

NYC VCP Cleanup Plan Available for Review and Comment

Where can I view project documents?

In person at:

Brooklyn Library
Bushwick Branch
340 Bushwick Avenue
Brooklyn, NY 11217

Please call (718) 602-1348 for hours of operation

and electronically at:

<http://www.nyc.gov/html/oer/html/repository/RBrooklyn.shtml>

Public Comment Period

June 14, 2013
to
July 14, 2013

Whom can I contact for project information?

Rebecca Bub
Project Manager
NYCOER
100 Gold Street, 2nd Floor
New York, NY 10038
212-341-2073
RBub@cityhall.nyc.gov

and

Shaminder Chawla
Assistant Director
NYCOER
(212) 442-3007
Schawla@dep.nyc.gov

The New York City Office of Environmental Remediation (OER) provides this Fact Sheet pursuant to New York City's Voluntary Cleanup Program (VCP). An application has been submitted by Throop Wallabout Realty, LLC for enrollment of the property located at 376-382 Wallabout Street in the Williamsburg section of Brooklyn, New York and identified as Block 2266, Lots 14, 15, 16 and 17 into the VCP. The Remedial Investigation Report (RIR) details the results of an environmental investigation at the site including the nature and extent of contamination. The draft Remedial Action Work Plan (RAWP) proposes remedial actions to address contamination delineated in the RIR.

Public Comments on the RAWP

OER is accepting public comments on the draft RAWP for 30 days until July 14, 2013. The RIR and draft RAWP are available for review at the document repositories identified in the box on the left including a public library branch and through a link to OER's website. Comments should be sent to Mr. Shaminder Chawla via mail or e-mail (see contact information at left).

Site Description

The Site is 10,000 square feet and is made up of four different lots which are currently uncapped and undeveloped. The proposed future use of the Site consists of redeveloping each lot with identical residential four-story masonry buildings, each with a full cellar, and concrete capped rear courtyard.

Summary of RIR

The environmental investigation identified up to five feet of historic fill. Semi Volatile Organic Compounds, three pesticides, one PCB, and metals were detected above cleanup guidelines.

Groundwater samples identified no PCBs, VOCs or pesticides above Groundwater Quality Standards (GQS). SVOCs and three metals were detected above GQS. Soil vapor samples showed petroleum-related and chlorinated VOCs at low concentrations and below the monitoring level ranges established by New York State DOH.

Summary of the Remedy

The specific elements of the proposed remedial action include:

- Preparation of a Community Protection Statement and implementation of all required NYC VCP Citizen Participation activities according to an approved Citizen Participation Plan;
- Performance of a Community Air Monitoring Program for particulates and volatile organic carbon compounds;
- Establishment of Track 1 Unrestricted Use Soil Cleanup Objectives (SCOs);
- Excavation and removal of soil/fill exceeding Track 1 Unrestricted Use SCOs. For development purposes, the entire property will be excavated to a depth of 8 feet;
- Transportation and off-Site disposal of all soil/fill material at permitted facilities in accordance with applicable laws and regulations for handling, transport, and disposal, and this plan. Sampling and analysis of excavated media as required by disposal facilities;
- Collection and analysis of end-point samples to determine the performance of the remedy with respect to attainment of SCOs;
- As part of development, installation of a vapor barrier below the basement concrete slab and behind the foundation walls of the proposed building and installation of a passive sub slab depressurization system;
- As part of development, construction and maintenance of an engineered composite cover consisting of a 12 inches thick concrete basement slab and 4 inches thick rear cellar level courtyard cap;
- Submission of a Remedial Action Report (RAR) that describes the remedial activities, certifies that the remedial requirements have been achieved, defines the Site boundaries, lists any changes from this RAWP;
- If Track 1 is not achieved, submission of an approved Site Management Plan (SMP) in the RAR for long-term management of residual contamination, including plans for maintenance, monitoring, inspection and certification of Engineering and Institutional Controls and reporting at a specified frequency; and
- Submission of a RAR that describes the remedial activities certifies that the remedial requirements have been achieved and lists any changes from the RAWP.

Next Steps

OER will review the draft RAWP and consider all public comments submitted during the comment period before it approves a final RAWP. The approved RAWP will be placed in the public library branch and on OER’s website and a second fact sheet will be issued before remedial work begins.

If you have any questions or know of any neighbor that would like to be added to the site contact list, please contact the OER Project Manager listed on the front page of this Fact Sheet. We encourage you to share this Fact Sheet with neighbors and tenants and/or post it in a prominent area of your building.
