NYC VCP Cleanup Plan Remedial Activities to Begin

The New York City Office of Environmental Remediation (OER) is providing this Fact Sheet pursuant to the New York City Voluntary Cleanup Program (VCP). OER has approved the Remedial Action Work Plan (RAWP) submitted by Allen Lebovits, Esq. for 1060 Bedford Avenue, Brooklyn, New York (Block 1954, Lot 22). The remedial work will begin in November 2015. The RAWP can be reviewed electronically or in person at the document repositories identified in the box at left.

Site Description:

The 7,500 square-foot site currently contains a 1-story auto repair shop with a parking lot. The proposed use of the site is a new 5-story residential and commercial building with a full cellar level in the building footprint.

Summary of the Remedy:

The remedial action for 1060 Bedford Avenue is a Track 4 Site-specific Use cleanup. The specific elements of the proposed remedial action include:

- Preparation of a Community Protection Statement and performance of all required NYC VCP citizen participation activities according to an approved Citizen Participation Plan;
- Performance of a Community Air Monitoring Program for particulates and volatile organic carbon compounds;
- Establishment of Track 4 Site-Specific Soil Cleanup Objectives (SCOs); Excavation and removal of soil/fill in excess of SCOs;
- Transportation and off-site disposal of all soil/fill material at permitted facilities in accordance with applicable laws and regulations;
- Collection and analysis of nine (9) end-point samples to determine the performance of the remedy with respect to attainment of SCOs;
- Installation of a vapor barrier system beneath the cellar, elevator pit, and behind the foundation walls of the proposed building;
- Construction and maintenance of an engineered composite cover consisting of a 4 inch thick concrete basement slab and a rear cellar level courtyard to prevent human exposure to residual soil/fill remaining under the Site;
- Submission of a Remedial Action Report (RAR) that describes the remedial activities and certifies that the remedial requirements have been achieved and lists any changes from this RAWP;
- Submission of an approved Site Management Plan (SMP) in the RAR for long-term management of residual contamination, including plans for maintenance, inspection and certification of Engineering and Institutional Controls and reporting at a specified frequency; and
- Continued registration with E-designation for the property.

Cleanup activities are scheduled to begin in November 2015 and are expected take approximately three months to complete.

Next Steps: After the enrollee completes the remedial work, a RAR will be prepared and submitted to OER. The RAR will describe the cleanup activities and certify that all cleanup requirements were met. Once the RAR is approved, OER will issue a Notice of Completion, a City liability release, and a New York City Green Property Certificate. OER will then issue a fact sheet announcing the completion of the remedial action and identify all engineering and institutional controls to be used at the Site.

If you have any questions or know of any neighbor that would like to be added to the site contact list, please contact the OER Project Manager listed on the front page of this Fact Sheet. We encourage you to share this Fact Sheet with neighbors and tenants and/or post it in a prominent area of your building. For information regarding New York City's Voluntary Cleanup Program, please visit our website at: www.nyc.gov/oer.
