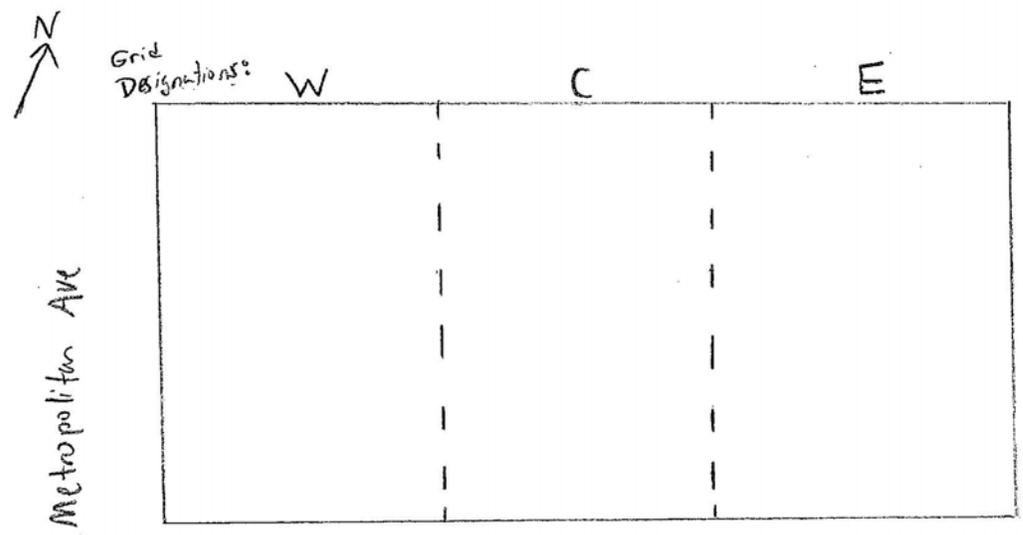

Planned Activities for Next Week:

- Continue excavating for underpinning and shoring installation.

Example:

Facility # Name/ location type of waste	No soils removed today		Solid		Solid		Liquid		##### Clean Earth Carteret, NJ petroleum soils trucks (cy) Solid Or Liquid	
	Trucks	Cu. Yds.	Trucks	Cu. Yds.	Trucks	Cu. Yds.	Trucks	Gallons	Trucks	Cu. Yds. Or Gallons
Today (trucks, cu.yds.)									5	120
Totals (trucks, cu.yds.)									25	600

TEMP.	TO 32	<input type="checkbox"/>	32-50	<input type="checkbox"/>	50-70	<input checked="" type="checkbox"/>	70-85	<input type="checkbox"/>	>85	<input type="checkbox"/>

Prepared By: Ryan Morley

BCP Project No:	11CBCP013K	E-Number:	11EHAZ309K	Date:	June 19, 2012
Project Name:	105 Metropolitan Avenue				

Consultant: P. W. Grosser Consulting	Safety Officer: Ryan Morley
Contractor: Adam's Concrete Foundation	

Work Activities Performed (Since Last Report):

-Excavation for underpinning and footings was performed on the Southwest corner of the site.

Working In Grid #: West

Samples Collected (Since Last Report):

No samples collected.

Air Monitoring (Since Last Report):

No limits exceeded.

Problems Encountered:

No problems encountered.

Planned Activities for Next Week:

-Continue digging in southwest corner of the site for footings, load trucks with soil for offsite disposal.

Example:

Facility # Name/ location type of waste	No soil removal today		Solid		Solid		Liquid		##### Clean Earth Carteret, NJ petroleum soils trucks (cy) Solid <u>Or</u> Liquid	
	Trucks	Cu. Yds.	Trucks	Cu. Yds.	Trucks	Cu. Yds.	Trucks	Gallons	Trucks	Cu. Yds. <u>Or</u> Gallons
Today (trucks, cu.yds.)									5	120
Totals (trucks, cu.yds.)	12	240							25	600

BCP Project No:	11CBCP013K	E-Number:	11EHAZ309K	Date:	Jul 26, 2012
Project Name:	105 Metropolitan Avenue				

Consultant: P. W. Grosser Consulting	Safety Officer: Jennifer Lewis
Contractor: Adam's Concrete Foundation	

Work Activities Performed (Since Last Report):

Loading tri-axle dump trucks with soils from eastern portion of site.

Working In Grid #: East

Samples Collected (Since Last Report):

No samples collected

Air Monitoring (Since Last Report):

No limits exceeded

Problems Encountered:

No problems encountered

Planned Activities for Next Week:

Continue excavating for footings, truck soil off-site

Example:

Facility # Name/ location type of waste	#132310 Clean Earth Cartaret, NJ Urban Fill		Solid		Solid		Liquid		##### Clean Earth Carteret, NJ petroleum soils trucks (cy) Solid <u>Or</u> Liquid	
	Trucks	Cu. Yds.	Trucks	Cu. Yds.	Trucks	Cu. Yds.	Trucks	Gallons	Trucks	Cu. Yds. <u>Or</u> Gallons
Today (trucks, cu.yds.)	13	260							5	120
Totals (trucks, cu.yds.)	25	500							25	600

Site Grid Map

Not to scale

105 Metropolitan Ave
Brooklyn, NY
MAV1201

Photo Log

Photo 1 –

A view of the vapor barrier installation in the passenger elevator pit. Liquid bituthene was installed along the bottom of the elevator pit and along the north and west walls. The east and south walls were previously protected with the Grace Ice & Water Shield vapor barrier installed on the exterior of the foundation walls.

Photo 2 –

A view of the automobile lift. The entire site has been capped with concrete.

Photo 3 –

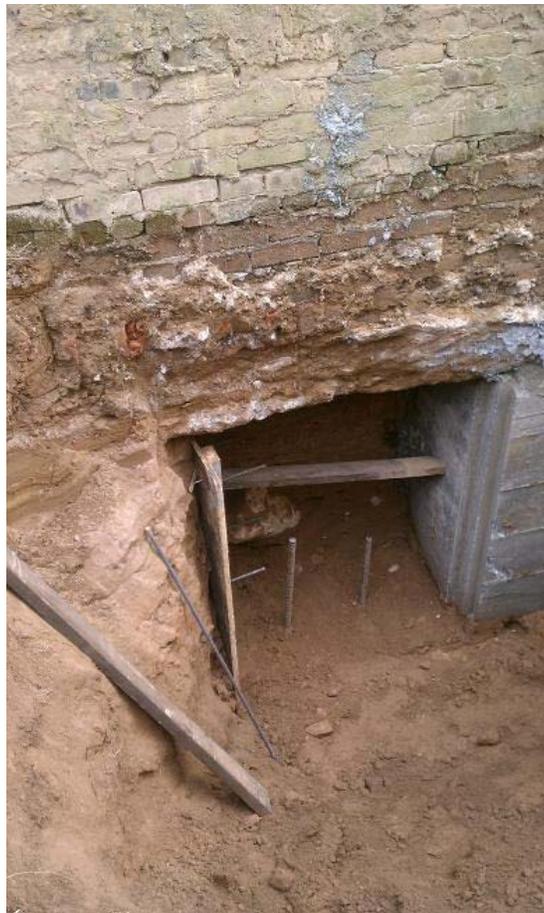

The entire site has been capped with concrete.

APPENDIX B
PHOTO LOG

A view of the site looking towards the west. Site conditions before construction began.

The two neighboring properties to the north and south of the subject property were underpinned for structural stability during on-site excavation to 12 feet below grade.

A small section of soil along the southwest property boundary exhibited a petroleum odor and elevated PID response. The soil was placed on double layers of poly sheeting and covered pending off-site disposal.

Grace Ice and Water Shield was installed along the foundation walls and inspected by a PWGC engineer.

Soils were loaded directly into tri-axle dump trucks for off-site disposal at Clean Earth of Carteret in New Jersey.

Grace Ice and Water Shield vapor barrier was installed along the exterior of the foundation walls prior to the pouring of the concrete.

A view of the site looking towards the north. Excavation has been completed and the vapor barrier installation on the exterior of the foundation walls has been completed.

Some interior walls were installed directly on footings prior to the installation of the Florprufe 120 vapor barrier. To remedy this, bottoms of the walls were removed in sections to allow for the installation of the vapor barrier. These sections overlapped with the vapor barrier installed on the basement slab and were sealed with manufacturer's supplied tape and/or liquid bituthene.

Florprufe 120 vapor barrier was installed at the bottom of the excavation. Protrusions through the vapor barrier were sealed with manufacturer's supplied tape and/or liquid bituthene. Edges of the vapor barrier overlapped and were sealed with manufacturer's supplied tape.

Application of the Liquid Bituthene sealant in the passenger elevator pit. The sealant was installed on the north and west walls which and on the base of the pit.

A view of the basement following pouring of the concrete slab. The entire site is now capped with concrete.

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples free of charge for 30 days from the date the project is completed. After 30 days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples.

Please contact Client Services at 800-624-9220 with any questions.

Report Date: 08/13/12

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Volatile Organics

L1213972-05: The Trip Blank has a result for Acetone present above the method detection limit. The sample vial was verified as being labeled correctly by the laboratory and the previous analysis showed there was no potential for carry over.

The WG553787-4/-5 MS/MSD recoveries, performed on L1213972-01, were below the acceptance criteria for Trichlorofluoromethane (59%/58%) and Vinyl acetate (66%/64%).

Metals

L1213972-01, -02, and -03 have elevated detection limits for all analytes, except Mercury, due to the dilutions required by matrix interferences encountered during analysis.

The WG553351-1 Method Blank, associated with L1213972-01, -02, and -03, has a concentration above the reporting limit for Iron. Since the associated sample concentrations are greater than 10x the Method Blank concentration for this analyte, no qualification of the results was performed.

The WG553351-3/-4 MS/MSD recoveries for Aluminum (808%/1040%), Iron (0%/2310%), and Manganese (69%/185%), performed on L1213972-01, do not apply because the sample concentration is greater than four times the spike amount added.

The WG553351-3/-4 MS/MSD recoveries, performed on L1213972-01, are outside the acceptance criteria for Antimony (44%/49%), Lead (MSD at 50%), Magnesium (MSD at 139%) and Potassium (MSD at 139%). A post digestion spike was performed with acceptable recoveries for Antimony (87%), Lead (87%), Magnesium (83%), and Potassium (100%).

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

A	- Spectra identified as "Aldol Condensation Product".
B	- The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
C	- Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
D	- Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
E	- Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
G	- The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
H	- The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
I	- The RPD between the results for the two columns exceeds the method-specified criteria; however, the lower value has been reported due to obvious interference.
M	- Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
NJ	- Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

Report Format: DU Report with "J" Qualifiers

Project Name: MAV1201
Project Number: MAV1201

Lab Number: L1213972
Report Date: 08/13/12

Data Qualifiers

- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL). This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certificate/Approval Program Summary

Last revised August 3, 2012 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

Connecticut Department of Public Health Certificate/Lab ID: PH-0574. **NELAP Accredited Solid Waste/Soil.**

Drinking Water (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Nickel, Silver, Sodium, Thallium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP) 504.1, Ethylene Dibromide (EDB) 504.1, 1,4-Dioxane (Mod 8270). Microbiology Parameters: Total Coliform-MF mEndo (SM9222B), Total Coliform – Colilert (SM9223, Enumeration and P/A), E. Coli. – Colilert (SM9223, Enumeration and P/A), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D), Fecal Coliform-EC Medium (SM 9221E).

Wastewater/Non-Potable Water (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, TPH (HEM/SGT), CT-Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH. Microbiology Parameters: Total Coliform – MF mEndo (SM9222B), Total Coliform – MTF (SM9221B), E. Coli – Colilert (SM9223 Enumeration), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D), Fecal Coliform – A-1 Broth (SM9221E), Enterococcus - Enterolert.

Solid Waste/Soil (Inorganic Parameters: pH, Sulfide, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), SPLP Leach (1312 metals only), Reactivity. Organic Parameters: PCBs, PCBs in Oil, Organochlorine Pesticides, Technical Chlordane, Toxaphene, CT-Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP (Silvex), Dalapon, Volatile Organics (SW 8260), Acid Extractables (Phenols) (SW 8270), Benzidines (SW 8270), Phthalates (SW 8270), Nitrosamines (SW 8270), Nitroaromatics & Cyclic Ketones (SW 8270), PAHs (SW 8270), Haloethers (SW 8270), Chlorinated Hydrocarbons (SW 8270).)

Maine Department of Human Services Certificate/Lab ID: 2009024.

Drinking Water (Inorganic Parameters: SM9215B, 9222D, 9223B, EPA 180.1, 353.2, SM2130B, 2320B, 2540C, 4500CI-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B, 4500NO3-F, EPA 200.7, EPA 200.8, 245.1, EPA 300.0. Organic Parameters: 504.1, 524.2.)

Wastewater/Non-Potable Water (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, SM2320B, 2510B, 2540C, 2540D, 426C, 4500CI-D, 4500CI-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NO3-F, 4500P-B, 4500P-E, 5210B, 5220D, 5310C, 9010B, 9040B, 9030B, 7470A, 7196A, 2340B, EPA 200.7, 6010B, 200.8, 6020, 245.1, 1311, 1312, 3005A, Enterolert, 9223D, 9222D. Organic Parameters: 608, 624, 625, 8081A, 8082, 8330, 8151A, 8260B, 8270C, 3510C, 3630C, 5030B, ME-DRO, ME-GRO, MA-EPH, MA-VPH.)

Solid Waste/Soil (Inorganic Parameters: 9010B, 9012A, 9014A, 9030B, 9040B, 9045C, 6010B, 7471A, 7196A, 9050A, 1010, 1030, 9065, 1311, 1312, 3005A, 3050B. Organic Parameters: ME-DRO, ME-GRO, MA-EPH, MA-VPH, 8260B, 8270C, 8330, 8151A, 8081A, 8082, 3540C, 3546, 3580A, 3630C, 5030B, 5035.)

Massachusetts Department of Environmental Protection Certificate/Lab ID: M-MA086.

Drinking Water (Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl) (EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Fluoride, Sulfate); (EPA 353.2 for: Nitrate-N, Nitrite-N); (SM4500NO3-F for: Nitrate-N and Nitrite-N); 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, 2320B, SM2540C, SM4500H-B. Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics); (504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), EPA 332. Microbiology Parameters: SM9215B; ENZ. SUB. SM9223; ColilertQT SM9223B; MF-SM9222D.)

for: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn); 245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2340B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LACHAT 10-107-06-1-B for Ammonia-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.

Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics),(608 for: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT,Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs-Water), (EPA 625 for SVOC Acid Extractables and SVOC Base/Neutral Extractables), 600/4-81-045-PCB-Oil. Microbiology Parameters: (ColilertQT SM9223B; Enterolert-QT: SM9222D-MF.)

New Hampshire Department of Environmental Services Certificate/Lab ID: 200307. *NELAP Accredited.*

Drinking Water (Inorganic Parameters: SM 9222B, 9223B, 9215B, EPA 200.7, 200.8, 300.0, SM4500CN-E, 4500H+B, 4500NO3-F, 2320B, 2510B, 2540C, 4500F-C, 5310C, 2120B, EPA 332.0. Organic Parameters: 504.1, 524.2.)

Non-Potable Water (Inorganic Parameters: SM9222D, 9221B, 9222B, 9221E-EC, EPA 3005A, 200.7, 200.8, 245.1, SW-846 6010B, 6010C, 6020, 6020A, 7196A, 7470A, SM3500-CR-D, EPA 120.1, 300.0, 350.1, 350.2, 351.1, 353.2, 410.4, 420.1, 426C, 1664A, SW-846 9010B, 9030B, 9040B, SM2120B, 2310B, 2320B, 2540B, 2540D, 4500H+B, 4500CL-E, 4500CN-E, 4500NH3-H, 4500NO3-F, 4500NO2-B, 4500P-E, 4500-S2-D, 5210B, 5220D, 2510B, 2540C, 4500F-C, 5310C, 5540C, LACHAT 10-204-00-1-A, LACHAT 10-107-06-2-D, 3060A. Report Date: 08/27/12

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples free of charge for 30 days from the date the project is completed. After 30 days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples.

Please contact Client Services at 800-624-9220 with any questions.

Report Date: 08/27/12

Case Narrative (continued)

Report Submission

At the client's request, all samples were analyzed for Metals.

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Sample Receipt

L1214641-03: The sample was received above the appropriate pH for the Metals analysis. The analysis was performed at the client's request.

Metals

L1214641-01 and -02 have elevated detection limits for all elements, with the exception of Mercury, due to the dilutions required by the samples matrices.

The WG556596-3/-4 MS/MSD recoveries for Aluminum (0%/184%), Iron (3680%/1230%) and Manganese (368%/295%), performed on L1214641-01, do not apply because the sample concentrations are greater than four times the spike amount added.

The WG556596-3/-4 MS/MSD recoveries, performed on L1214641-01, are outside the acceptance criteria for Antimony (49%/44%) and Magnesium (MS at 74%). A post digestion spike was performed with acceptable recoveries for Antimony (84%) and Magnesium (79%).

The WG556596-3/-4 MS/MSD recoveries, performed on L1214641-01, are outside the acceptance criteria for Calcium (37%/49%). A post digestion spike was performed with an unacceptable recovery of (55%). This has been attributed to sample matrix.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

A	- Spectra identified as "Aldol Condensation Product".
B	- The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
C	- Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
D	- Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
E	- Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
G	- The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
H	- The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
I	- The RPD between the results for the two columns exceeds the method-specified criteria; however, the lower value has been reported due to obvious interference.
M	- Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
NJ	- Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

Report Format: DU Report with "J" Qualifiers

Project Name: MAV1201
Project Number: MAV1201

Lab Number: L1214641
Report Date: 08/27/12

Data Qualifiers

- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL). This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certificate/Approval Program Summary

Last revised August 16, 2012 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

Connecticut Department of Public Health Certificate/Lab ID: PH-0574. **NELAP Accredited Solid Waste/Soil.**

Drinking Water (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Nickel, Silver, Sodium, Thallium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP) 504.1, Ethylene Dibromide (EDB) 504.1, 1,4-Dioxane (Mod 8270). Microbiology Parameters: Total Coliform-MF mEndo (SM9222B), Total Coliform – Colilert (SM9223, Enumeration and P/A), E. Coli. – Colilert (SM9223, Enumeration and P/A), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D), Fecal Coliform-EC Medium (SM 9221E).

Wastewater/Non-Potable Water (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, TPH (HEM/SGT), CT-Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH. Microbiology Parameters: Total Coliform – MF mEndo (SM9222B), Total Coliform – MTF (SM9221B), E. Coli – Colilert (SM9223 Enumeration), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D), Fecal Coliform – A-1 Broth (SM9221E), Enterococcus - Enterolert.

Solid Waste/Soil (Inorganic Parameters: pH, Sulfide, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), SPLP Leach (1312 metals only), Reactivity. Organic Parameters: PCBs, PCBs in Oil, Organochlorine Pesticides, Technical Chlordane, Toxaphene, CT-Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP (Silvex), Dalapon, Volatile Organics (SW 8260), Acid Extractables (Phenols) (SW 8270), Benzidines (SW 8270), Phthalates (SW 8270), Nitrosamines (SW 8270), Nitroaromatics & Cyclic Ketones (SW 8270), PAHs (SW 8270), Haloethers (SW 8270), Chlorinated Hydrocarbons (SW 8270).)

Maine Department of Human Services Certificate/Lab ID: 2009024.

Drinking Water (Inorganic Parameters: SM9215B, 9222D, 9223B, EPA 180.1, 353.2, SM2130B, 2320B, 2540C, 4500CI-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B, 4500NO3-F, EPA 200.7, EPA 200.8, 245.1, EPA 300.0. Organic Parameters: 504.1, 524.2.)

Wastewater/Non-Potable Water (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, SM2320B, 2510B, 2540C, 2540D, 426C, 4500CI-D, 4500CI-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NO3-F, 4500P-B, 4500P-E, 5210B, 5220D, 5310C, 9010B, 9040B, 9030B, 7470A, 7196A, 2340B, EPA 200.7, 6010B, 200.8, 6020, 245.1, 1311, 1312, 3005A, Enterolert, 9223D, 9222D. Organic Parameters: 608, 624, 625, 8081A, 8082, 8330, 8151A, 8260B, 8270C, 3510C, 3630C, 5030B, ME-DRO, ME-GRO, MA-EPH, MA-VPH.)

Solid Waste/Soil (Inorganic Parameters: 9010B, 9012A, 9014A, 9030B, 9040B, 9045C, 6010B, 7471A, 7196A, 9050A, 1010, 1030, 9065, 1311, 1312, 3005A, 3050B. Organic Parameters: ME-DRO, ME-GRO, MA-EPH, MA-VPH, 8260B, 8270C, 8330, 8151A, 8081A, 8082, 3540C, 3546, 3580A, 3630C, 5030B, 5035.)

Massachusetts Department of Environmental Protection Certificate/Lab ID: M-MA086.

Drinking Water (Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl) (EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Fluoride, Sulfate); (EPA 353.2 for: Nitrate-N, Nitrite-N); (SM4500NO3-F for: Nitrate-N and Nitrite-N); 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, 2320B, SM2540C, SM4500H-B. Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics); (504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), EPA 332. Microbiology Parameters: SM9215B; ENZ. SUB. SM9223; ColilertQT SM9223B; MF-SM9222D.)

for: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn); 245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2340B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LACHAT 10-107-06-1-B for Ammonia-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.

Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics),(608 for: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT,Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs-Water), (EPA 625 for SVOC Acid Extractables and SVOC Base/Neutral Extractables), 600/4-81-045-PCB-Oil. Microbiology Parameters: (ColilertQT SM9223B; Enterolert-QT: SM9222D-MF.)

New Hampshire Department of Environmental Services Certificate/Lab ID: 200307. *NELAP Accredited.*

Drinking Water (Inorganic Parameters: SM 9222B, 9223B, 9215B, EPA 200.7, 200.8, 300.0, SM4500CN-E, 4500H+B, 4500NO3-F, 2320B, 2510B, 2540C, 4500F-C, 5310C, 2120B, EPA 332.0. Organic Parameters: 504.1, 524.2.)

Non-Potable Water (Inorganic Parameters: SM9222D, 9221B, 9222B, 9221E-EC, EPA 3005A, 200.7, 200.8, 245.1, SW-846 6010B, 6010C, 6020, 6020A, 7196A, 7470A, SM3500-CR-D, EPA 120.1, 300.0, 350.1, 350.2, 351.1, 353.2, 410.4, 420.1, 426C, 1664A, SW-846 9010B, 9030B, 9040B, SM2120B, 2310B, 2320B, 2540B, 2540D, 4500H+B, 4500CL-E, 4500CN-E, 4500NH3-H, 4500NO3-F, 4500NO2-B, 4500P-E, 4500-S2-D, 5210B, 5220D, 2510B, 2540C, 4500F-C, 5310C, 5540C, LACHAT 10-204-00-1-A, LACHAT 10-107-06-2-D, 3060A. Organic Parameters: SW-846 3510C, 3630C, 5030B, 8260B, 8270C, 8270D, 8330, EPA 624, 625, 608, SW-846 8082, 8082A, 8081A, 8081B, 8151A, 8330, 8270C-SIM, 8270D-SIM.)

Solid & Chemical Materials (Inorganic Parameters: SW-846 6010B, 6010C, 7196A, 7471A, 1010, 1030, 9010, 9012A, 9014, 9030B, 9040B, 9045C, 9050, 9065,1311, 1312, 3005A, 3050B, 3060A. Organic Parameters: SW-846 3540C, 3546, 3050B, 3580A, 3630C, 5030B, 5035, 8260B, 8270C, 8270D, 8270C-SIM, 8270D-SIM, 8330, 8151A, 8015B, 8015C, 8082, 8082A, 8081A, 8081B.)

New Jersey Department of Environmental Protection Certificate/Lab ID: MA935. *NELAP Accredited.*

Drinking Water (Inorganic Parameters: SM9222B, 9221E, 9223B, 9215B, 4500CN-CE, 4500NO3-F, 4500F-C, EPA 300.0, 200.7, 200.8, 245.1, 2540C, SM2120B, 2320B, 2510B, 5310C, SM4500H-B. Organic Parameters: EPA 332, 504.1, 524.2.)

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples free of charge for 30 days from the date the project is completed. After 30 days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples.

Please contact Client Services at 800-624-9220 with any questions.

Project Number: MAV1201

Lab Number: L1214656
Report Date: 08/16/12

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Metals

L1214656-01 and -02 have elevated detection limits for all analytes, with the exception of Mercury, due to the dilution required by the sample matrix.

The WG555124-4 MS recoveries for Aluminum (568%) and Iron (0%), performed on L1214656-01, do not apply because the sample concentrations are greater than four times the spike amounts added.

The WG555124-4 MS recovery, performed on L1214656-01, is outside the acceptance criteria for Antimony (52%). A post digestion spike was performed with an acceptable recovery of 87%.

The WG555124-3 Laboratory Duplicate RPD, performed on L1214656-01, is outside the acceptance criteria for Lead (36%). The elevated RPD has been attributed to the non-homogeneous nature of the sample utilized for the Laboratory Duplicate.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature:  Elizabeth Simmons

GLOSSARY

Acronyms

EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

A	- Spectra identified as "Aldol Condensation Product".
B	- The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
C	- Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
D	- Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
E	- Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
G	- The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
H	- The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
I	- The RPD between the results for the two columns exceeds the method-specified criteria; however, the lower value has been reported due to obvious interference.
M	- Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
NJ	- Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

Report Format: DU Report with "J" Qualifiers

Project Name: MAV1201
Project Number: MAV1201

Lab Number: L1214656
Report Date: 08/16/12

Data Qualifiers

- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL). This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certificate/Approval Program Summary

Last revised August 16, 2012 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

Connecticut Department of Public Health Certificate/Lab ID: PH-0574. **NELAP Accredited Solid Waste/Soil.**

Drinking Water (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Nickel, Silver, Sodium, Thallium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP) 504.1, Ethylene Dibromide (EDB) 504.1, 1,4-Dioxane (Mod 8270). Microbiology Parameters: Total Coliform-MF mEndo (SM9222B), Total Coliform – Colilert (SM9223, Enumeration and P/A), E. Coli. – Colilert (SM9223, Enumeration and P/A), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D), Fecal Coliform-EC Medium (SM 9221E).

Wastewater/Non-Potable Water (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, TPH (HEM/SGT), CT-Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH. Microbiology Parameters: Total Coliform – MF mEndo (SM9222B), Total Coliform – MTF (SM9221B), E. Coli – Colilert (SM9223 Enumeration), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D), Fecal Coliform – A-1 Broth (SM9221E), Enterococcus - Enterolert.

Solid Waste/Soil (Inorganic Parameters: pH, Sulfide, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), SPLP Leach (1312 metals only), Reactivity. Organic Parameters: PCBs, PCBs in Oil, Organochlorine Pesticides, Technical Chlordane, Toxaphene, CT-Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP (Silvex), Dalapon, Volatile Organics (SW 8260), Acid Extractables (Phenols) (SW 8270), Benzidines (SW 8270), Phthalates (SW 8270), Nitrosamines (SW 8270), Nitroaromatics & Cyclic Ketones (SW 8270), PAHs (SW 8270), Haloethers (SW 8270), Chlorinated Hydrocarbons (SW 8270).)

Maine Department of Human Services Certificate/Lab ID: 2009024.

Drinking Water (Inorganic Parameters: SM9215B, 9222D, 9223B, EPA 180.1, 353.2, SM2130B, 2320B, 2540C, 4500CI-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B, 4500NO3-F, EPA 200.7, EPA 200.8, 245.1, EPA 300.0. Organic Parameters: 504.1, 524.2.)

Wastewater/Non-Potable Water (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, SM2320B, 2510B, 2540C, 2540D, 426C, 4500CI-D, 4500CI-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NO3-F, 4500P-B, 4500P-E, 5210B, 5220D, 5310C, 9010B, 9040B, 9030B, 7470A, 7196A, 2340B, EPA 200.7, 6010B, 200.8, 6020, 245.1, 1311, 1312, 3005A, Enterolert, 9223D, 9222D. Organic Parameters: 608, 624, 625, 8081A, 8082, 8330, 8151A, 8260B, 8270C, 3510C, 3630C, 5030B, ME-DRO, ME-GRO, MA-EPH, MA-VPH.)

Solid Waste/Soil (Inorganic Parameters: 9010B, 9012A, 9014A, 9030B, 9040B, 9045C, 6010B, 7471A, 7196A, 9050A, 1010, 1030, 9065, 1311, 1312, 3005A, 3050B. Organic Parameters: ME-DRO, ME-GRO, MA-EPH, MA-VPH, 8260B, 8270C, 8330, 8151A, 8081A, 8082, 3540C, 3546, 3580A, 3630C, 5030B, 5035.)

Massachusetts Department of Environmental Protection Certificate/Lab ID: M-MA086.

Drinking Water (Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl) (EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Fluoride, Sulfate); (EPA 353.2 for: Nitrate-N, Nitrite-N); (SM4500NO3-F for: Nitrate-N and Nitrite-N); 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, 2320B, SM2540C, SM4500H-B. Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics); (504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), EPA 332. Microbiology Parameters: SM9215B; ENZ. SUB. SM9223; ColilertQT SM9223B; MF-SM9222D.)

for: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn); 245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2340B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LACHAT 10-107-06-1-B for Ammonia-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.

Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics),(608 for: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT,Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs-Water), (EPA 625 for SVOC Acid Extractables and SVOC Base/Neutral Extractables), 600/4-81-045-PCB-Oil. Microbiology Parameters: (ColilertQT SM9223B; Enterolert-QT: SM9222D-MF.)

New Hampshire Department of Environmental Services Certificate/Lab ID: 200307. *NELAP Accredited.*

Drinking Water (Inorganic Parameters: SM 9222B, 9223B, 9215B, EPA 200.7, 200.8, 300.0, SM4500CN-E, 4500H+B, 4500NO3-F, 2320B, 2510B, 2540C, 4500F-C, 5310C, 2120B, EPA 332.0. Organic Parameters: 504.1, 524.2.)

Non-Potable Water (Inorganic Parameters: SM9222D, 9221B, 9222B, 9221E-EC, EPA 3005A, 200.7, 200.8, 245.1, SW-846 6010B, 6010C, 6020, 6020A, 7196A, 7470A, SM3500-CR-D, EPA 120.1, 300.0, 350.1, 350.2, 351.1, 353.2, 410.4, 420.1, 426C, 1664A, SW-846 9010B, 9030B, 9040B, SM2120B, 2310B, 2320B, 2540B, 2540D, 4500H+B, 4500CL-E, 4500CN-E, 4500NH3-H, 4500NO3-F, 4500NO2-B, 4500P-E, 4500-S2-D, 5210B, 5220D, 2510B, 2540C, 4500F-C, 5310C, 5540C, LACHAT 10-204-00-1-A, LACHAT 10-107-06-2-D, 3060A. Organic Parameters: SW-846 3510C, 3630C, 5030B, 8260B, 8270C, 8270D, 8330, EPA 624, 625, 608, SW-846 8082, 8082A, 8081A, 8081B, 8151A, 8330, 8270C-SIM, 8270D-SIM.)

Solid & Chemical Materials (Inorganic Parameters: SW-846 6010B, 6010C, 7196A, 7471A, 1010, 1030, 9010, 9012A, 9014, 9030B, 9040B, 9045C, 9050, 9065,1311, 1312, 3005A, 3050B, 3060A. Organic Parameters: SW-846 3540C, 3546, 3050B, 3580A, 3630C, 5030B, 5035, 8260B, 8270C, 8270D, 8270C-SIM, 8270D-SIM, 8330, 8151A, 8015B, 8015C, 8082, 8082A, 8081A, 8081B.)

Re: Modification of a Class B Recycling Center General Approval
Clean Earth of Carteret, Inc.
Block 1, Lot 302
Borough of Carteret, Middlesex County
Facility ID No: 132310
Permit No.: CBG080002

Dear Mr. Kushnir:

Please be advised that the New Jersey Department of Environmental Protection, Solid & Hazardous Waste Management Program has reached a final determination to modify the Recycling Center General Approval for the referenced facility. Enclosed is a copy of the final document.

Should you wish to contest any of the conditions of the enclosed general approval, you must file a request for an adjudicatory hearing within twenty (20) days of the date you receive this decision notice in accordance with the procedures found in N.J.A.C. 7:26A-3.14. A copy of the request should also be mailed to this office.

If you have any questions concerning this matter, please contact Joseph Staab of my staff at (609) 984-6814, or by email at joseph.staab@dep.state.nj.us.

Sincerely,

Anthony Fontana, Chief
Bureau of Transfer Stations

RECYCLING CENTER GENERAL APPROVAL FOR CLASS B RECYCLABLE MATERIALS, STREET SWEEPINGS AND PETROLEUM CONTAMINATED SOIL

Under the provisions of N.J.S.A. 13:1E-1 et seq. and N.J.S.A. 13:1E-99.11 et seq., known as the Solid Waste Management Act and New Jersey Statewide Mandatory Source Separation and Recycling Act, respectively, and pursuant to N.J.A.C. 7:26A-1 et seq., known as the Recycling Regulations, this approval is hereby issued to:

Clean Earth of Carteret, Inc.

Facility Type:	Recycling Center for Class B Materials
Lot No.:	3.02
Block No.:	1
Municipality:	Borough of Carteret
County:	Middlesex
Facility ID No.:	132310
Permit No.:	CBG100002

This General Approval is subject to compliance with all conditions specified herein and all regulations promulgated by the Department of Environmental Protection (Department).

This General Approval shall not prejudice any claim the State may have to riparian land nor does it allow the registrant to fill or alter, or allow to be filled or altered, in any way, lands that are deemed to be riparian, wetlands, stream encroachment or flood plains, or within the Coastal Area Facility Review Act (CAFRA) zone or are subject to the Pinelands Protection Act of 1979, nor shall it allow the discharge of pollutants to waters of this State without prior acquisition of the necessary grants, permits, or approvals from the Department of Environmental Protection.

March 7, 2007

Issuance Date

Anthony Fontana, Chief
Bureau of Transfer Stations and
Recycling Facilities

May 12, 2010

Modification Date

March 7, 2012

Expiration Date

Scope of Approval

This General Approval (approval), along with the referenced application documents herein specified, shall constitute the sole approval of Recycling Center operations for Class B Recyclable Material (petroleum contaminated soil, street sweepings, brick, block, concrete, stone, rock, and asphalt) by Clean Earth of Carteret, Inc. located in the Borough of Carteret, Middlesex County, New Jersey. Any registration, approval or permit previously issued by the Solid and Hazardous Waste Management Program, or its predecessor agencies, for the specific activities as described below and as conditioned herein, is hereby superseded.

This approval is a modification of the General Approval issued on March 7, 2007.

May 12, 2010 This modification allows Clean Earth of Carteret, Inc to receive, process/treat (inside the building) and transfer source separated recyclable materials 24 hours per day, 7 days per week. However, the operation of the Crusher is limited to: Monday through Friday, from 7:00 a.m. to 7:00 p.m., and Saturdays from 7:00 a.m. to 4:00 p.m.

Regulated Activities at the Facility

Items 1 through 39 of this approval contain the general conditions applicable to all recycling centers. Items 40 through 88 of this approval contain the general operating requirements for all recycling centers that receive, store, process, or transfer Class B recyclable materials including non-hazardous petroleum contaminated soils. Items 89 through 92 of this approval are the sampling requirements for testing the street sweepings.

Items 93 through 102 and 103 through 112 of this approval contain the conditions for Phase 1 & 2 of the aggregate crushing operations, respectively. In Phases 1 & 2 of the crushing operations, Clean Earth of Carteret, Inc. will be producing a dense grade aggregate (DGA) in support of the proposed Reichold Chemical remedial capping project for the site that is being completed under an ISRA Site Remedial Action Workplan. To accommodate the construction of the cap, two temporary phases are needed which allows the crushing operations and temporary stockpile areas to be moved within the site.

Items 113 through 120 of this approval contain the conditions for the Final Phase of the aggregate crushing operations. The Final Phase of the crushing operations allows Clean Earth of Carteret, Inc, to continue to accept and process these Class B materials on a permanent basis and marketing the end product offsite.

Facility Description

The recycling center is a Class B facility owned and operated by Clean Earth of Carteret, Inc. The recycling center is located at 24 Middlesex Avenue on Block 1, Lot 3.02, in Borough of Carteret, Middlesex County. This regional recycling center receives petroleum-contaminated soil from soil remediation contractors and street sweepings from municipalities. The recycling center is authorized to accept petroleum-contaminated soil and street sweepings Monday through Sunday and to process petroleum contaminated soil within their building Monday through Sunday. The recycling center is authorized to receive and transfer brick, block, concrete, stone,

rock, and asphalt Monday through Sunday, but limited in crushing/processing these materials to Monday through Friday from 7:00 a.m. to 7:00 p.m., and Saturdays from 7:00 a.m. to 4:00 p.m..

The recycling center is also utilized for finished product storage and equipment storage as shown on the site plan. The recycling center markets clean soil and DGA from the site.

Approved General Approval Application and Associated Documents

The registrant shall construct and operate the facility in accordance with N.J.A.C. 7:26A-1 *et seq.*, the conditions of this Approval, and the following documents:

- a) Site plan: Sheets SP1 and A1, prepared by Leonard Busch Associates, signed and sealed by Leonard Busch, P.E., NJ License No. 9531, dated October 13, 2000.
- b) S.D.&G. Aggregates, Inc., Application for Recycling Center General Approval, prepared by AJV Engineering, signed by Angelo J. Valetutto, P.E., dated March 1, 1996.
- c) S.D.&G. Aggregates, Inc., Addendum to the March 1, 1996 recycling center application, prepared by AJV Engineering, signed by Angelo J. Valetutto, P.E., dated April 17, 1996.
- d) S.D.&G. Aggregates, Inc., Submission of Middlesex County Board of Chosen Freeholders Solid Waste Plan Amendment Resolution, prepared by AJV Engineering, signed by Angelo J. Valetutto, P.E., dated August 16, 1996.
- e) S.D.&G. Aggregates, Inc., Submission of Waterfront Development Permit, prepared by AJV Engineering, signed by Angelo J. Valetutto, P.E., dated September 3, 1996.
- f) S.D.&G. Aggregates, Inc., Submittal of revised site plan and calculations, prepared by AJV Engineering, signed by Angelo J. Valetutto, P.E., dated November 14, 1996.
- g) S.D.&G. Aggregates, Inc., Modification request, prepared by AJV Engineering, signed by Angelo J. Valetutto, P.E., dated February 12, 1997.
- h) S.D.&G. Aggregates, Inc., Response to technical requirements for contaminated soils, prepared by S.D.&G. Aggregates, Inc., signed by Michael Goebner, President, Carteret Biocycle Corporation, dated October 23, 1997.
- i) S.D.&G. Aggregates, Inc., Modification request, prepared by S.D.&G. Aggregates, Inc., signed by Michael Goebner, President, Carteret Biocycle Corporation, dated October 29, 1997.
- j) S.D.&G. Aggregates, Inc., Submittal of new site plan, prepared by S.D.&G. Aggregates, Inc., signed by Michael Goebner, President, Carteret Biocycle Corporation, dated October 29, 1997.
- k) S.D.&G. Aggregates, Inc., Request for modification of sampling requirements, signed

by Michael Goebner, President, Carteret Biocycle Corporation, dated April 19, 1999.

- l) S.D.&G. Aggregates, Inc., Request for modification of sampling requirements, signed by Michael Goebner, President, Carteret Biocycle Corporation, dated December 29, 1999.
- m) S.D.&G. Aggregates, Inc., Request for acceptance of street sweepings, signed by Michael Goebner, President, Carteret Biocycle Corporation, dated March 15, 2000.
- n) S.D.&G. Aggregates, Inc., Request for site plan modification, signed by Michael Goebner, President, Carteret Biocycle Corporation, dated October 24, 2000.
- o) S.D.&G. Aggregates, Inc., Submittal of additional information, signed by Michael Goebner, President, Carteret Biocycle Corporation, dated April 19, 2001.
- p) S.D.&G. Aggregates, Inc., Request for renewal, prepared and signed by Michael D. Logan, Vice President, Compliance Plus Services, dated October 17, 2001.
- q) Clean Earth of Carteret, Request for transfer of ownership, prepared and signed by Michael D. Logan, Vice President, Compliance Plus Services, dated November 20, 2002.
- r) Clean Earth of Carteret, Request for increase in daily capacity, prepared and signed by Michael Goebner, Vice President, dated January 2, 2003.
- s) Clean Earth of Carteret, Submittal of signed transfer agreement, prepared and signed by Michael D. Logan, Vice President, Compliance Plus Services, dated May 22, 2003.
- t) Clean Earth of Carteret, Submittal of county plan amendment, prepared and signed by Michael D. Logan, Vice President, Compliance Plus Services, dated May 30, 2003.
- u) Clean Earth of Carteret, Request for corrections to approval, prepared and signed by Michael D. Logan, Vice President, Compliance Plus Services, dated August 25, 2003.
- v) Clean Earth of Carteret, Inc., Request for renewal, prepared and signed by Michael D. Logan, Vice President, Compliance Plus Services, dated September 28, 2006.
- w) Plan entitled "Floor Plan of Existing Soil Processing Building", prepared by Leonard Busch, P.E., of Leonard Busch Associates, dated February 2, 2005 and last revised March 23, 2006.
- x) Clean Earth of Carteret, Inc., Request to utilize cement kiln dust or lime as a drying agent to remove moisture from its treated soils, prepared and signed by Michael D. Logan, Vice President, Compliance Plus Services, dated December 27, 2006.
- y) Class B Recycling Center Permit Application, dated February 2006, prepared by Compliance Plus Services, Inc.
- z) Class B Recycling Limited Approval Checklist, dated March 2008, prepared by

Compliance Plus Services, Inc.

- aa) Updated Information Submission, dated October 14, 2008, prepared by Compliance Plus Services, Inc.
- bb) Proposed Features: drawing No. 009, latest revision dated October 10, 2008, prepared by EarthRes Group, Inc., signed and sealed by Thomas G. Pullar, P.E., NJ License No. 24GE03095500.
- cc) Existing Features: drawing No. 001, dated August 19, 2005, prepared by EarthRes Group, Inc., signed and sealed by Thomas G. Pullar, P.E., NJ License No. 24GE03095500.
- dd) Details: drawing No. 003, latest revision dated January 17, 2006, prepared by EarthRes Group, Inc., signed and sealed by Thomas G. Pullar, P.E., NJ License No. 24GE03095500.
- ee) Limited Class B Operations Plan Phase 1: drawing No. 014, latest revision dated March 24, 2008, prepared by EarthRes Group, Inc., signed and sealed by Thomas G. Pullar, P.E., NJ License No. 24GE03095500.
- ff) Limited Class B Operations Plan Phase 2: drawing No. 015, latest revision dated March 24, 2008, prepared by EarthRes Group, Inc., signed and sealed by Thomas G. Pullar, P.E., NJ License No. 24GE03095500.
- gg) Addendum to Ground Lease (3rd Lease), dated December 19, 2008, submitted via cover letter by Compliance Plus Services, Inc.
- hh) Letter dated May 4, 2010, submitted by Averil Rance, VP of Environmental, Health and Safety, Clean Earth of Carteret, Inc., requesting changes in their hours of operation including supporting documentation.

In case of conflict, the provisions of N.J.A.C. 7:26A-1 *et seq.* shall have precedence over the conditions of this Approval, and the conditions of this Approval shall have precedence over plans and specifications listed above.

CLEAN EARTH/CARTERET
132310 CBG100002 Class B Recycling Ctr General Apprv -Modification
Requirements Report

Subject Item: PI 132310 -

1. All persons issued a general approval to operate a recycling center for Class B, Class C and/or Class D recyclable material pursuant to N.J.A.C. 7:26A-1 et seq. shall comply with all conditions of the approval [N.J.A.C. 7:26A-3.1(a)]
2. The holder of this general approval shall prominently post and maintain a legible sign, at or near the entrance to the recycling center, indicating that the recycling center is an approved New Jersey Department of Environmental Protection recycling center. The sign shall also indicate the following: Hours of operation of the recycling center; Listing of the source separated materials to be received; The size, weight, or other restrictions regarding materials to be received; The maximum amount of contaminants allowed in each load; Warning that loads will be inspected and will be barred from offloading if the contaminant level is exceeded; and Notice that the person offloading shall certify the amount of material per load, municipality of origin of the material and any other information contained on the Recyclable Material Receipt Form [N.J.A.C. 7:26A-3.5(f)]
3. Application for renewal of this general approval shall be submitted at least three months prior to expiration of the current approval and shall comply with all requirements for renewal set forth in N.J.A.C. 7:26A-3.6 et seq. One copy of the application for renewal of the general approval shall be submitted by the applicant to the municipal clerk of the municipality in which the recycling center is located, and to the solid waste or recycling coordinator of the county in which the recycling center is located [N.J.A.C. 7:26A-3.6(a)]
4. The applicant for renewal of this general approval shall certify in writing to the Department that there have been no changes in the operations of the recycling center since the issuance of the general approval in order to renew the approval in its existing form. In the event that there have been changes in the operations of the recycling center or where changes are planned, the application for renewal of a general approval shall be accompanied by a written request to modify the general approval in accordance with N.J.A.C. 7:26A-3.10 [N.J.A.C. 7:26A-3.6(b)]
5. In a case where the holder of this general approval does not comply with N.J.A.C. 7:26A-3.6(a) and (b) and continues to operate without renewal of the general approval, the Department may take enforcement action including the assessment of penalties under N.J.S.A. 13:1E-9; require the holder of this general approval to file an application as a new applicant for a general approval in accordance with N.J.A.C. 7:26A-3.2 and pay the application fee as per N.J.A.C. 7:26A-2; and/or take any other appropriate actions [N.J.A.C. 7:26A-3.6(c)]
6. All persons granted a renewal pursuant to N.J.A.C. 7:26A-3.6(d) shall continue to pay the annual fee as specified in N.J.A.C. 7:26A-2 [N.J.A.C. 7:26A-3.6(h)]
7. The holder of this general approval shall obtain prior approval from the Department for any modification of the general approval [N.J.A.C. 7:26A-3.10(a)]
8. Any change affecting the conditions of this general approval requires the prior approval of the Department [N.J.A.C. 7:26A-3.10(b)1]
9. Any change to the information submitted pursuant to N.J.A.C. 7:26A-3.2(a), 3.4, 3.8, 3.18, 3.19 and 3.20 requires the prior approval of the Department, except that changes in end-market information submitted pursuant to N.J.A.C. 7:26A-3.2(a) 7 shall not require the prior approval of the Department but shall be handled in accordance with N.J.A.C. 7:26A-3.10(f). [N.J.A.C. 7:26A-3.10(b)2]

CLEAN EARTH/CARTERET
132310 CBG100002 Class B Recycling Ctr General Apprv -Modification
Requirements Report

Subject Item: PI 132310 -

10. The holder of this general approval shall notify the Department in writing of the intended modification and shall update the information submitted pursuant to N.J.A.C. 7:26A-3.2(a), 3.4, 3.8, 3.18, 3.19 or 3.20. The holder of this general approval shall also provide written notice to the solid waste or recycling coordinator of the applicable county of any request to modify a general approval. [N.J.A.C. 7:26A-3.10(c)]
11. The holder of this general approval shall not institute the modification until it receives written approval from the Department [N.J.A.C. 7:26A-3.10(e)]
12. Within one week of any change to the end-market information submitted to the Department pursuant to N.J.A.C. 7:26A-3.2(a)7, the holder of this general approval shall submit to the Department a written notification which details any change in the use of the recyclable material transferred from the recycling center to an end-market or in the end-market location to which the recyclable material is transferred. The written notification shall be sent to: New Jersey Department of Environmental Protection, Solid and Hazardous Waste Management Program, Bureau of Transfer Stations and Recycling Facilities, P.O. Box 414, Trenton, New Jersey 08625-0414. [N.J.A.C. 7:26A-3.10(f)]
13. The Department may revoke this general approval upon a determination that the holder of the general approval has violated any provision of N.J.S.A. 13:1E-1 et seq., the New Jersey Statewide Mandatory Source Separation and Recycling Act, or any rule, regulation or administrative order promulgated pursuant to N.J.S.A. 13:1E-1 et seq. and the New Jersey Statewide Mandatory Source Separation and Recycling Act [N.J.A.C. 7:26A-3.13(a)1]
14. The Department may revoke this general approval upon a determination that the holder of the general approval has violated any solid waste utility law at N.J.S.A. 48:2-1 et seq. or 48:13A-1 et seq., or any rule, regulation or administrative order promulgated pursuant to N.J.S.A. 48:2-1 et seq. or 48:13A-1 et seq [N.J.A.C. 7:26A-3.13(a)2]
15. The Department may revoke this general approval upon a determination that the holder of the general approval has violated any provision of any laws related to pollution of the waters, air or land surfaces of the State or of any other State or Federal environmental laws including criminal laws related to environmental protection [N.J.A.C. 7:26A-3.13(a)3]
16. The Department may revoke this general approval upon a determination that the holder of the general approval has refused or failed to comply with any lawful order of the Department [N.J.A.C. 7:26A-3.13(a)4]
17. The Department may revoke this general approval upon a determination that the holder of the general approval has failed to comply with any of the conditions of this general approval issued by the Department [N.J.A.C. 7:26A-3.13(a)5]
18. The Department may revoke this general approval upon a determination that the holder of the general approval has transferred a general approval to a new owner or operator pursuant to N.J.A.C. 7:26A-3.15 without the prior approval of the Department [N.J.A.C. 7:26A-3.13(a)6]
19. The Department may revoke this general approval upon a determination that the holder of the general approval has failed to obtain any required permit or approval from the Department or other State or Federal agency [N.J.A.C. 7:26A-3.13(a)7]
20. The Department may revoke this general approval upon a determination that the holder of the general approval has committed any of the acts which are criteria for denial of a general approval set forth in N.J.A.C. 7:26A-3.12. [N.J.A.C. 7:26A-3.13(a)8]

Subject Item: PI 132310 -

21. This general approval shall not be transferred to a new owner or operator without the Department's prior approval [N.J.A.C. 7:26A-3.15(a)]
22. A written request for permission to allow a transfer of this general approval must be received by the Department at least 60 days in advance of the proposed transfer of ownership or operational control of the recycling center. The request for approval shall include the following: the name, address and social security number of all prospective new owners or operators; a written certification by the proposed transferee that the terms and conditions contained in the general approval will be met by the proposed transferee; and a written agreement between the current owner or operator of the recycling center and the proposed new owner or operator containing a specific future date for transfer of ownership or operational control [N.J.A.C. 7:26A-3.15(a)1]
23. A new owner or operator may commence operations at the recycling center only after the existing approval has been revoked and a new approval is issued to the new owner or operator pursuant to N.J.A.C. 7:26A-3.5 [N.J.A.C. 7:26A-3.15(a)2]
24. The holder of this general approval remains liable for ensuring compliance with all conditions of the approval unless and until the existing approval is revoked and a new approval is issued to the new owner or operator pursuant to N.J.A.C. 7:26A-3.5 [N.J.A.C. 7:26A-3.15(a)3]
25. Compliance with the transfer requirements set forth at N.J.A.C. 7:26A-3.15 shall not relieve the holder of this general approval from the separate responsibility of providing notice of such transfer pursuant to the requirements of any other statutory or regulatory provision [N.J.A.C. 7:26A-3.15(a)4]
26. The transfer of a controlling interest in the stock or assets of the recycling center that is the subject of this general approval shall constitute a transfer of this general approval [N.J.A.C. 7:26A-3.15(b)]
27. The holder of this general approval shall maintain a daily record of the amounts of each recyclable material by type and municipality of origin which are received, stored, processed or transferred each day, expressed in tons, cubic yards, cubic feet or gallons. Those operators specifying this information in cubic yards shall also indicate the conversion ratio of the materials from cubic yards to tons [N.J.A.C. 7:26A-3.17(a)1]
28. The holder of this general approval shall maintain a daily record of the name, address and telephone number of the end-markets for all recyclable materials transported from the recycling center, including the amounts, in tons, cubic yards, cubic feet or gallons, transported to each end-market. Those persons specifying this information in cubic yards shall also indicate the conversion ratio of the materials from cubic yards to tons [N.J.A.C. 7:26A-3.17(a)2]
29. The holder of this general approval shall maintain a daily record of the amount of residue disposed of, expressed in tons, cubic yards, cubic feet or gallons, including the name and New Jersey Department of Environmental Protection solid waste registration number of the solid waste collector/hauler contracted to provide the haulage/disposal service. Those persons specifying the amount of residue in cubic yards shall also indicate the conversion ratio of the residue from cubic yards to tons. [N.J.A.C. 7:26A-3.17(a)3]
30. The holder of this general approval shall retain all Recyclable Material Receipt Forms required pursuant to N.J.A.C. 7:26A-3.2(a)16iii for three calendar years following the calendar year for which an annual report is required pursuant to N.J.A.C. 7:26A-3.17(c) [N.J.A.C. 7:26A-3.17(b)]

CLEAN EARTH/CARTERET

Requirements Report

Subject Item: PI 132310 -

31. The holder of this general approval shall submit an annual report containing monthly summary statements of the information required pursuant to N.J.A.C. 7:26A-3.17(a) to the New Jersey Department of Environmental Protection, Solid and Hazardous Waste Management Program, on or before March 1 of each year, for the previous calendar year. The summaries shall include the following: monthly totals of the amount of recyclable material received from each customer by municipality of origin; monthly totals of the amount of recyclable product transferred to each end-market; and the amount of residue disposed of during each month. [N.J.A.C. 7:26A-3.17(c)]
32. The holder of this general approval shall certify in writing to the Department that all residue generated at the recycling center has been disposed of in accordance with the solid waste management rules at N.J.A.C. 7:26. The certification shall be submitted annually as part of the annual report [N.J.A.C. 7:26A-3.17(e)]
33. All information submitted to the Department pursuant N.J.A.C. 7:26A shall be handled in accordance with the requirements of the Public Records law, N.J.S.A. 47:1-1 et seq. The Department will hold confidential all end-market information, as well as information pertaining to the municipality of origin of recyclable material, submitted pursuant to N.J.A.C 7:26A-3.2, 3.7, and 3.17 through 3.20 for a period of two years from the date on which the information is submitted to the Department, where specified as confidential by the applicant and where there are no health, safety or environmental concerns which require the release of the information, as determined by the Department. [N.J.A.C. 7:26A-3.17(f)]
34. The holder of this general approval shall provide a recycling tonnage report by March 1 of each year to all municipalities from which recyclable material is received in the previous calendar year. The report shall detail the amount of each source separated recyclable material, expressed in tons or cubic yards, brought to the recycling center, as well as the date on which the recyclable materials were delivered to the recycling center. Those persons specifying this information in cubic yards shall also indicate the conversion ratio of the materials from cubic yards to tons. [N.J.A.C. 7:26A-4.4(a)]
35. The recycling center shall not commence operations unless and until it is included in the applicable district solid waste management plan [N.J.A.C. 7:26A-4.2]
36. The construction of the recycling center that is the subject of this general approval shall be in conformance with the New Jersey Uniform Construction Code, N.J.S.A. 52:27D-119 et seq., and the rules promulgated pursuant thereto [N.J.A.C. 7:26A-4.1(b)]
37. The New Jersey Department of Environmental Protection or an authorized representative acting pursuant to the County Environmental Health Act, N.J.S.A. 26:3A2-1 et seq. shall have the right to enter and inspect any building or other portion of the recycling center at any time in order to determine compliance with the provisions of all applicable laws or rules and regulations adopted pursuant thereto. This right to inspect includes, but is not limited to: sampling any materials on site; photographing any portion of the recycling center; investigating an actual or suspected source of pollution of the environment; and, ascertaining compliance or non-compliance with the statutes, rules or regulations of the Department, including conditions of the recycling center approval issued by the Department. [N.J.A.C. 7:26-1.7(a)]
38. The right of entry specified at N.J.A.C. 7:26A-1.7(a) shall be limited to normal operating hours for the purpose of reviewing and copying all applicable records, which shall be made available to the Department during an inspection and submitted to the Department upon request. [N.J.A.C. 7:26-1.7(b)]

Requirements Report

Subject Item: PI 132310 -

39. The facility shall comply with the general operating requirements for all Recycling Centers as provided at N.J.A.C. 7:26A-4.1 [N.J.A.C. 7:26A-4]
-

Subject Item: RCBG139162 - General Class B & Soil Conditions

40. Recycling centers receiving petroleum contaminated soil, a preparedness and prevention plan and the contingency plan contained in the approved documents must be maintained on-site and updated as necessary. [N.J.A.C. 7:26A-3.5(e)]
41. The preparedness and prevention plan and the contingency plan contained in the approved documents must be maintained on-site and updated as necessary. [N.J.A.C. 7:26A-3.5(e)]
42. Upon detection of a release of contaminants to the environment, the facility shall perform the following cleanup steps: stop the release, contain the released contaminants, clean up and manage properly the released contaminants and other materials and if necessary, repair or replace any leaking soil containment systems prior to returning them to service. [N.J.A.C. 7:26A-3.5(e)]
43. Upon closure of the facility the owner or operator shall remove or decontaminate petroleum contaminated soils, containment system components, and structures and equipment and manage them as hazardous waste, unless the materials are not hazardous waste under NJAC 7:26G-5. [N.J.A.C. 7:26A-3.5(e)]
44. All equipment and portions of the facility designated for the storage or processing of petroleum contaminated soils shall be visually inspected each operating day for integrity and leaks. [N.J.A.C. 7:26A-3.5(e)]
45. Records shall be maintained for all visual inspections. These records shall document that inspections were performed, any problems found, and the subsequent correction of such problems. All records shall be kept for a minimum of three years. [N.J.A.C. 7:26A-3.5(e)]
46. The facility shall keep a record of each shipment of petroleum contaminated soil accepted for processing. These records may take the form of a log, invoice, manifest, bill of lading or other shipping documents. All tracking records must be kept for a minimum of three years. Records for each shipment shall include the following information: the name and address of the transporter who delivered the soil to the facility, the name and address of the generator from whom the soil was sent, the NJDEP registration number of the transporter, EPA ID number (if applicable) of the generator, the quantity of soil accepted and the date of acceptance. [N.J.A.C. 7:26A-3.5(e)]
47. The facility shall maintain on-site a written operating record showing analysis records, tracking records, and summary reports of incidents requiring implementation of the contingency plan. This information shall be made available to Department personnel upon request and shall be kept for a minimum of three years. [N.J.A.C. 7:26A-3.5(e)]

CLEAN EARTH/CARTERET
132310 CBG100002 Class B Recycling Ctr General Apprv -Modification
Requirements Report

Subject Item: RCBG139162 - General Class B & Soil Conditions

48. The following source separated Class B recyclable materials, which have been separated at the point of generation from other waste materials or separated at a permitted solid waste facility authorized to separate recyclable materials, may be received, stored, processed or transferred at this recycling center: NJDOT street sweepings (that meet NJ Non-Residential Direct Contact Soil Cleanup Criteria) and non-hazardous petroleum contaminated soils which otherwise would be ID 27 if not recycled. Only soil contaminated with the following compounds shall be accepted and processed at this facility: gasoline, kerosene, jet fuel, Numbers 1 through 6 fuel oil, and used oil. Used oil shall be defined as any oil that has been refined from crude oil, or any synthetic oil, that has been used and as a result of such use is contaminated by physical or chemical impurities. No soils may be accepted that have been contaminated with materials that are other waste materials, or waste by-products, such as sludges. No soils with free petroleum product or other liquids, as determined by USEPA SW-846, Method 9095, Chapter 6.0, shall be accepted at the facility. No hazardous waste, as defined by N.J.A.C. 7:26G-5, shall be accepted by the facility. [N.J.A.C. 7:26A-3.5(e)]
49. At no time shall the receipt, storage, processing, or transferring of non-source separated construction and demolition material be allowed at this recycling center. The prohibition of this material shall be strictly enforced and any incident shall be considered a serious violation to the conditions of this Approval. [N.J.A.C. 7:26A-3.5(e)]
50. The recycling center may not receive, store, process, or transfer source separated petroleum contaminated soils and NJDOT street sweepings with any other Class B recyclable materials. The commingling of petroleum contaminated soil and NJDOT street sweepings shall only be allowed after the testing requirements identified in this approval have been met. The commingling of any other materials not described above is prohibited. [N.J.A.C. 7:26A-3.5(e)]
51. The maximum amount of contaminants, as defined in N.J.A.C. 7:26A-1.3, allowed in each incoming load of Class B recyclable material shall be limited to 1% by volume. Incidental by-product materials shall not be considered to be contaminants. [N.J.A.C. 7:26A-3.5(e)]
52. Incidental amounts of rebar, metal, soil, and other by-products which adhere to the Class B recyclable materials, as specified in this Approval, and which are returned to the economic mainstream as raw material or products, may be received, stored, processed, or transferred at this recycling center. The receipt of such incidental amounts of these materials need not be separately accounted for, but the storage and end-markets for these materials shall be subject to specific conditions of this Approval. [N.J.A.C. 7:26A-3.5(e)]
53. The holder of this general approval shall operate the recycling center and construct or install associated appurtenances thereto, in accordance with the provisions of N.J.A.C. 7:26A-1 et seq., the conditions of this general approval, and the general approval application documents. [N.J.A.C. 7:26A-3.5(e)]
54. In case of conflict, the conditions of this approval shall have precedence over the general approval application documents, and the most recent revisions and supplemental information approved by the Department shall prevail over prior submittals and designs. [N.J.A.C. 7:26A-3.5(e)]
55. One complete set of the general approval application documents, this general approval, and all records, reports and plans as may be required pursuant to this approval shall be kept on file at the recycling center and shall be available for inspection by authorized representatives of the Department or delegated agents upon presentation of credentials. [N.J.A.C. 7:26A-3.5(e)]

CLEAN EARTH/CARTERET
132310 CBG100002 Class B Recycling Ctr General Apprv -Modification
Requirements Report

Subject Item: RCBG139162 - General Class B & Soil Conditions

56. Hours of operation for the receipt, treatment/processing (inside the building) and transferring source separated recyclable material can occur 24 hours per day, 7 days per week; the operation of the Crusher shall be limited to: 7:00 a.m. to 7:00 p.m., Monday through Friday and Saturdays from 7:00 a.m. to 4:00 p.m. [N.J.A.C. 7:26A-3.5(e)]
57. Material deliveries to the recycling center shall be scheduled in such a manner as to minimize truck queuing on the recycling center property. Under no circumstances shall delivery trucks be allowed to back-up or queue onto public roads. [N.J.A.C. 7:26A-3.5(e)]
58. The recycling center may receive no more than 2,700 tons per day of petroleum contaminated soils and street sweepings. This condition is contingent upon the traffic on the public roads adjacent to the facility not being adversely affected. Should the traffic be impacted by the facility, the Department reserves the right to reduce the capacity of the facility. [N.J.A.C. 7:26A-3.5(e)]
59. The total amount of unprocessed/processed soil material stored in the "soil storage warehouse" shall not exceed 18,287 cubic yards. Materials stored in the "soil storage warehouse" shall be stored only in those areas designated for that purpose as indicated on the approved site plan drawing. "Area D" on the approved site plan may be used to store either unprocessed or processed soils. However, unprocessed and processed soils shall not be stored in "Area D" at the same time. "Area E" on the approved site plan may be used for soil mixing prior to introducing the unprocessed soil to the processing equipment. "Area E" shall not be used for the storage of material. [N.J.A.C. 7:26A-3.5(e)]
60. If at any time, the amount of soil material stored inside the building exceeds 18,287 cubic yards, the recycling center shall immediately cease receiving any unprocessed material until the amount of material stored inside on-site falls below 18,287 cubic yards. [N.J.A.C. 7:26A-3.5(e)]
61. Unprocessed recyclable material shall not remain on-site, in its unprocessed form, for more than one (1) year. [N.J.A.C. 7:26A-3.9(b)]
62. The total amount of processed soil materials stored outside shall not exceed 31,674 cubic yards. Processed material shall be stored only in those areas designated for that purpose as indicated on the approved site plan drawings. [N.J.A.C. 7:26A-3.5(e)]
63. If at any time, the amount of processed soil material stored on-site exceeds 31,674 cubic yards, the recycling center shall immediately cease processing activities until the amount of processed material falls below 31,674 cubic yards. [N.J.A.C. 7:26A-3.5(e)]
64. All processed material shall be stored separately from residues. [N.J.A.C. 7:26A-3.5(e)]
65. By-products shall be stored in the container(s) or area(s) as depicted on the approved site plan and shall be removed off-site to the end markets as referenced in the approved documents. [N.J.A.C. 7:26A-3.5(e)]
66. Horizontal and vertical control points for the unprocessed and processed materials soil stockpile areas shall be set and maintained on-site. Horizontal limitation markers shall be set at the corners of the stockpile areas as depicted on the approved site plan. Vertical limitation markers shall be set at locations in close proximity of the stockpile areas and shall clearly establish elevation height of 18 feet above the existing grade for the stockpile areas located inside the building and 25 feet above the existing grade for the processed stockpile areas located outside. [N.J.A.C. 7:26A-3.5(e)]
67. Ingress and egress of the facility shall be restricted to Middlesex Avenue only. [N.J.A.C. 7:26A-3.5(e)]

CLEAN EARTH/CARTERET
132310 CBG100002 Class B Recycling Ctr General Apprv -Modification
Requirements Report

Subject Item: RCBG139162 - General Class B & Soil Conditions

68. Metal pipe or metal rods or the equivalent as approved by the Department shall be used to establish these control points. [N.J.A.C. 7:26A-3.5(e)]
69. Methods of effectively controlling dust shall be implemented at the facility in order to prevent offsite migration. [N.J.A.C. 7:26A-3.5(e)]
70. Any suspected or prohibited hazardous waste, as defined at N.J.A.C. 7:26G-5, found in a load accepted at the recycling center shall not be returned to the generator. Such materials shall be segregated and stored in a secure manner and shall be immediately reported to the N.J.D.E.P. Environmental Action Hotline at 1-877-927-6337. The owner/operator of the recycling center shall secure the name of the collector/hauler suspected of delivering such waste to the facility and related information surrounding the incident, if available, and shall make this information known to the Department's enforcement personnel. [N.J.A.C. 7:26A-3.5(e)]
71. Fire fighting and emergency procedures shall be posted, and shall include the telephone numbers of local fire, police, ambulance, and hospital facilities. If a fire occurs on-site, the facility shall immediately notify the local fire official and the N.J.D.E.P. Environmental Action Hotline at 1-877-927-6337. [N.J.A.C. 7:26A-3.5(e)]
72. All revisions to the site plan and the approved documents which may be required as a result of the above, shall be submitted to this office for modification to this Approval. [N.J.A.C. 7:26A-3.5(e)]
73. Pursuant to N.J.A.C. 7:26A-3.11(a), the holder of this general approval shall obtain prior approval from the Department for any increase in the design capacity of the facility. The facility shall submit a request to the Department, in writing, for the proposed increase and shall submit updated information pursuant to the requirements of N.J.A.C. 7:26A-3.2(a), 3.4, or 3.8, as applicable. The facility shall also provide written notice of the request to the solid waste or recycling coordinator of the applicable district. [N.J.A.C. 7:26A-3.5(e)]
74. The sampling plan, collection, preservation, and handling for the sampling and analysis of unprocessed contaminated soil as required in this Approval must be performed in accordance with the New Jersey Technical Requirements for Site Remediation at N.J.A.C. 7:26E and the latest edition of the New Jersey Department of Environmental Protection, Hazardous Waste Programs, Field Sampling Procedures Manual. The Technical Regulations may be purchased from West Publishing at (800) 808-WEST. The sampling manual may be purchased from: NJDEP Maps and Publications, P.O. Box 402, Trenton, N.J. 08625. All analysis must be performed by a New Jersey certified laboratory. [N.J.A.C. 7:26A-3.5(e)]
75. All soils must be tested using the most current approved test methodology in accordance with USEPA SW-846. [N.J.A.C. 7:26A-3.5(e)]
76. Petroleum contaminated soils shall be sampled either at the point of generation or at the recycling center. Soils from different generation sites shall be segregated at the facility until the sampling results are received. The sampling and analysis shall be implemented as follows: [N.J.A.C. 7:26A-3.5(e)]
77. Every 100 cubic yards of contaminated soil from each site shall be sampled and analyzed for TPH in the following manner: a representative sample from every 20 cubic yards of contaminated soil shall be taken and these five samples shall be composited into one sample and analyzed. When the volume of soil is less than 100 cubic yards, a representative sample of every 20 cubic yards, or a fraction thereof, shall be taken and these samples shall be composited into one sample and analyzed. [N.J.A.C. 7:26A-3.5(e)]

Requirements Report

Subject Item: RCBG139162 - General Class B & Soil Conditions

78. Every 800 cubic yards of contaminated soil shall be sampled and analyzed for total volatile organic compounds (VOC), in the following manner: a representative sample from every 100 cubic yards of contaminated soil shall be taken and these samples shall be composited into one sample and analyzed. When the volume of soil is less than 800 cubic yards, a representative sample of every 100 cubic yards, or fraction thereof, shall be taken and these samples shall be composited into one sample and analyzed. [N.J.A.C. 7:26A-3.5(e)]
79. The sampling results shall be used to determine the maximum contaminant feed rate or maximum contaminant concentration for the processing equipment in accordance with the Air Quality Permit and shall also demonstrate that the material is non-hazardous for the above contaminants in accordance with N.J.A.C. 7:26G-8.5. The processing equipment at the facility uses bioremediation to process petroleum contaminated soils and achieve acceptable contaminant levels for reuse. [N.J.A.C. 7:26A-3.5(e)]
80. Processed material end products, for uses other than as landfill cover material, Department approved Brownfields projects or road construction projects, shall be sampled and analyzed for total petroleum hydrocarbons (TPH), total volatile organic compounds (VOC), and all contaminants listed in the New Jersey Soil Cleanup Criteria (SCC). The sampling procedure shall be implemented as follows: Every 100 cubic yards of processed soil shall be sampled and analyzed for the above contaminants in the following manner: a representative sample from every 20 cubic yards of processed soil shall be taken and these five samples shall be composited into one sample and analyzed. [N.J.A.C. 7:26A-3.5(e)]
81. Processed material end products to be used in road construction projects shall be sampled every 1,000 cubic yards for TPH and VOC in the following manner: a representative sample from every 100 cubic yards of processed soil shall be taken and the samples shall be composited into one sample and analyzed. [N.J.A.C. 7:26A-3.5(e)]
82. Other levels of testing may be allowed on a case-by-case basis as determined by use criteria in accordance with Department guidance and regulations. Applications for case-specific testing requirements must be made to the Bureau of Transfer Stations & Recycling Facilities. [N.J.A.C. 7:26A-3.5(e)]
83. Only approved criteria shall be used to determine the allowable end use of the processed material and the maximum allowable contamination levels for use. [N.J.A.C. 7:26A-3.5(e)]
84. The maximum allowable contamination levels for unrestricted general use are 200 ppm TPH and all individual organic contaminants less than or equal to 50% and inorganic contaminants less than or equal to 75% of the most stringent direct contact soil cleanup criteria (SCC). [N.J.A.C. 7:26A-3.5(e)]
85. For soils being used as landfill cover material: the analytical requirements of the individual landfills shall be complied with. For soils being used as fill material in Brownfields projects, the requirements (including sampling frequency and analytical parameters) shall be approved by the individual Site Remediation Program case manager on a case-by-case basis. [N.J.A.C. 7:26A-3.5(e)]
86. Other levels of contamination may be allowed on a case-by-case basis as determined by use criteria and levels of contamination in accordance with Department guidance and regulations. Certificates of Authority to operate beneficial use projects pursuant to N.J.A.C. 7:26-1.7(g) must be obtained before any use of the processed material end products. [N.J.A.C. 7:26A-3.5(e)]

88. All analysis records must be kept for a minimum of three years and made available for inspection by state and local officials upon request. [N.J.A.C. 7:26A-3.5(e)]
-

Subject Item: RCBG139339 - Street Sweepings Sampling

89. Every 100 cubic yards of street sweepings from each site shall be sampled and analyzed for TPH in the following manner: a representative sample from every 20 cubic yards shall be taken and these five samples shall be composited into one sample and analyzed. When the volume is less than 100 cubic yards, a representative sample of every 20 cubic yards, or a fraction thereof, shall be taken and these samples shall be composited into one sample and analyzed. [N.J.A.C. 7:26A-3]
90. Every 800 cubic yards of street sweepings shall be sampled and analyzed for total volatile organic compounds (VOC), in the following manner: a representative sample from every 100 cubic yards shall be taken and these samples shall be composited into one sample and analyzed. When the volume is less than 800 cubic yards, a representative sample of every 100 cubic yards, or fraction thereof, shall be taken and these samples shall be composited into one sample and analyzed. [N.J.A.C. 7:26A-3]
91. The sampling results shall be used to determine the maximum contaminant feed rate or maximum contaminant concentration for the processing equipment in accordance with the Air Quality Permit and shall also demonstrate that the material is non-hazardous for the above contaminants in accordance with N.J.A.C. 7:26G-5. [N.J.A.C. 7:26A-3]
92. Unprocessed street sweepings shall be sampled either at the point of generation or at the recycling center. Street sweepings from different generation sites shall be segregated at the facility until the sampling results are received. The sampling and analysis shall be implemented as follows: [N.J.A.C. 7:26A-3]
-

Subject Item: RCBG882028 - Phase 1 Crushing Operations

93. Prior to initiating any crushing operations, as described under the three phases of this General Approval, Clean Earth of Carteret, Inc. shall submit copies of the Waterfront Development Permit and the Remedial Action Workplan to the Bureau of Transfer Stations & Recycling Facilities and to County Environmental and Waste Enforcement (300 Horizon Center, P.O. Box 407, Robbinsville, NJ 08625-0407, Attention: Brian Petitt, Central Region Supervisor). [N.J.A.C. 7:26A-3.5(e)]
94. The recycling center may receive no more than 1000 tons per day of source-separated asphalt, concrete, brick, block, rock, and stone from offsite sources. [N.J.A.C. 7:26A-3.5(e)]
95. Hours of operation for the receipt, treatment/processing (inside the building) and transferring source separated recyclable material can occur 24 hours per day, 7 days per week; the operation of the Crusher shall be limited to: 7:00 a.m. to 7:00 p.m., Monday through Friday and Saturdays from 7:00 a.m. to 4:00 p.m. [N.J.A.C. 7:26A-3.5(e)]

Commissioner

MAY 11 2010

Richard Hills, Head
County of Middlesex - Division of Solid Waste Management
100 Bayard Street, 2nd Floor
New Brunswick, NJ 08901

Dear Mr. Hills:

The Department of Environmental Protection's (Department) Solid and Hazardous Waste Management Program is in receipt of Administrative Action 005-09, submitted to the Department on May 5, 2010. Administrative Action 005-09 to the Middlesex County District Solid Waste Management Plan (County Plan) proposes County Plan inclusion of a change in operating hours for the Clean Earth of Carteret, Inc. Class B Recycling Center, located on Block 1, Lot 3.02 at 24 Middlesex Avenue in the Borough of Carteret. Specifically, Administrative Action 005-09 proposes to include the subject facility in the County Plan with operating hours (acceptance and processing of Class B recyclables) of twenty-four hours per day, Monday through Sunday.

The above noted change in operating hours will not result in any other operational changes at the subject facility, which is included in the County Plan to accept and process up to 4,000 tons per day of source-separated concrete, asphalt, brick, block, stone, and non-hazardous, petroleum-contaminated soil.

Pursuant to N.J.A.C. 7:26-6.11(b)5, the inclusion of a modification of an existing facility, including a change in operating hours, can be accomplished via an administrative action. In summary, the County Plan inclusion of a change in operating hours for the Clean Earth of Carteret, Inc. Class B Recycling Center in the Borough of Carteret is hereby approved as an administrative action pursuant to N.J.A.C. 7:26-6.11(f).

Please be advised that this approval of Administrative Action 005-09 shall not be construed as an expression of the Department's intent to issue a General Approval Modification to the subject facility for the above noted operational change.

If you have any questions relative to this matter, please contact Ross M. Hull of my staff at (609) 984-5936 or by e-mail at ross.hull@dep.state.nj.us.

Sincerely,

A handwritten signature in cursive script that reads "Guy J. Watson".

Guy J. Watson, Chief
Bureau of Recycling and Planning

**Non Hazardous
Profile Sheet**

Global Job # _____
Sales Rep _____

C. Waste Composition/Characteristics (continued)

11. The waste represented in this profile is generated as a result of the corrective response taken under the Federal Underground Storage Tank Regulation 40 CFR 280.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
12. Is the waste a dioxin bearing waste?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
13. Is this waste a treatment residue from a previously listed or characteristic hazardous waste?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
14. Is there a nuisance level of odor associated with this waste?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
15. Are there any special handling instructions for management of this waste?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
16. If yes to any of the questions numbered 6-15, please explain (attach an additional sheet if necessary): _____ _____ _____	

D. Generator Certification

1. I certify that the waste represented by this profile is not a listed hazardous waste, nor does it contain a listed hazardous waste, nor does it exhibit any characteristics of a hazardous waste as defined by 40 CFR 261.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2. I certify that this waste profile and all attachments contain true and accurate descriptions of the waste material.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
3. I certify that all relevant information in possession of the Generator pertaining to known or suspected hazards with regard to the waste has been disclosed to Clean Earth.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
4. I certify that all changes that occur in the characteristics of the waste will be identified by the Generator and disclosed to Clean Earth prior to providing the waste to Clean Earth.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
5. I certify that the analytical data attached hereto are derived from testing representative sample(s) as referenced in 40 CFR 261.20 or an equivalent state regulatory provision.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> N/A
6. For sites that contain "clean fill," the undersigned certifies that a site investigation was conducted and that the soil was characterized according to the proposed Clean Earth facility(s) acceptance criteria for soil classification as "clean fill" and where applicable in accordance with the Pennsylvania Management of Fill Policy.	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A
7. The undersigned has determined the non-hazardous status of the said waste in accordance with 40 CFR 261.11. Should, at any time after delivery, the material accepted by Clean Earth be found to be non-conforming to the information certified in this profile and represented by documentation attached hereto, it becomes the responsibility of the Generator/Agent to remove the waste from the designated Clean Earth facility within five (5) days of notification. Notification is to be verbal followed by written notification, overnight receipted. It is the Generator's/ Agent's responsibility to abide by all Federal, State and Local regulations associated with the removal of their waste. If the waste is not removed within the specified time period, said disposal shall be arranged by a Clean Earth representative and billed to the Generator/Agent at cost plus basis. Furthermore, the Generator/Agent will be responsible for any and all cost for decontamination required by the Clean Earth facility that is related to the Generator's/Agent's material and all liability for such nonconforming waste shall revert to Generator/Agent.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

February 22, 2012

John Ewen
Innovative Recycling Technologies Inc.
690 North Queens Avenue
Lindenhurst, NY 11757

RE: Letter of Acceptance for 105 Metropolitan Avenue LLC, Brooklyn, NY 11210
Approved volume: 1200 T

Dear Mr. Ewen,

Clean Earth of Carteret (CEC) has received the analytical results performed by Alpha Analytical (Lab Number: L1111280) for the above referenced site. Based upon the review of the data and profile provided, CEC can accept the non-hazardous petroleum impacted soil being generated from the site. CEC's acceptance criteria limits us to accept only Non Hazardous petroleum (<1% by volume) impacted soils into our facility. Any soils with free petroleum product or liquids, sludge, or hazardous waste cannot be accepted.

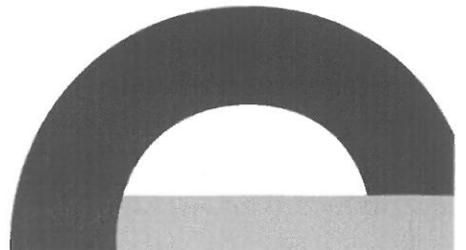

Our facility is permitted to analyze missing parameters by collecting soil samples from incoming loads. Please note that TPH analysis (every 150 Tons) will be required to comply with CEC's Class B permit. Currently, we have seven TPH analysis on file that satisfies the facility analytical requirements for approval of 1050 tons. In the essence of saving time, CEC will collect the additional TPH samples as required upon arrival at the facility to meet the CEC analytical requirements for an additional conditionally approved volume of (pending TPH results) 150 tons. CEC will amend the invoice accordingly.

If you should have any questions or require any additional information, please call me at (732) 541-8909.

Sincerely;

John Eshelman
Operations Manager

GENERATOR

APPENDIX F
VAPOR BARRIER TECHNICAL SHEETS

Bituthene® 4000

Self-adhesive HDPE waterproofing membrane with enhanced bonding characteristics for use with B2 moisture tolerant primer.

Advantages

- Cold applied - simple application to substrates especially at low temperatures.
- Suitable for application to "green" concrete - reduces programme schedules
- Moisture tolerant primer system - allows application in damp or marginal weather conditions.
- Wide application temperature range - excellent bond to self and substrate from -10°C to +35°C.
- Overlap security - enhanced-bond provides additional security.
- Cross laminated high density polyethylene carrier film - provides high tear strength, puncture and impact resistance.
- Flexible - accommodates concrete shrinkage cracks.
- Gas resistant - methane, carbon dioxide and radon gas protection in excess of the standard membrane requirements in BRE Reports 211 (radon) and 212 (methane and carbon dioxide).

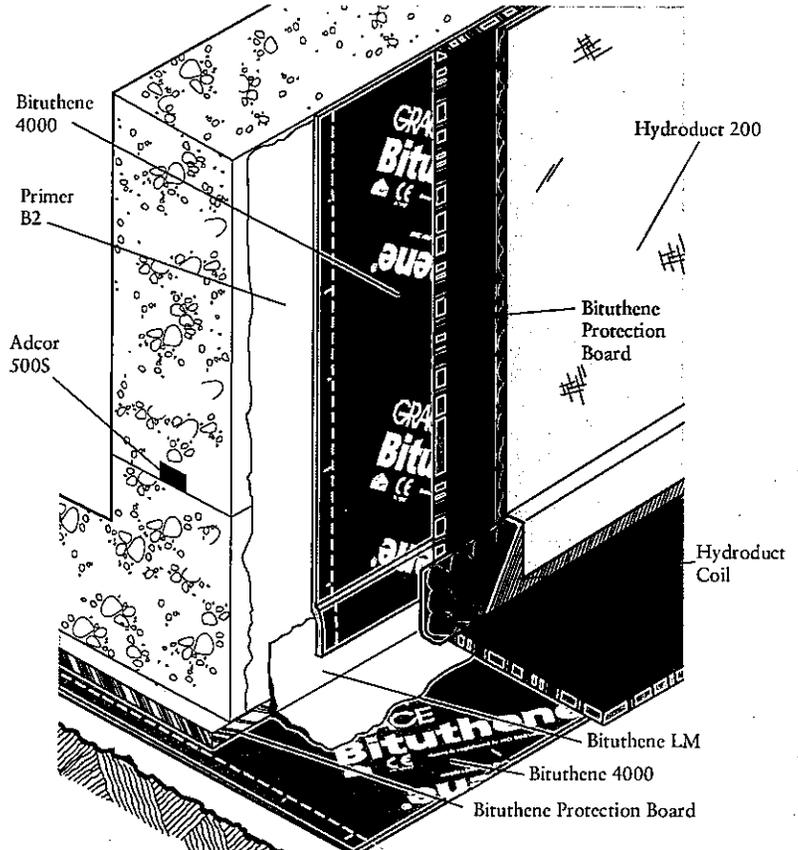

Description

Bituthene® 4000 is a flexible preformed waterproof membrane combining a high performance cross laminated, HDPE carrier film with a unique super sticky self-adhesive rubber bitumen compound.

Ancillary Products

Primer B2

Primer B2 is used to prepare vertical and sloping surfaces and suspended slabs. It is moisture tolerant and can be used on "green" concrete or damp to touch substrates.

Bituthene® LM

Waterproof continuity at angles and at penetrations is provided by Bituthene LM two component chemically curing liquid applied waterproof membrane.

Bituthene® Protection Boards

Damage from following trades and backfill is prevented by Bituthene® Protection Boards. Located with Bitustik™ 4000 double sided tape.

Details shown are typical illustrations only and not working drawings. For assistance with working drawings and additional technical advice please contact Grace Technical Services

Supply

Bituthene® 4000	1 m x 20 m roll (20 sq m) Weight 32 kg
Palletisation	15 rolls per pallet
Storage	Store upright in dry conditions below +30°C
Primer B2	5, 25 litre drums
Coverage	10 - 12 sq m per litre depending upon method of application, surface porosity and ambient temperature
Ancillary Products	
Bituthene® LM	5.7 litre packs
Bituthene®	3 mm x 1 m x 2 m
Protection Boards	
Adcor® 500S	6 x 5 m rolls
Hydroduct®	In lieu of drainage stone
Waterstops	See separate data sheet for details
Bitustik™ 4000	150 mm x 12 m roll
Lap Roller	Unit

Installation

At air temperatures below +4°C measures should be taken to ensure that all surfaces are free from ice or frost. All surfaces except those below ground bearing slabs and Preprufe® R membranes should be primed with one coat of Primer B2 applied at a rate of approx. 10m² per litre.

Bituthene 4000 shall be laid by peeling back the protective release paper and applying the adhesive face onto the prepared surface, free from ice, frost, condensation or any contaminants which could adversely effect adhesion.

Bituthene LM to be applied at all internal and external corners, penetrations etc. prior to applying the overall membrane.

Bituthene 4000 should be brushed onto the surface to ensure good initial bond and exclude air. Adjacent rolls are aligned and overlapped 50mm minimum at side and ends and well rolled with a firm pressure, using a lap roller to ensure complete adhesion and continuity between the layers. On high walls it may be necessary to batten fix the membrane to prevent slippage.

Repairs

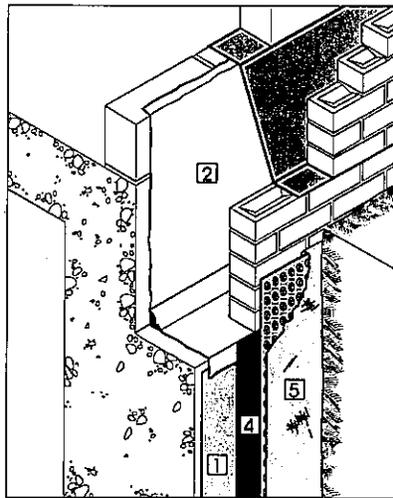

Damaged areas to be repaired by patching with an oversize patch applied to a clean dry surface and firmly rolled.

Performance

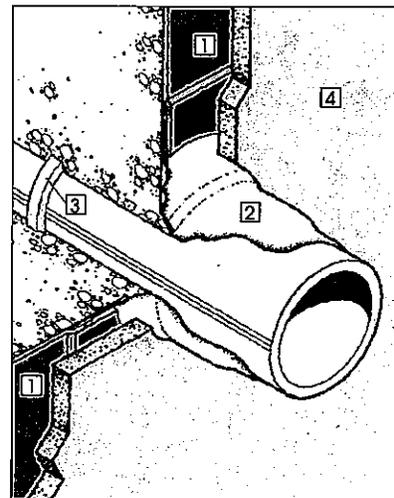

Bituthene 4000 complies with the relevant section of the following national standards: BS 8102:1990, Building Regulations (England and

Physical Properties

Property	Typical Results	Test Method
Elongation at max load	Long 244% Trans 185%	BS 2782 320 A
Tear Resistance	Long 77N Trans 92N	MOAT 27:5.4.1
Peel Strength	76.5 N/mm ²	MOAT 27:5.1.3
Tensile Strength of joints	117N	MOAT 27:5.2.2
Moisture Vapour Permeability	0.31 g/m ² /24 hours	BS 3177: 1959 (75% RH/25°C)
Puncture Resistance	220 N 65mm	ASTM E154
Water Resistance (6m head)	No penetration	MOAT 27:5.1.4

Health and Safety

There is no legal requirement for a Material Safety Data Sheet for Bituthene 4000, Bituthene Protection Boards, Bitustik, Lap Roller, Hydroduct or waterstops. For health and safety questions on these products please contact Grace Construction Products Limited. For Primer B2, and Bituthene LM read the product label and Material Safety Data Sheet (MSDS) before use. Users must comply with all risk and safety phrases. MSDS's can be obtained from Grace Construction Products or from our web site at www.graceconstruction.com.

NBS Specification Clause

Refer to Clause 180 and 190.

3. Product Description

BASIC USE

Grace underlayments are used on sloped roofs beneath shingles, shakes, slate, tile and metal roofing. These products help prevent leaks caused by wind driven rain and water back-up from ice dams in flashing areas, on roof edges, valleys, ridges and other critical areas.

Grace Ice & Water Shield® provides superior protection from ice dams and wind driven rain in severe climate areas. With RIPCORDER®, Grace Ice & Water Shield is now easier to install. This "Split Release on Demand" feature (thin cord embedded below the rubberized asphalt) allows splitting the release paper in half. Installation in detailed areas, such as chimneys and valleys, is quicker and easier. Grace Select is appropriate for use in wind driven rain applications and for ice dams where code based standards of protection are sufficient. Grace Ultra is appropriate for applications where the membrane must withstand high in-service temperatures for extended periods of time and is suitable for applications in hot desert southwestern U.S. climates or any application where superior heat resistance is a requirement.

COMPOSITION & MATERIALS

Grace Ice & Water Shield and Grace Select are cold applied, self-adhering membranes composed of a high strength polyethylene film coated on one side with a layer of rubberized asphalt adhesive and interwound with a disposable release sheet. An embossed, slip resistant surface is provided on the polyethylene.

Grace Ultra is a cold applied, self-adhering membrane composed of a high strength polyethylene film coated on one side with a layer of butyl rubber adhesive and interwound with a disposable release sheet. An embossed, slip resistant surface is provided on the polyethylene.

PRECAUTIONS AND LIMITATIONS

- Slippery when wet or covered by frost.
- Consistent with good roofing practice, always wear fall protection when working on a roof deck.
- Release liners are slippery. Remove from work area immediately after membrane application.
- Do not leave permanently exposed to sunlight. Maximum recommended exposure of Grace Select is 30 days, Grace Ice & Water Shield is 30 days and Grace Ultra is 60 days.
- Place metal drip edge or wood starter shingles over the membrane.
- Do not fold over the roof edge unless the edge is protected by a drip edge, gutter or other flashing material.
- Do not install on the chamfered edges of wood plank.
- Do not install directly on old roof coverings.
- Do not install Grace Select or Grace Ice & Water Shield in the desert Southwest. Use Grace Ultra in this climate. Check with your Grace representative.
- Grace Ice & Water Shield and Grace Ultra can be used for high altitude/alpine regions.
- Check with the manufacturer of the metal roofing system for any special requirements when used under metal roofing. Do not install directly under roof coverings especially sensitive to corrosion, such as zinc, without providing proper ventilation.
- Do not install Grace Select or Grace Ice & Water Shield under copper, Cor-Ten® or zinc metal roofing in high altitude climates. These roofs can reach extremely high temperatures due to the low reflectivity, high absorption and high conductivity of the metals. Use Grace Ultra for these roof types in this climate. Check with your Grace representative.
- Provide proper roof insulation and ventilation to help reduce ice dams and to minimize condensation. Grace underlayments are air and vapor barriers.
- Repair holes, fishmouths, tears, and damage to membrane with a round patch of membrane extending past the damaged area 6" (150 mm) in all directions. If fasteners are removed leaving holes in the membrane, it

must be patched. The membrane may not self-seal open fastener penetrations.

- Do not install fasteners through the membrane over unsupported areas of the structural deck, such as over the joints between adjacent structural panels.
- Due to its slight asphaltic odor, do not apply where the membrane is exposed to interior living space.
- Not compatible with polysulphides, flexible PVC or high concentrations of resin (pitch).
- Only Grace Ultra is compatible with EPDMs. Also appropriate for use in tie-ins in EPDM with other Grace underlayments.

4. Technical Data

APPLICABLE STANDARDS

ASTM International

- ASTM D412 Standard Test Methods for Vulcanized Rubber and Thermoplastic Rubbers and Thermoplastic Elastomers in Tension
- ASTM D903 Standard Test Method for Peel or Stripping of Adhesive Bonds
- ASTM D1970 Standard Specification for Self-Adhering Polymer-Modified Bituminous Sheet Materials Used as Steep Roofing Underlayment for Ice Dam Protection
- ASTM D3767 Standard Practice for Rubber-Measurement of Dimensions
- ASTM E96 Standard Test Methods for Water Vapor Transmission of Materials
- ASTM E108 Standard Test Methods for Fire Tests of Roof Coverings

APPROVALS

GIWS meets or exceeds all key code performance requirements for self-adhered underlayments.

LA City Department of Safety Report No. RR-25330, GIWS

International Conference of Building Officials (ICBO ES) - Report No. 3997; Grace Ice & Water Shield, Grace Select, Grace Ultra

5. Installation

SURFACE PREPARATION

Install Grace underlayments directly on a clean, dry, continuous structural deck. Some suitable deck materials are plywood, wood composition, wood plank, metal, concrete, or gypsum sheathing. For all other sheathings, contact a local Grace representative.

Remove dust, dirt, loose nails and old roofing materials. Protrusions from the deck area

must be removed. Decks shall have no voids, damaged or unsupported areas. Repair deck areas before installing the membrane. Wood planks should be closely butted together.

Prime concrete, masonry surfaces and Dens-Glass Gold® with Perm-A-Barrier® WB Primer if adhesion is found to be marginal. Apply at a rate of 250 - 350 ft²/gal (6 - 8 m²/L). Priming is not required for other suitable surfaces provided that they are clean and dry.

MEMBRANE INSTALLATION

Apply Grace underlayments only in fair weather when the air, roof deck and membrane are at temperatures of 40 degrees F (5 degrees C) or higher. Apply roof covering material at temperatures of 40 degrees F (5 degrees C) or higher.

Cut the membrane into 10' - 15' (3 - 5 m) lengths and reroll loosely. Peel back 1' - 2' (300 - 600 mm) of release liner, align the membrane, and continue to peel the release liner from the membrane. Press the membrane in place with heavy hand pressure. Side laps must be a minimum of 3 1/2" (90 mm), and end laps must be a minimum of 6" (150 mm). For valley and ridge application, peel the release liner, center the sheet over the valley or ridge, drape, and press in place. Use RIPCORDER® to split the release paper for faster and easier installation in these detail areas. Work from the center of the valley or ridge outward in each direction and start at the low point and work up the roof.

Alternatively, starting with a full roll of membrane, unroll a 3' - 6' (1 - 2 m) "starter strip," leaving the release liner in place. Align the membrane and roll in the intended direction of

membrane application. Carefully cut the release liner on top of the full roll in the cross direction being careful not to cut the membrane. Peel back about 6" (150 mm) of the release liner in the opposite direction of the intended membrane application exposing the black adhesive. Hold the release liner with one hand and pull the roll along the deck with the release liner, leaving the starter strip behind. Use the other hand to apply pressure on the top of the roll. Stop frequently to press the membrane in place with heavy hand pressure. When finished with the roll, go back to the beginning, reroll it, and pull the remaining release paper from the material, finishing the installation.

Consistent with good roofing practice, install the membrane so that all laps shed water. Always work from the low point to the high point of the roof. Apply the membrane in valleys before the membrane is applied to the eaves. Following placement along the eaves, continue application of the membrane up the roof. The membrane may be installed either vertically or horizontally.

Use smooth shank, electroplated galvanized nails for fastening shingles. Hand nailing will provide a better seal than power activated nailing. If nailing of the membrane is necessary on steep slopes during hot weather, backnail and cover the nails by overlapping with the next sheet.

Extend the membrane on the roof deck above the highest expected level of water back-up from ice dams and above the highest expected level of snow and ice on the wall sheathing on vertical side walls (dormers) and

TABLE 1 PHYSICAL PROPERTIES OF GRACE UNDERLAYMENTS

Property & test method	Grace Ice & Water Shield	Grace Select	Grace Ultra

vertical front walls for ice dam protection. Consider a double layer of membrane in critical areas, such as along the eaves or in valleys, in climates where severe ice dams are anticipated. Apply the membrane to the entire roof deck for wind driven rain protection. Apply a new layer of Grace underlayment directly over the old Grace underlayment in retrofit applications following the standard membrane application procedure. Place metal drip edges or wood starter shingles over the membrane.

6. Availability & Cost

AVAILABILITY

Strategically located warehouses and dealers stock Grace underlayments throughout North America.

COST

Grace underlayments are competitively priced. For specific information, contact a Grace representative.

7. Warranty

Grace underlayments are warranted to be free of defects in manufacture.

8. Maintenance

When installed in accordance with manufacturer's recommendations, Grace underlayments will not require maintenance.

9. Technical Services

Support is provided by full-time technically trained Grace representatives and technical service personnel, and backed by a central research and development staff. For technical assistance, call toll free (866) 333-3SBM (3726).

Notes:

⁽¹⁾ NYSDEC 6 NYCRR Environmental Remediation Programs Part 375 Unrestricted Use of Soil Cleanup Objective Table 375-6.8a 12/06⁽²⁾ The blind duplicate sample is listed as EP004 in the laboratory analytical sheets and is a blind duplicate of EP003.

NS - No Standard

U - The analyte was analyzed for, but was not detected above the reported sample quantification limit. The associated numerical value is the sample quantitation limit.

b - For constituents where the calculated SCO was lower than the contract required quantitation limit (CRQL), the CRQL is used as the Track 1 SCO.

Department and Department of Health rural soil survey, the rural soil background concentration is used as the Track 1 SCO value for this use of the site.

Bold / Shaded text denotes concentrations exceeding NYSDEC Unrestricted Use SCO
