# CERTIFICATION

I, Kevin Brussee, am a Qualified Environmental Professional, as defined in RCNY § 43-1402(ar). I have primary direct responsibility for implementation of the Remedial Investigation for the Redevelopment Project located at 948 Myrtle Avenue, Brooklyn, NY, (OER Site No. 15EHAN375K). I am responsible for the content of this Remedial Investigation Report (RIR), have reviewed its contents and certify that this RIR is accurate to the best of my knowledge and contains all available environmental information and data regarding the property.

KEVIN BRUSSEE      4/25/2015        
Qualified Environmental Professional      Date      Signature

## EXECUTIVE SUMMARY

The Remedial Investigation Report (RIR) provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy pursuant to RCNY§ 43-1407(f). The remedial investigation (RI) described in this document is consistent with applicable guidance.

### Site Location and Current Usage

The Site is located at 948 Myrtle Avenue in the Bedford-Stuyvesant section of Brooklyn, New York, and is currently identified as Block 1756, Lots 33, 37 and 42 on the New York City Tax Map. Figure 1 shows the Site location. The Site is bordered by Myrtle Avenue to the north, residential buildings (some with first floor commercial space) to the west, Throop Avenue to the east, and Vernon Avenue to the south. A map of the site boundary is shown on Figure 2.

Lot 33 consists of 100 feet of street frontage on Myrtle Avenue and has a depth of 100 feet for a total of 10,000 ft<sup>2</sup>. The lot is capped with asphalt and used as a parking lot for the grocery store on Lot 37.

Lot 37 is a corner lot located on the southwest corner of the intersection of Myrtle Avenue and Throop Avenue. The lot consists of 100 feet of street frontage on Myrtle Avenue and 100 feet of street frontage on Throop Avenue for a total of 10,000 ft<sup>2</sup>. The lot is developed with a one-story grocery store building, and a two-story building that consists of a café on the first floor and apartment on the second floor.

Lot 42 is a corner lot located on the northwest corner of the intersection of Vernon Avenue and Throop Avenue. The lot consists of 100 feet of street frontage on Vernon Avenue and 100 feet of street frontage on Throop Avenue for a total of 10,000 ft<sup>2</sup>. The lot is partially developed with a one-story garage building that is currently used as warehouse for the grocery store. The remainder of the lot consists of an asphalt capped parking area.

Combined, the three lots consist of 200 feet of street frontage on Myrtle Avenue, 200 feet of street frontage on Throop Avenue and 100 feet of street frontage on Vernon Avenue for a total of approximately 30,000 ft<sup>2</sup>.

## Summary of Proposed Redevelopment Plan

The development project consists of redeveloping the Site with an 11-story mixed use building (residential and commercial) with a cellar. The cellar level will be constructed across the entire footprint of the lot with the exception of a 5ft wide area along the western end of Lot 42 to eliminate/minimize shoring/underpinning. The cellar level will consist of a 13,578 ft<sup>2</sup> commercial space that fronts Myrtle Avenue, a recreational space room, bicycle storage rooms, refuse room, commercial garbage storage room, three residential storage rooms, and mechanical rooms.

The first floor will consist of an 8,368 ft<sup>2</sup> commercial area that fronts Myrtle Avenue, the building's residential lobby, a recreation room, and a parking garage that will enter and exit from Vernon Avenue. Floors 2 through 11 will consist of residential apartments.

Layout of the redevelopment plans for the cellar level and first floor are presented on Figure 3. The current zoning designation is R7D with a C2-4 commercial overlay. The proposed use is consistent with existing zoning for the property.

## Summary of Past Uses of Site and Areas of Concern

A Phase I Environmental Site Assessment was completed by EBC in February of 2014. EBC was able to establish the following Site history dating back to 1887:

*938 Myrtle Avenue (Lot 33)* - The northwest portion of the Site was developed with several residential buildings with first floor commercial stores from 1887 to 1950. From 1950 to current, Lot 33 has been utilized for parking.

*948 Myrtle Avenue (Lot 37)* - The northeast portion of the Site was vacant land in 1887. From 1904 to 1918 this portion of the Site was developed with five (5) commercial buildings occupied by stores. From 1935 to 1950, the northeast portion of the Site was developed with a single story garage building. Two underground gasoline storage tanks were drawn in the southeast corner of the garage building on the 1933, 1947 and 1950 Sanborn maps. From 1965 to current, Lot 37 has been utilized as a store; currently a Key Food Supermarket and a two-story mixed use residential and commercial building with basement currently occupied by Eliza Coffee Shop.

258 Throop Avenue (Lot 42) - The southern portion of the Site was vacant land in 1887. In 1904, Lot 42 was occupied by a coal and wood yard; S Tuttle Sons & Co. From 1935 to 1947, the entire footprint of Lot 42 was developed with a single story garage building. One 550-gallon underground gasoline tank was drawn on the 1935, 1947 and 1950 Sanborn maps on the eastern end of the building. The 1965 Sanborn map indicates the east end of the one-story garage building was removed, and the area along Throop Avenue was labeled as a filling station.

The Phase I Report identified two (2) recognized environmental conditions in connection with the Site and is further discussed below:

- The southern portion of the Site (Lot 42) was utilized as a filling station from approximately 1965 to 1986. The Site was not identified on the regulatory database or the NYS DEC bulk storage database in connection with any USTs. No information regarding removal of USTs was available. The current status and location of the USTs is unknown. The former occupancy of the Site as a filling station and possible presence of USTs represents a recognized environmental concern.
- The 1935, 1947 and 1950 Sanborn maps note the presence of two gasoline USTs in the southwest corner of Lot 37. The Site was not identified on the regulatory database or the NYS DEC bulk storage database in connection with any USTs. No information regarding removal of USTs was available. The current status of the USTs is unknown. The lack of information regarding the removal, closure, confirmation soil and ground water sampling represents a recognized environmental concern.

EBC recommended a ground penetrating radar (GPR) survey and Phase II investigation in the areas of the former filling station (Lot 42) and two gasoline USTs in the southwest corner of Lot 37 to determine if an impact to the sub-surface exists.

Areas of Concern (AOCs) identified for the Site include:

1. Eastern portion of Lot 42 was historically utilized as a filling station;
2. Two underground gasoline tanks were present in the southwest corner of Lot 37; and
3. The presence of historic fill material to depths as great as 10 feet below grade.

## Summary of the Work Performed under the Remedial Investigation

EBC performed the following scope of work at the Site in February of 2014:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Performed a GPR survey across the parking area on Lot 42 which identified nine anomalies, each indicative of a 550-gallon underground storage tank, and within accessible portions of the basement of the building on the corner of Throop Avenue and Myrtle Avenue;
3. Installed four soil borings (B1-B4) around the underground storage tanks identified during the GPR survey, and collected four soil samples for chemical analysis from the soil borings to evaluate soil quality;
4. Installed two soil borings (Basement 1 and Basement 2) within the basement of 2-story building located on the corner of Throop Avenue and Myrtle Avenue (east side of Lot 37) to investigate the underground storage tanks noted on Sanborn maps, and collected two soil samples for chemical analysis from the soil borings to evaluate soil quality; and
5. Collected two groundwater samples for chemical analysis to evaluate groundwater quality from a temporary well point.

EBC performed the following scope of work at the Site in February and March of 2015:

1. Installed eight soil borings (B5-B12) across the Site, and collected twelve soil samples for chemical analysis from the soil borings to evaluate soil quality;
2. Located three existing 1 inch diameter monitoring wells at the Site, and collected three groundwater samples for chemical analysis to evaluate groundwater quality; and
3. Installed two sub-slab soil gas implants and four soil vapor probes across the entire Site and collected six samples for chemical analysis.

## Summary of Environmental Findings

1. The elevation of the Site is approximately 49 feet.
2. Depth to groundwater is approximately 40 feet below sidewalk grade.
3. Regional groundwater flow is generally west-northwest.
4. Depth to bedrock is at the Site is greater than 100 feet.

5. The stratigraphy of the Site from the surface down consists of historic fill material that extends to depths as great as 10 feet, underlain by native brown sand with rocks.
6. Soil/fill samples results were compared to NYSDEC Unrestricted Use Soil Cleanup Objectives and Restricted Residential Soil Cleanup Objectives as presented in 6NYCRR Part 375-6.8 and CP51. Data collected during the RI showed only one VOC, acetone (max. of 72 ppb), detected above Unrestricted Use SCOs in one shallow sample. Several petroleum-related VOCs, including 1,2,4-trimethylbenzene (max 1.8 µg/kg) and toluene (max 32 µg/kg), were detected at low levels, all below Unrestricted Use SCOs. No PCBs were detected in any of the soil samples. Five SVOCs, including benz(a)anthracene (max of 3,500 µg/kg), benzo(a)pyrene (max of 2,700 µg/kg), benzo(b)fluoranthene (max of 3,500 µg/kg), dibenz(a,h)anthracene (max of 370 µg/kg), and indeno(1,2,3-cd)pyrene (max of 1,400 µg/kg), were detected above their respective Restricted Residential Use SCOs within three of the shallow soil samples collected from the historic fill layer. The pesticides 4,4'-DDE (49 µg/kg) and 4,4'-DDT (maximum of 76 µg/kg) were found in three of the shallow soil samples exceeding Unrestricted Use SCOs, but below Restricted Residential Use SCOs. Several metals including barium (maximum of 406 mg/kg), chromium (maximum of 35.1 mg/kg), copper (maximum of 95.1 mg/kg), lead (maximum of 691 mg/kg), mercury (maximum of 4.15 mg/kg), nickel (41.7 mg/kg), and zinc (maximum of 423 mg/kg) exceeded Unrestricted Use SCOs within shallow soil samples. Of these metals, barium, lead and mercury also exceeded Restricted Residential Use SCOs. Overall, the soil results were consistent with data identified at sites with historic fill material in NYC.
7. Groundwater samples results were compared to New York State 6NYCRR Part 703.5 Class GA groundwater quality standards (GQS). Groundwater samples collected during the RI showed no PCBs at detectable concentrations. One pesticide, chlordane (0.11 µg/L) was detected above GQS. The chlorinated VOC tetrachloroethene (max of 40 µg/L) was detected in MW1 and MW2 above GQS in February of 2014, and MW1, MW2 and MW3 in March of 2013. The chlorinated VOC trichloroethene (max of 19 µg/L) was detected above GQS in MW2 in February of 2014 and March of 2015. Petroleum related VOCs, including 1,2,4-trimethylbenzene (max of 28 µg/L), m&p-xylenes (max of 27 µg/L), naphthalene (max of 11 µg/L), and n-butylbenzene (max of

9.3 µg/L), and sec-butylbenzene (max 21 µg/L) were detected above GQS in MW2 and GW2. Other VOCs including 1,1-dichloroethane (0.27 µg/L), 1,3,5-trimethylbenzene (max of 4.4 µg/L), 2-isopropyltoluene (max of 2.1 µg/L), acetone (max of 39 µg/L), carbon disulfide (1.1 µg/L), chloroform (max of 3.2 µg/L), chloromethane (0.35 µg/L), cis-1,2-dichloroethene (max of 2.3 µg/L), ethylbenzene (max of 1.3 µg/L), isopropylbenzene (max of 4.7 µg/L), methyl ethyl ketone (max of 6 µg/L), n-propylbenzene (max of 3.7 µg/L), o-xylene (0.56 µg/L), p-isopropyltoluene (20 µg/L), toluene (0.98 µg/L), and trans-1,2-dichloroethene (0.29 µg/L) were detected at concentrations below their respective GQS. Five SVOCs were detected above GQS including benz(a)anthracene (max of 0.25 µg/L), benzo(b)fluoranthene (0.42 µg/L), benzo(k)fluoranthene (max of 2.2 µg/L), chrysene (max of 0.07 µg/L), and indeno(1,2,3-cd)pyrene (max of 0.26 µg/L). Four dissolved metals were detected in groundwater at levels above GQS including iron (max of 7.36 µg/L), magnesium (max of 38 mg/L), manganese (max of 8.42 mg/L), and sodium (max of 96.5 µg/L).

8. Soil vapor results collected during the RI were compared to the compounds listed in Vapor Intrusion Matrices in the New York State Department of Health (NYSDOH) Final Guidance for Evaluating Soil Vapor Intrusion, dated October 2006. Data collected during the RI indicated petroleum related VOCs were present at low concentrations. Total concentrations of petroleum-related VOCs (BTEX) ranged from 19.87 µg/m<sup>3</sup> to 68.39 µg/m<sup>3</sup>. The CVOC trichloroethylene (TCE) was detected in three of the samples at a maximum concentration of 0.9 µg/m<sup>3</sup>. Tetrachloroethylene (PCE) was detected in all six soil gas samples ranging in concentration from 0.71 to 20.3 µg/m<sup>3</sup>. Carbon tetrachloride (maximum of 0.45 µg/m<sup>3</sup>) was detected within four of the six soil gas samples, and 1,1,1-trichloroethane (TCA) was not detected in any of the soil gas samples. All four chlorinated VOC concentrations are below the monitoring level ranges established within the NYSDOH Final Guidance on Soil Vapor Intrusion.

# REMEDIAL INVESTIGATION REPORT

## 1.0 SITE BACKGROUND

Aview Builders has applied to enroll in the New York City Voluntary Cleanup Program (NYC VCP) to investigate and remediate a 0.69-acre Site located at 948 Myrtle Avenue in the Bedford-Stuyvesant section of Brooklyn, New York. The Site will be redeveloped with an 11-story mixed use (commercial and residential) with a cellar. The RI was conducted in February 2014 and March 2015. This RIR summarizes the nature and extent of contamination and provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy that is protective of human health and the environment consistent with the use of the property pursuant to RCNY§ 43-1407(f).

### 1.1 Site Location and Current Usage

The Site is located at 948 Myrtle Avenue in the Bedford-Stuyvesant section of Brooklyn, New York, and is currently identified as Block 1756, Lots 33, 37 and 42 on the New York City Tax Map. Figure 1 shows the Site location. The Site is bordered by Myrtle Avenue to the north, residential buildings (some with first floor commercial space) to the west, Throop Avenue to the east, and Vernon Avenue to the south. A map of the site boundary is shown on Figure 2.

Lot 33 consists of 100 feet of street frontage on Myrtle Avenue and has a depth of 100 feet for a total of 10,000 ft<sup>2</sup>. The lot is capped with asphalt and used as a parking lot for the grocery store on Lot 37.

Lot 37 is a corner lot located on the southwest corner of the intersection of Myrtle Avenue and Throop Avenue. The lot consists of 100 feet of street frontage on Myrtle Avenue and 100 feet of street frontage on Throop Avenue for a total of 10,000 ft<sup>2</sup>. The lot is developed with a one-story grocery store building, and a two-story building that consists of a café on the first floor and apartment on the second floor.

Lot 42 is a corner lot located on the northwest corner of the intersection of Vernon Avenue and Throop Avenue. The lot consists of 100 feet of street frontage on Vernon Avenue and 100 feet of street frontage on Throop Avenue for a total of 10,000 ft<sup>2</sup>. The lot is partially developed with a

one-story garage building that is currently used as warehouse for the grocery store. The remainder of the lot consists of an asphalt capped parking area.

Combined, the three lots consist of 200 feet of street frontage on Myrtle Avenue, 200 feet of street frontage on Throop Avenue and 100 feet of street frontage on Vernon Avenue for a total of approximately 30,000 ft<sup>2</sup>.

## **1.2 Proposed Redevelopment Plan**

The development project consists of redeveloping the Site with an 11-story mixed use building (residential and commercial) with a cellar. The cellar level will be constructed across the entire footprint of the lot with the exception of a 5ft wide area along the western end of Lot 42 to eliminate/minimize shoring/underpinning. The cellar level will consist of a 13,578 ft<sup>2</sup> commercial space that fronts Myrtle Avenue, a recreational space room, bicycle storage rooms, refuse room, commercial garbage storage room, three residential storage rooms, and mechanical rooms.

The first floor will consist of an 8,368 ft<sup>2</sup> commercial area that fronts Myrtle Avenue, the building's residential lobby, a recreation room, and a parking garage that will enter and exit from Vernon Avenue. Floors 2 through 11 will consist of residential apartments.

Layout of the redevelopment plans for the cellar level and first floor are presented on Figure 3. The current zoning designation is R7D with a C2-4 commercial overlay. The proposed use is consistent with existing zoning for the property.

## **1.3 Description of Surrounding Property**

A New York City Housing complex is located on the opposite side of Myrtle Avenue. A mix of residential apartment buildings and residential apartment buildings with first floor commercial space is located on the opposite side of Throop Avenue, west of the Site along Myrtle Avenue and south of the Site on the opposite side of Vernon Avenue. Figure 4 shows the surrounding land usage of the adjacent properties listed below as well as additional properties located up to 500 feet away from the Site. No hospitals, schools or daycare facilities are located within a 250 ft radius of the Site.

## 2.0 SITE HISTORY

### 2.1 Past Uses and Ownership

A Phase I Environmental Site Assessment was completed by EBC in February of 2014. EBC was able to establish the following Site history dating back to 1887:

*938 Myrtle Avenue (Lot 33)* - The northwest portion of the Site was developed with several residential buildings with first floor commercial stores from 1887 to 1950. From 1950 to current, Lot 33 has been utilized for parking.

*948 Myrtle Avenue (Lot 37)* - The northeast portion of the Site was vacant land in 1887. From 1904 to 1918 this portion of the Site was developed with five (5) commercial buildings occupied by stores. From 1935 to 1950, the northeast portion of the Site was developed with a single story garage building. Two underground gasoline storage tanks were drawn in the southeast corner of the garage building on the 1933, 1947 and 1950 Sanborn maps. From 1965 to current, Lot 37 has been utilized as a store; currently a Key Food Supermarket and a two-story mixed use residential and commercial building with basement currently occupied by Eliza Coffee Shop.

*258 Throop Avenue (Lot 42)* - The southern portion of the Site was vacant land in 1887. In 1904, Lot 42 was occupied by a coal and wood yard; S Tuttle Sons & Co. From 1935 to 1947, the entire footprint of Lot 42 was developed with a one-story garage building. One 550-gallon underground gasoline tank was drawn on the 1935, 1947 and 1950 Sanborn maps within the eastern end of the building. The 1965 Sanborn map indicates the east end of the one-story garage building was removed, and the area along Throop Avenue was labeled as a filling station.

The Phase I Report identified two (2) recognized environmental conditions in connection with the Site and is further discussed below:

- The southern portion of the Site (Lot 42) was utilized as a filling station from approximately 1965 to 1986. The Site was not identified on the regulatory database or the NYS DEC bulk storage database in connection with any USTs. No information regarding removal of USTs was available. The current status and location of the USTs is unknown. The former

occupancy of the Site as a filling station and possible presence of USTs represents a recognized environmental concern.

- The 1935, 1947 and 1950 Sanborn maps note the presence of two gasoline USTs in the southwest corner of Lot 37. The Site was not identified on the regulatory database or the NYS DEC bulk storage database in connection with any USTs. No information regarding removal of USTs was available. The current status of the USTs is unknown. The lack of information regarding the removal, closure, confirmation soil and ground water sampling represents a recognized environmental concern.

EBC recommended a ground penetrating radar (GPR) survey and Phase II investigation in the areas of the former filling station (Lot 42) and two gasoline USTs in the southwest corner of Lot 37 to determine if an impact to the sub-surface exists.

## **2.2 Previous Investigations**

EBC is not aware of any previous investigations conducted at the Site.

## **2.3 Site Inspection**

Ms. Kristen Discenza of EBC performed a site inspection on Thursday, February 6, 2014, beginning at approximately 2:00 pm. The reconnaissance included a visual inspection of the property, the sidewalk surrounding the Site and the exterior of adjacent properties. At the time of the inspection, Lot 33 was capped with asphalt and utilized as the parking lot for the grocery store on Lot 37. Lot 37 was developed with a one-story commercial building occupied by a Key Food supermarket and a two-story mixed use commercial building with basement. The first floor and cellar were utilized by Elisa Café, and the 2nd floor was used for storage. Lot 42 was developed with a one-story commercial building which was used as a warehouse by the grocery store on Lot 37.

A fill port indicative of an underground storage tank was observed within the asphalt paved parking area located on the east half of Lot 42. EBC also observed nine gasoline tank vent pipes above the roof of the one-story garage building on Lot 42. Two one inch diameter monitoring wells were located within the grocery store parking lot (Lot 33).

No aboveground storage tanks, or evidence of any other underground storage tanks were noted at the Site.

## **2.4 Areas of Concern**

Areas of Concern (AOCs) identified for the Site include:

1. Eastern portion of Lot 42 was historically utilized as a filling station;
2. Two underground gasoline tanks were present in the southwest corner of Lot 37; and
3. The presence of historic fill material to depths as great as 10 feet below grade.

### **3.0 PROJECT MANAGEMENT**

#### **3.1 Project Organization**

The Qualified Environmental Profession (QEP) responsible for preparation of this RIR is Kevin Brussee.

#### **3.2 Health and Safety**

All work described in this RIR was performed in full compliance with applicable laws and regulations, including Site and OSHA worker safety requirements and HAZWOPER requirements.

#### **3.3 Materials Management**

All material encountered during the RI was managed in accordance with applicable laws and regulations.

#### 4.0 REMEDIAL INVESTIGATION ACTIVITIES

EBC performed the following scope of work at the Site in February of 2014:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Performed a GPR survey across the parking area on Lot 42 which identified nine anomalies, each indicative of a 550-gallon underground storage tank, and within accessible portions of the basement of the building on the corner of Throop Avenue and Myrtle Avenue;
3. Installed four soil borings (B1-B4) around the underground storage tanks identified during the GPR survey, and collected four soil samples for chemical analysis from the soil borings to evaluate soil quality;
4. Installed two soil borings (Basement 1 and Basement 2) within the basement of 2-story building located on the corner of Throop Avenue and Myrtle Avenue (east side of Lot 37) to investigate the underground storage tanks noted on Sanborn maps, and collected two soil samples for chemical analysis from the soil borings to evaluate soil quality; and
5. Collected two groundwater samples for chemical analysis to evaluate groundwater quality from a temporary well point.

EBC performed the following scope of work at the Site in February and March of 2015:

1. Installed eight soil borings (B5-B12) across the Site, and collected twelve soil samples for chemical analysis from the soil borings to evaluate soil quality;
2. Located three existing 1 inch diameter monitoring wells at the Site, and collected three groundwater samples for chemical analysis to evaluate groundwater quality; and
3. Installed two sub-slab soil gas implants and four soil vapor probes across the entire Site and collected six samples for chemical analysis.

#### 4.1 Geophysical Investigation

A ground penetrating radar survey was performed by Nova Geophysical Services (Nova) on February 27, 2014. Nine anomalies indicative of 550-gallon underground gasoline tanks were identified on the east end of Lot 42 beneath the asphalt parking lot. Each tank could be traced to one of the gasoline tank vent pipes located on the roof of the building. Nova detected underground lines indicative of a former dispenser, and evidence that additional tanks may have

been formerly present. Nova was not able to identify any anomalies indicative of an underground storage tank within the cellar of the cafe on Lot 37, but it should be noted that access was limited to a small portion of the basement.

## **4.2 Borings and Monitoring Wells**

### **Drilling and Soil Logging**

On February 24, 2014, four soil borings (B1-B4) were installed around the nine underground gasoline tanks on Lot 42 to determine if the underground storage tanks had leaked. The approximate location of each of the tanks and installation location of each of the four soil borings is shown on Figure 5. For each of the four soil borings, soil samples were collected continuously from grade to a final depth of 20 feet below existing grade using a five-foot steel macro-core sampler with acetate liners and Geoprobe direct-push equipment. Soil recovered from each of the soil borings was field screened for the presence of VOCs with a photoionization detector (PID) and visually inspected for evidence of contamination. No PID readings above background concentrations were detected. From each soil boring, one soil sample was retained from the interval 18 to 20 feet below grade for laboratory analysis of volatile organic compounds (VOCs) via EPA Method 8260, and semi-volatile organic compounds (SVOCs) via EPA Method 8270 (CP51 list).

Two additional soil borings were performed on February 24, 2014, within the basement of the Cafe (Basement 1, Basement 2) on the corner of Throop Avenue and Myrtle Avenue to investigate the two underground gasoline tanks drawn in the southeast corner of the lot on the 1935 Sanborn map. EBC suspects the two underground storage tanks noted on the 1935 Sanborn map in the southeast corner of the Lot 33 were removed when existing building's basement was constructed. Therefore, the two soil borings performed to a depth of approximately 4 feet below the cellar slab represent soil borings performed to a depth of approximately 14 feet below grade, equivalent to approximately 6-8 feet below the bottom of the former tanks. The two soil borings were performed to a depth of approximately 4 feet below using a stainless steel hand auger. One soil sample was retained from each soil boring representing the interval 2-4 feet below the basement slab. No physical or olfactory evidence of petroleum contamination was observed, and no PID values above background concentrations were reported.

On February 27, 2015, and March 5, 2015, six soil borings (B5 through B10) were installed in the approximate locations shown on Figure 5. The six soil boring locations were chosen to gain representative soil quality information across the Site. For each of the six soil borings, soil samples were collected continuously from grade to a final depth of 15 feet below existing grade using a five-foot steel macro-core sampler with acetate liners and Geoprobe direct-push equipment. Soil recovered from each of the soil borings was field screened for the presence of VOCs with a photoionization detector (PID) and visually inspected for evidence of contamination. No PID readings above background concentrations were detected. From soil borings B5, B7, B8 and B9, soil samples were retained for laboratory analysis from the intervals 0 to 2 feet below grade or 11 to 13 feet below grade. From soil borings B6 and B10, soil samples were retained for laboratory analysis from the interval 11 to 13 feet below grade.

EBC was unable to access the interior of the grocery store on Lot 37 with a drill rig. Therefore, the two soil borings installed on March 27, 2015, within the grocery store building (B11 and B12) were performed using an AMS Sampler to a depth of 2 feet below grade. One soil sample was retained from each soil boring representing the interval 0-2 feet below the building slab. No physical or olfactory evidence of petroleum contamination was observed, and no PID values above background concentrations were reported.

Soil boring details are provided in Table 1. Boring logs were prepared by a Qualified Environmental Professional and are attached in Attachment B.

### **Groundwater Monitoring Well Construction**

The Site inspection performed in February of 2014, identified two 1-inch diameter PVC monitoring wells (MW1 and MW2) on Lot 33. Both monitoring wells were installed at a depth of approximately 50 feet below grade, and groundwater was encountered within the monitoring wells at a depth of approximately 40 feet. The approximate location of both monitoring wells is shown on Figure 5. Monitoring well sampling details are provided in Table 1. Monitoring well locations are shown on Figure 5.

As part of the gasoline underground storage tank investigation, EBC collected two groundwater samples (GW1 and GW2) from a Geoprobe<sup>®</sup> stainless steel groundwater sampler driven to a

depth of three feet below the groundwater interface (approximately 40 feet below grade). The groundwater sampling locations are shown on Figure 5.

One additional, pre-existing monitoring well (MW3) was located during the sub-surface investigation performed in March of 2015. MW3 is a 1-inch diameter PVC monitoring well located immediately north of the nine 550-gallon gasoline underground storage tanks located on Lot 42. Monitoring well locations are shown on Figure 5.

### **Survey**

A monitoring well survey has not been performed.

### **Water Level Measurement**

Approximate groundwater level measurements were collected using a Solinst oil/water interface meter to ensure the surface of the water table was within the screened section of the monitoring well. No free product was observed within the two monitoring wells. Water level data is included in Table 1.

### **4.3 Sample Collection and Chemical Analysis**

Sampling performed as part of the field investigation was conducted for all Areas of Concern and also considered other means for bias of sampling based on professional judgment, area history, discolored soil, stressed vegetation, drainage patterns, field instrument measurements, odor, or other field indicators. All media including soil and soil vapor have been sampled and evaluated in the RIR. Discrete (grab) samples have been used for final delineation of the nature and extent of contamination and to determine the impact of contaminants on public health and the environment. The sampling performed and presented in this RIR provides sufficient basis for evaluation of remedial action alternatives, establishment of a qualitative human health exposure assessment, and selection of a final remedy.

### **Soil Sampling**

Eighteen soil samples were collected for chemical analysis during this RI. Data on soil sample collection for chemical analyses, including dates of collection and sample depths, is reported in Tables 2, 3, 4 and 5. Figure 5 shows the location of samples collected during this RI. Laboratories and analytical methods for soil samples collected during the RI are shown below.

The 18 soil samples were collected in pre-cleaned, laboratory supplied glassware, stored in a cooler with ice and submitted for analysis with proper chain of custody to Phoenix Environmental Laboratories (Phoenix) of 587 East Middle Turnpike, Manchester, CT 06040, a New York State ELAP certified environmental laboratory (ELAP Certification No. 11301). All soil samples collected as part of the tank investigation were analyzed for the presence of VOCs by EPA Method 8260 and SVOCs by EPA Method 8270 (CP51 list). Each of the soil samples collected in February and March of 2015 were analyzed for the presence of VOCs by EPA Method 8260, SVOCs by EPA Method 8270, pesticides/PCBs by EPA Methods 8081/8082, and target analyte list (TAL) metals.

### **Groundwater Sampling**

Four groundwater samples were collected for chemical analysis in 2014, and three groundwater samples were collected in 2015. Groundwater samples were collected utilizing dedicated polyethylene tubing and a peristaltic pump. Groundwater samples were collected in pre-cleaned, laboratory supplied glassware, stored in a cooler with ice and submitted to Phoenix for analysis. The groundwater samples collected as part of the tank investigation were analyzed for VOCs by EPA Method 8260. The groundwater samples collected from pre-existing monitoring wells MW1, MW2 and MW3 in March of 2015, were analyzed for VOCs by EPA Method 8260, SVOCs by EPA Method 8270, pesticides/PCBs by EPA Methods 8081/8082 and TAL metals. Groundwater sample collection data is reported in Tables 6 through 9. Sampling logs with information on purging and sampling of groundwater monitoring wells are included in Appendix C. Figure 5 shows the location of groundwater sampling. Laboratories and analytical methods are shown below.

### **Soil Vapor Sampling**

Two sub-slab soil gas implants (SV3 and SV4) and four soil vapor probes (SV1, SV2, SV5, and SV6) were installed and six soil vapor samples were collected for chemical analysis during this RI. Sub-slab soil gas and soil vapor sampling locations are shown on Figure 5. Soil vapor sample collection data is reported in Table 10, and the soil vapor sampling logs are included in Attachment D. Methodologies used for soil vapor assessment conform to the *NYS DOH Final Guidance on Soil Vapor Intrusion, October 2006*.

All four soil vapor probes were installed using Geoprobe™ equipment and tooling. The approximate location of each of the soil vapor probes is shown on Figure 5. The vapor probes that were installed were the Geoprobe™ Model AT86 series, which are constructed of a 6-inch length of double woven stainless steel wire. The soil vapor probes were installed to a depth of 11 feet below grade. Each probe was attached to ¼ inch polyethylene tubing which extended approximately 18 inches beyond that needed to reach the surface. The tubing was capped with a ¼ inch plastic end to prevent the infiltration of foreign particles into the tube. Coarse sand was placed around the probe to a height of approximately 1 foot above the bottom of the probe. The remainder of the borehole was sealed with a bentonite slurry to the surface.

The two sub-slab soil vapor implants were installed by drilling a 1/2 inch hole through the basement concrete slab with a handheld drill and inserting 1/4 inch polyethylene tubing to no more than 2 inches below the base of the slab. The tubing was then sealed at the surface with hydrated granular bentonite.

Soil vapor sampling for the both sub-slab soil gas implants and three of the four soil vapor probes was conducted on March 9, 2015. Soil vapor probe SV1 was not accessible during the sampling event because a geotechnical drill rig was parked over the implant. Soil vapor sampling for soil vapor probe SV1 was conducted on March 18, 2015. Prior to sampling, each sampling location was tested to ensure a proper surface seal had been obtained. In accordance with NYSDOH guidance (NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York, February 2005), a tracer gas (helium) was used as a quality assurance/quality control device to verify the integrity of the sampling point seal prior to collecting the samples. Prior to testing and collecting samples, the surface immediately surrounding the polyethylene tubing of the vapor implant was sealed using a 1 foot ft by 1 ft square sheet of 2 mil HDPE plastic firmly adhered to a wetted layer of granular bentonite. The seal was then tested by enriching the air space above the seal with a tracer gas (helium) while continuously monitoring air drawn from the implant with a helium detector (Dielectric Model MGD-2002, Multi-Gas Detector) for a minimum of 15 minutes. The tracer gas test procedure was employed at all six soil sampling locations. No surface seal leaks were observed at any of the locations.

Following verification that the surface seal was tight, one to three volumes (i.e., the volume of the sample probe and tube) of air was purged from the implant using a calibrated vacuum pump. After purging, a 6-liter Summa® canister, fitted with a 2-hour flow regulator, was attached to the surface tube of each of the vapor implants and sub-slab soil gas probes. Prior to initiating sample collection, sample identification, canister number, date and start time were recorded on tags attached to each canister and in a bound field note book. Sampling then proceeded by fully opening the flow control valve on each canister in turn. Immediately after opening the flow control valve on a canister, the initial vacuum (inches of mercury) was recorded in the field book and on the sample tag. When the vacuum level in the canister was between 5 and 8 inches of mercury (approx 2 hours), the flow controller valve was closed, and the final vacuum recorded in the field notebook and on the sample tag.

The sample identification, date, start time, start vacuum, end time and end vacuum were recorded on tags attached to each canister and on a sample log sheet (Attachment D). Sample SV3 was submitted to the laboratory with zero canister pressure. Samples were submitted to Phoenix for laboratory analysis of VOCs EPA Method TO-15.

### Chemical Analysis

Chemical analytical work presented in this RIR has been performed in the following manner:

Factor	Description
Quality Assurance Officer	The chemical analytical quality assurance is directed by Phoenix Environmental Laboratories
Chemical Analytical Laboratory	Chemical analytical laboratory(s) used in the RI is NYS ELAP certified and was Phoenix Environmental Laboratories
Chemical Analytical Methods	Soil and groundwater analytical methods: <ul style="list-style-type: none"> <li>• TAL Metals by EPA Method 6010C (rev. 2007);</li> <li>• VOCs by EPA Method 8260C (rev. 2006);</li> <li>• SVOCs by EPA Method 8270D (rev. 2007);</li> <li>• Pesticides by EPA Method 8081B (rev. 2000);</li> <li>• PCBs by EPA Method 8082A (rev. 2000);</li> </ul> Soil vapor analytical methods: <ul style="list-style-type: none"> <li>• VOCs by TO-15 VOC parameters.</li> </ul>

## **Results of Chemical Analyses**

Laboratory data for soil, groundwater and soil vapor are summarized in Tables 2 through 10. Laboratory data deliverables for all samples evaluated in this RIR are provided in digital form in Attachment E.

## 5.0 ENVIRONMENTAL EVALUATION

### 5.1 Geological and Hydrogeological Conditions

#### Stratigraphy

The stratigraphy of the Site from the surface down consists of a layer of historic fill material that extends to depths as great as 10 feet below grade, underlain by native brown sand with rocks.

#### Hydrogeology

A table of water level data for monitoring wells MW1, MW2, and MW3 is included in Table 1. The average depth to groundwater is 40 feet. Groundwater flow is generally west-northwest.

### 5.2 Soil Chemistry

Data collected during the RI is sufficient to delineate the vertical and horizontal distribution of contaminants in soil/fill at the Site. A summary table of data for chemical analyses performed on soil samples is included in Table 2 through 5. Laboratory results from the RI were compared to NYSDEC Part 375 Table 375-6.8(a) and (b) Soil Cleanup Objectives (SCOs) for Unrestricted Use and Restricted Residential Use. A copy of the laboratory report for the soil samples is provided in Attachment D. Figure 6 shows the location and posts the values for soil/fill from the RI that exceeds UUSCOs and RRSCO.

Data collected during the RI showed only one VOC, acetone (max. of 72 ppb), detected above Unrestricted Use SCOs in one shallow sample. Several petroleum-related VOCs, including 1,2,4-trimethylbenzene (max 1.8 µg/kg) and toluene (max 32 µg/kg), were detected at low levels, all below Unrestricted Use SCOs. No PCBs were detected in any of the soil samples. Five SVOCs, including benz(a)anthracene (max of 3,500 µg/kg), benzo(a)pyrene (max of 2,700 µg/kg), benzo(b)fluoranthene (max of 3,500 µg/kg), dibenz(a,h)anthracene (max of 370 µg/kg), and indeno(1,2,3-cd)pyrene (max of 1,400 µg/kg), were detected above their respective Restricted Residential Use SCOs within three of the shallow soil samples collected from the historic fill layer. The pesticides 4,4'-DDE (49 µg/kg) and 4,4'-DDT (maximum of 76 µg/kg) were found in three of the shallow soil samples exceeding Unrestricted Use SCOs. Several metals including barium (maximum of 406 mg/kg), chromium (maximum of 35.1 mg/kg), copper (maximum of 95.1 mg/kg), lead (maximum of 691 mg/kg), mercury (maximum of 4.15 mg/kg), nickel (41.7 mg/kg), and zinc (maximum of 423 mg/kg) exceeded Unrestricted Use SCOs within shallow soil

samples. Of these metals, barium, lead and mercury also exceeded Restricted Residential Use SCOs. Overall, the soil results were consistent with data identified at sites with historic fill material in NYC.

### 5.3 Groundwater Chemistry

Data collected during the tank investigation performed in February of 2014, and supplemental RI performed in March of 2014 is sufficient to delineate the distribution of contaminants in groundwater at the Site. A summary table of data for chemical analyses performed on groundwater samples collected at the Site is included in Tables 6 through 10. Figure 7 shows the location and posts the values for groundwater that exceed the New York State 6NYCRR Part 703.5 Class GA Groundwater Quality Standards (GQS). A copy of each of the laboratory reports for the groundwater samples is provided in Attachment D.

Groundwater samples collected during the RI showed no PCBs at detectable concentrations. One pesticide, chlordane (0.11 µg/L) was detected above GQS. The chlorinated VOC tetrachloroethene (max of 40 µg/L) was detected in MW1 and MW2 above GQS in February of 2014, and MW1, MW2 and MW3 in March of 2013. The chlorinated VOC trichloroethene (max of 19 µg/L) was detected above GQS in MW2 in February of 2014 and March of 2015. Petroleum related VOCs, including 1,2,4-trimethylbenzene (max of 28 µg/L), m&p-xylenes (max of 27 µg/L), naphthalene (max of 11 µg/L), n-butylbenzene (max of 9.3 µg/L), and sec-butylbenzene (max 21 µg/L) were detected above GQS in MW2 and GW2. Other VOCs including 1,1-dichloroethane (0.27 µg/L), 1,3,5-trimethylbenzene (max of 4.4 µg/L), 2-isopropyltoluene (max of 2.1 µg/L), acetone (max of 39 µg/L), carbon disulfide (1.1 µg/L), chloroform (max of 3.2 µg/L), chloromethane (0.35 µg/L), cis-1,2-dichloroethene (max of 2.3 µg/L), ethylbenzene (max of 1.3 µg/L), isopropylbenzene (max of 4.7 µg/L), methyl ethyl ketone (max of 6 µg/L), n-propylbenzene (max of 3.7 µg/L), o-xylene (0.56 µg/L), p-isopropyltoluene (20 µg/L), toluene (0.98 µg/L), and trans-1,2-dichloroethene (0.29 µg/L) were detected at concentrations below their respective GQS. Five SVOCs were detected above GQS including benz(a)anthracene (max of 0.25 µg/L), benzo(b)fluoranthene (0.42 µg/L), benzo(k)fluoranthene (max of 2.2 µg/L), chrysene (max of 0.07 µg/L), and indeno(1,2,3-cd)pyrene (max of 0.26 µg/L). Four dissolved metals were detected in groundwater at levels above GQS including iron (max of

7.36 µg/L), magnesium (max of 38 mg/L), manganese (max of 8.42 mg/L), and sodium (max of 96.5 µg/L).

#### **5.4 Soil Vapor Chemistry**

Data collected during the RI is sufficient to delineate the distribution of contaminants in soil vapor at the Site. A summary table of data for chemical analyses performed on soil vapor samples is included in Table 10. Soil vapor analytical results were compared to New York State Department of Health (NYSDOH) Final Guidance on Soil Vapor Intrusion (October 2006) Matrix 1 and 2 guidance values. Figure 8 shows the location and posts the values for soil vapor samples with detected concentrations of NYSDOH Matrix 1 and 2 compounds.

Data collected during the RI indicated petroleum related VOCs were present at low concentrations. Total concentrations of petroleum-related VOCs (BTEX) ranged from 19.87 µg/m<sup>3</sup> to 68.39 µg/m<sup>3</sup>. The CVOC trichloroethylene (TCE) was detected in three of the samples at a maximum concentration of 0.9 µg/m<sup>3</sup>. Tetrachloroethylene (PCE) was detected in all six soil gas samples ranging in concentration from 0.71 to 20.3 µg/m<sup>3</sup>. Carbon tetrachloride (maximum of 0.45 µg/m<sup>3</sup>) was detected within four of the six soil gas samples, and 1,1,1-trichloroethane (TCA) was not detected in any of the soil gas samples. All four chlorinated VOC concentrations are below the monitoring level ranges established within the NYSDOH Final Guidance on Soil Vapor Intrusion.

#### **5.4 Prior Activity**

Based on an evaluation of the data and information from the RIR, disposal of significant amounts of hazardous waste is not suspected for the Site.

#### **5.5 Impediments to Remedial Action**

There are no known impediments to remedial action at this property.

## EXECUTIVE SUMMARY

Environmental Business Consultants (EBC) prepared this Phase I Environmental Site Assessment (ESA) for the following property on behalf of the Rabsky Group: 948 Myrtle Avenue, Brooklyn, New York, 11206. The purpose of the Phase I ESA was to identify and evaluate the presence of recognized environmental conditions at the Site. Recognized environmental conditions are the presence or likely presence of any hazardous substance or petroleum product under conditions that indicate an existing release, a past release or material threat of a release of any hazardous substance or petroleum product into structures on the property or into the ground, groundwater or surface water of the property.

The work was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard E 1527-05 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process), 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final Rule), and EBC's proposal for services.

The Site consists of three contiguous lots located on the south side of Myrtle Avenue and the west side of Throop Avenue in the Williamsburg Section of the Borough of Brooklyn, City of New York, Kings County, New York. The Street address associated with the Site is 938-948 Myrtle Avenue and 258 Throop Avenue, Brooklyn, New York 11206 and is identified as Block 1756 and Lot(s) 33, 37 & 42 on the New York City (NYC) Tax Map. The lots are rectangular shaped and totaling approximately 30,000 square feet (s.f.) in total with approximately 200 feet of total street frontage on Myrtle Avenue and 200 feet of frontage along Throop Avenue.

EBC was able to establish a history for the property dating back to 1887.

*938 Myrtle Avenue (northwest portion of Site)* - The northwest portion of the Site was occupied by several residential and commercial stores from 1887 to 1950. From 1950 to present day this portion of the Site has been vacant land and is currently utilized for parking

*948 Myrtle Avenue (northeast portion of the Site)*- The northeast portion of the Site was vacant land in 1887. From 1904 to 1918 this portion of the Site was developed with five (5) commercial buildings occupied by stores. From 1935 to 1950 the northeast portion of the site was developed with a single story commercial building which was occupied by a garage. Gasoline tanks were noted on the

southeast side of this structure. From 1965 to present day this portion of the Site has been occupied by a commercial store; currently a Key Food Supermarket and a two-story mixed use residential and commercial building with basement currently occupied by Eliza Coffee Shop.

*258 Throop Avenue (south portion of Site)* - The southern portion of the Site was vacant land in 1887. In 1904, this portion of the site was occupied by a coal and wood yard; S Tuttle Sons & Co. In 1918, a portion of a storage structure occupies the southwest side of the Site. From 1935 to 1947, the southern portion of the Site was developed with a single story garage. From 1965 to 1986, this portion of the Site was developed with a single story commercial occupied as a garage and a filling station. In 1987, the southern portion of the Site was developed in its current configuration of one single story commercial building and was occupied as a garage. Since 1987 to present day, this portion of the Site has remained in this configuration and is currently occupied as a warehouse for Key Foods Supermarket.

### **RECOGNIZED ENVIRONMENTAL CONDITIONS**

Based upon reconnaissance of the Site and surrounding properties, interviews and review of historical records and regulatory agency databases, *this assessment has revealed two (2) recognized environmental conditions in connection with the Site and is further discussed below:*

- The southern portion of the Site (258 Throop Avenue) was occupied by a filling station from approximately 1965 to 1986. Filling stations are typically equipped with gasoline and or waste oil USTs. The Site was not identified on the regulatory database or the NYS DEC bulk storage database in connection with any USTs. No information regarding removal of USTs was available. The current status and location of the USTs is unknown. The former occupancy of the Site as a filling station and possible presence of USTs represents a recognized environmental concern.
- Historical Sanborn maps indicate that the northeastern side (948 Myrtle Avenue) of the Site was equipped with two gasoline USTs during the time period of 1935 to 1950. The Site was not identified on the regulatory database or the NYS DEC bulk storage database in connection with any USTs. No information regarding removal of USTs was available. The current status of the USTs is unknown. The lack of information regarding the removal, closure, confirmation soil and ground water sampling represents a recognized environmental concern.

EBC recommends a ground penetrating radar (GPR) survey and Phase II investigation in the areas of the former filling station (258 Throop Avenue) and two gasoline USTs noted within historical Sanborn maps on the east side of the northeastern side (948 Myrtle Avenue) of the Site to determine if an impact to the sub-surface exists.

### **ADDITIONAL ENVIROMENTAL ISSUES**

Both lots have been assigned an E-designation (E-285) for Hazmat, Air and Noise as part of the Bedford Stuyvesant North Rezoning action completed by the City in October 2012 (CEQR 12DCP156Y).

An E-designation does not interfere with the present use of the Site; however E-designations do prevent the release of building permits subject to a detailed environmental review and release by the NYC Office of Environmental Remediation. Such release may require a full subsurface investigation, remedial and health and safety planning, implementation of a remedial program and documentation that the remedial program was completed during redevelopment of the property.

Typical NYCOER Phase II investigation/sampling requirements for hazmat “E” sites are as follows:

- Collection and laboratory analysis of for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), target analyte list (TAL) metals, PCBs and pesticides.
- Collection and laboratory analysis of groundwater samples for VOCs, SVOCs, TAL metals (filtered and unfiltered), PCBs and pesticides.
- Collection and laboratory analysis of soil gas samples for laboratory analysis of VOCs via EPA Method TO-15.

The Noise E requires that any new building constructed on the property include a window wall system which will achieve a noise attenuation of 28 dBA to maintain a maximum interior noise level of 45 dBA. An alternate means of ventilation such as through the wall or central air conditioning will also be required to maintain a closed window condition. Satisfaction of the Noise E requires the submission of a Noise Remedial Action Plan and an Installation Report certified by a Professional Engineer or Registered Architect.

The Air E requires any new residential or commercial development to ensure that heating, ventilation and air conditioning use natural gas for space heating and hot water.

Additional information regarding “E” sites can be found on the New York City Office of Environmental Remediation website:

[http://www.nyc.gov/html/oer/html/e\\_designation/e\\_designation.shtml](http://www.nyc.gov/html/oer/html/e_designation/e_designation.shtml)

### *Asbestos and Lead Based Paint*

Based on the date of construction, asbestos containing materials (roof, roof flashing, other concealed materials) and or lead based paint may be present. All suspect materials were noted to be in good to fair condition. Prior to any renovations or demolition of the building, an asbestos and lead based paint survey would be needed to determine the asbestos and or lead based paint content of suspect materials.

## 1.0 INTRODUCTION

### 1.1 Purpose

Environmental Business Consultants (EBC) prepared this Phase I Environmental Site Assessment (ESA) for the following property on behalf of the Rabsky Group: 948 Myrtle Avenue, Brooklyn, NY, 11206 (**Figure 1**). The purpose of the Phase I ESA was to identify and evaluate the presence of recognized environmental conditions at the Site. Recognized environmental conditions are the presence or likely presence of any hazardous substance or petroleum product under conditions that indicate an existing release, a past release or material threat of a release of any hazardous substance or petroleum product into structures on the property or into the ground, groundwater or surface water of the property.

### 1.2 Scope of Services

The assessment consisted of a visual inspection of the site and surrounding areas, interviews, a review of historical information and maps, and a review of pertinent local, state, federal and facility records. Environmental Data Resources (EDR) of Southport, Connecticut, provided the following information: a computerized database search of environmental compliance records of sites within an ASTM standard radius of the property, a Sanborn fire insurance map search, and a historical telephone directory search.

EBC reviewed the environmental database report compiled by EDR as a part of the assessment. The purpose of the review was to identify reported listings for the Site or other properties in the site vicinity. Databases reviewed included federal and state lists of known or suspected contaminated sites, lists of known handlers or generators of hazardous waste, lists of known waste disposal facilities, and lists of aboveground and underground storage tanks (ASTs and USTs). EBC's review of the database has been incorporated into this report along with a copy of the EDR report.

The work was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard E 1527-05 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process), 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final Rule), and EBC's proposal for services.

### **1.3 Significant Assumptions**

EBC has made the following assumptions in the preparation of this report:

1. Groundwater – The depth to groundwater at the Site is approximately 40 feet below grade surface (bgs). Groundwater is expected to flow to the northwest, consistent with the regional trend.
2. Regulatory Records Information – EBC assumes that all information provided by EDR regarding the regulatory status of facilities within the ASTM Standard approximate minimum search distance is complete, accurate and current.
3. Other - EBC assumes that all information provided through interviews is complete and unbiased.

### **1.4 Limitations and Exceptions**

The conclusions presented in this report are professional opinions based on the data described in this report. These opinions have been arrived at in accordance with currently accepted engineering and hydrogeologic standards and practices applicable to this location, and are subject to the following inherent limitations:

1. The data presented in this report are from visual inspections, examination of records in the public domain, and interviews with individuals having information about the site. The passage of time, manifestation of latent conditions, or occurrence of future events may require further exploration of the site, analysis of data, and re-evaluation of the findings, observations, and conclusions presented in this report.
2. The data reported and the findings, observations, and conclusions expressed are limited by the scope of work. The scope of work was defined by the request of the client.
3. No warranty or guarantee, whether expressed or implied, is made with respect to the data reported, findings, observations, or conclusions. These are based solely upon site conditions in existence at the time of the investigation, and other information obtained and reviewed by EBC.
4. EBC's Phase I ESA report presents professional opinions and findings of a scientific and technical nature. While attempts were made to relate the data and findings to applicable environmental laws and regulations, the report shall not be construed to offer legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, or

regulations, or policies of federal, state, or local government agencies. EBC does not assume liability for financial or other losses or subsequent damage caused by or related to any use of this document.

5. The conclusions presented in this report are professional opinions based on data described in this report. They are intended only for the purpose, site location, and project indicated. This report is not a definitive study of contamination at the site and should not be interpreted as such.
6. This report is based, in part, on information supplied to EBC by third-party sources. While efforts have been made to substantiate this third-party information, EBC cannot attest to the completeness or accuracy of information provided by others.

### **1.5 Special Terms and Conditions**

Authorization to perform this assessment was given by a proposal for services between the Rabsky Group and EBC.

### **1.6 User Reliance**

This report was prepared for the exclusive use of the Rabsky Group; no other party may use the report without the written authority of EBC.

## 2.0 PROPERTY DESCRIPTION AND PHYSICAL SETTING

### 2.1 Location and Legal Description

The Site consists of three contiguous lots located on the south side of Myrtle Avenue and the west side of Throop Avenue in the Williamsburg Section of the Borough of Brooklyn, City of New York, Kings County, New York. The Street address associated with the Site is 938-948 Myrtle Avenue and 258 Throop Avenue, Brooklyn, New York 11206 and is identified as Block 1756 and Lot(s) 33, 37 & 42 on the New York City (NYC) Tax Map. The lots are rectangular shaped and totaling approximately 30,000 square feet (s.f.) in total with approximately 200 feet of total street frontage on Myrtle Avenue and 200 feet of frontage along Throop Avenue.

According to the most recent deed, obtained from the New York City Registrar, and dated May 15, 1998 the current owner of the Site was identified as 948 Myrtle Avenue Corp. (936-948 Myrtle Avenue and 258 Throop Avenue). Copies of the deeds are attached in **Appendix B**.

### 2.2 Site Characteristics

The northwest portion of the Site at 938 Myrtle Avenue is developed as a parking lot. The northeast portion of the Site located at 948 Myrtle Avenue is developed with one single story commercial building occupied by a Key Food supermarket and one (1) two story mixed use commercial building with basement occupied by Eliza cafe and 2nd floor storage area. The south portion of the Site at 258 Throop Avenue is developed with one (1) single-story commercial building occupied as a warehouse for key foods. All structures on Sites are heated by natural gas fired equipment.

Photographs taken during of the Site during the site inspection are attached in **Appendix A**.

#### 2.2.1 Utilities

Electric service for the building is provided by Con-Edison, potable water is supplied by the New York City Department of Environmental Protection (NYCDEP). Sanitary waste for the building is discharged to the New York City municipal sewer system. All heating equipment on Site is powered by natural gas.

## 2.3 Physical Setting

The topography of the site and surrounding area was reviewed from the United States Geological Survey (USGS) 7.5-minute series topographic map for the Brooklyn, New York (NY) Quadrangle (Figure 3), which indicates that the Site has a topographic elevation of approximately 45 feet above mean sea level (amsl). The Site is relatively flat with the general topographic gradient sloping to the northwest.

### 2.3.1 Surface Water

The east river is located approximately 2 mile to the northwest of the Site.

### 2.3.2 Soils

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. Soil maps, based on the State Soil Geographic (STATSGO) Database, are compiled by generalizing more detailed Soil Survey Geographic (SSURGO) database maps.

According to the STATSGO data, the soil component in the vicinity of the Site is identified as Urban Land and is described as having a variable surface texture. The STATSGO database states that additional subordinant soil types may be present in the general vicinity of the Site. These soil types are described as mainly loamy sand and silt loam. Deeper soil types consist of very gravelly, loamy sand, unweathered bedrock and stratified sandy loam.

Additional information regarding the soil classification is also included in on Page A-4 of the Environmental Data Resources, Inc. (EDR) database report (Appendix E).

### 2.3.3 Groundwater

Estimated groundwater levels and flow directions may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or de-watering operations. Generally, groundwater flow typically mimics surface topography and will also tend to flow towards nearby bodies of water. Information contained in the EDR database report, the USGS Water-Table and Potentiometric-Surface Altitudes in the Upper Glacial, Magothy and Lloyd Aquifers Beneath Long

Island, March-April 2006 (**Figure 5**), the USGS web site and topographic map were used to estimate groundwater depth and flow direction.

Based upon a surface elevation of 45 feet amsl, the depth to groundwater in the vicinity of the Site is approximately 40 feet below grade surface (bgs). Groundwater is expected to flow to the northwest consistent with the regional trend.

#### 2.3.4 Radon Risk

Radon is a colorless, radioactive, inert gas formed by the decay of radium and may be present in soils and rocks containing granite, shale, phosphate and pitchblende. The USEPA's Map of Radon Zones for New York State, September 1993, indicates that the Brooklyn area is not a radon risk area. The EDR report provides information from the New York State Department of Health (NYSDOH) radon survey which indicates that 51 radon tests have been conducted in Kings County. Test results indicate average radon concentrations of 0.750 pCi/L (first floor level) and 1.370 pCi/L (basements). Data indicate that approximately twelve percent of basements tested showed results in excess of the 4.0 pCi/L USEPA action level. Based on these data, radon does not likely represent an environmental concern.

### 3.0 PROPERTY USAGE

#### 3.1 Current Property Usage

The northwest portion of the Site at 938 Myrtle Avenue is developed as a parking lot. The northeast portion of the Site located at 948 Myrtle Avenue is developed with one single story commercial building occupied by a Key Food supermarket and one (1) two story mixed use commercial building with basement occupied by a Eliza cafe and 2nd floor storage area. The south portion of the Site at 258 Throop Avenue is developed with one (1) single-story commercial building occupied as a warehouse for key foods. All structures on Sites are heated by natural gas fired equipment.

A review of New York City Department of Buildings (NYCDOB) records and the NYC Department of City Planning Zoning map indicates that the Site is zoned R6 residential and C2-2 commercial (**Figure 5**), and has been since at least September 2012.

#### 3.2 Current Usage of Adjoining/Surrounding Properties

A summary of the uses of the surrounding/adjacent properties is described below. Photos of the exterior of adjacent properties are attached in **Appendix A**.

#### Surrounding Property Usage

Direction	Property Description
North	Residential buildings (65 Tompkins Avenue)
South	Residential dwellings (266 Throop Avenue)
East	Throop Avenue beyond which is vacant land (954 Myrtle Avenue), residential and commercial buildings (243-251 Throop Avenue)
West	Mixed residential and commercial buildings (936 Myrtle Avenue)
South West	Mixed residential and commercial buildings (199 Vernon Avenue)

#### 3.3 Historical Usage of Site and Surrounding Properties

Historical sources researched to determine past usage of the Site and surrounding properties are as follows:

**Sanborn Fire Insurance Maps** - Sanborn fire insurance maps for the Site and surrounding area were reviewed for the years 1887, 1904, 1918, 1935, 1947, 1950, 1965, 1977, 1979, 1980, 1981, 1982, 1984, 1986, 1987, 1989, 1991, 1992, 1993, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006 & 2007. The review is summarized in Section 3.3.1. Copies of Sanborn maps are included as **Appendix C**.

**City Directory Abstract** - A directory of historical telephone listings at the Site and surrounding properties were reviewed from approximately five year intervals for the years 1928 through 2013. The review is summarized in Sections 3.3.2 below. A copy of the City Directory is included in **Appendix D**.

### 3.3.1 Sanborn Fire Insurance Maps - Site and Adjacent Properties

The historical usage of the Site and adjacent properties, identified through Sanborn map review, is summarized below:

#### **1887**

---

##### Subject Site:

The Site is associated with the historical address of 938-952 Myrtle Avenue, 348-364 Throop Avenue and 209 Vernon Avenue. The northwest portion (936 Myrtle Avenue) of the Site is developed with four (4) commercial and residential structures. The commercial buildings are occupied as stores. The northeast and south portions of the Site appear to be vacant land.

##### Adjacent properties:

Myrtle Avenue borders the site to the north, beyond which is developed with commercial buildings occupied by stores. Vacant land borders the Site to the west and southwest. Vernon Avenue borders the site to the south, beyond which is developed with residential buildings. Throop Avenue borders the site to east, beyond which is developed with commercial (occupied as stores) and residential buildings.

#### **1904**

---

##### Subject Site:

The northwest portion of the Site remains unchanged from the 1887 map. The northeast portion of the site is developed with five commercial buildings occupied as offices and stores and one small shed. The south portion of the Site is occupied by S Tuttle Sons and Co. coal and wood yard.

##### Adjacent properties:

The properties adjacent to the north, south and east remain unchanged from the 1887 map. The property adjacent to the southwest is developed with a portion of S Tuttle Son and Co. coal

and wood yard and residential buildings. The property adjacent to the west appears to be vacant land.

---

### ***1918***

#### ***Subject Site:***

The northwest and northeast portions of the Site remain unchanged from the 1904 Sanborn map. The southwest portion of the south side of the Site is occupied by a storage structure.

#### ***Adjacent properties:***

The properties adjacent to the north, south and east remains unchanged from the 1904 map. The property adjacent to the west appears to be developed with a commercial building occupied by a store. The property adjacent to the southwest appears to be developed with a structure utilized for storage.

---

### ***1935***

#### ***Subject Site:***

The northwest portion of the Site remains unchanged from the 1918 map. The northeast side of the Site appears to be developed as a garage with two gasoline tanks on the east side. The south portion of the site appears to be developed as a garage.

#### ***Adjacent properties:***

The properties adjacent to the north, northwest east and south remain unchanged from the 1918 map. The property adjacent to the southwest appears to be developed with residential buildings.

---

### ***1947, 1950***

#### ***Subject Site:***

The northeast and south sides of the Site remain unchanged. The northwest side of the site is developed with two (2) residential and commercial (occupied as a store) buildings.

#### ***Adjacent properties:***

The properties adjacent to the north, east, northwest and southwest remains consistent with the 1935 map. The property adjacent to the south appears to be developed with commercial buildings occupied as stores and a auto garage with a gasoline tank.

**1960, 1965, 1977, 1979, 1980, 1981, 1982, 1984, 1986,**

**Subject Site:**

The northwest side of the site appears to be vacant land. The northeast side of the Site is developed with the current structure and is occupied by a store. The gasoline tanks on this portion of the Site are no longer visible. The south side of the Site is developed with a commercial structure occupied by a garage and filling station.

**Adjacent properties:**

The surrounding properties remain consistent with the 1950 map.

**1987, 1989, 1991, 1992, 1993, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006, 2007**

**Subject Site:**

The Site remains consistent with the 1986 map, with one exception, the filling station on the south side of the Site is no longer visible.

**Adjacent properties:**

The adjacent properties remain consistent with the 1986 Sanborn map.

The historical presence of a filling station from 1965 to 1986 on the south side of the Site and the two (2) gasoline tanks located on the northeast side of the Site from 1935 to 1950 represent a significant environmental concern.

**3.3.2 City Directory Listings**

EDR conducted a search and provided copies of available historical city directory listings for the subject and adjacent properties. The historical city directory listings (**Appendix D**) were reviewed, to identify information regarding past uses of the subject and surrounding properties to determine if historical usage represented a REC to the subject property.

Historical city directory information is summarized as follows:

Date	Property Information
1928	<b>Subject Property:</b> Address Not Listed in Resource Source <b>Adjacent Properties:</b> Residents, ACR Tire & Supply Co (239 Throop)

1934	<b>Subject Property:</b> Bernstein Shoe repair and residents (254 Throop) <b>Adjacent Properties:</b> Residents (239 Throop)
1940	<b>Subject Property:</b> Elkind plumber (254 Throop) <b>Adjacent Properties:</b> Residents (239 Throop)
1949	<b>Subject Property:</b> Jacobs Wm R wines Liquors, Throop Wines and Liquors (254 Throop) <b>Adjacent Properties:</b> Residents (239 Throop)
1960	<b>Subject Property:</b> Jacobs Wm R Wines and Liquor, Throop AV Wines and Liquors Store and Jay Cobb Electronics (254 Throop) <b>Adjacent Properties:</b> Residents (239 Throop), J & S Electrical Sales Corp (241 Throop)
1965	<b>Subject Property:</b> Jacobs Wm R Wines and Liquor, Throop AV Wines and Liquors Store and residents (254 Throop) <b>Adjacent Properties:</b> Residents (239 Throop)
1970	<b>Subject Property:</b> Jacobs Wm R Wines and Liquor, Throop AV Wines and Liquors Store and residents (254 Throop) <b>Adjacent Properties:</b> Residents (239 Throop)
1973	<b>Subject Property:</b> Throop AV Wines and Liquors Store (254 Throop) <b>Adjacent Properties:</b> Residents (239 Throop), Giulini Charles Attorney, J & G Brokerage Inc, Jacobs Albert Attorney
1976	<b>Subject Property:</b> Throop AV Wines and Liquors Store (254 Throop) <b>Adjacent Properties:</b> Residents (239 Throop), J & E Brokerage , Jacobs Albert P Attorney, Rubenstein Sanford Attorney, and residents (243 Throop),
1980	<b>Subject Property:</b> Throop AV Wines and Liquors Store (254 Throop) <b>Adjacent Properties:</b> J & E Brokerage , Jacobs Albert P Attorney, Rubenstein Sanford Attorney (243 Throop)
1985	<b>Subject Property:</b> Address Not Listed in Resource Source <b>Adjacent Properties:</b> J & E Brokerage , Jacobs Albert P Attorney (243 Throop)
1992	<b>Subject Property:</b> Eliza Coffee Shop (254 Throop) <b>Adjacent Properties:</b> Mike Bernier Realty Corp (241 Throop)
1997	<b>Subject Property:</b> Eliza Coffee Shop (254 Throop) <b>Adjacent Properties:</b> Address Not Listed in Resource Source
2005	<b>Subject Property:</b> Eliza Coffee Shop (254 Throop) <b>Adjacent Properties:</b> Josie Place (241 Throop)
2008	<b>Subject Property:</b> Eliza Coffee Shop (254 Throop) <b>Adjacent Properties:</b> Josie Place (241 Throop)
2013	<b>Subject Property:</b> Eliza Coffee Shop (254 Throop) <b>Adjacent Properties:</b> Josie Place (241 Throop)

Note: Address numbers in ( ) are located on Steuben Street

Information regarding additional surrounding properties identified on the City Directory search is included with the search in **Appendix D**. The city directory indicated that 254 Throop Avenue; the northeast portion of the Site was occupied by various commercial tenants including Bernstein Shoe repair , Elkind plumber Jacobs Wm R Wines and Liquor, Throop AV Wines and Liquor Store, Eliza Coffee Shop 1934 to 2013 and residential tenants from 1934 to 1970.

### 3.3 Site History Summary

EBC was able to establish a history for the property dating back to 1887.

*938 Myrtle Avenue (northwest portion of Site)* - The northwest portion of the Site was occupied by several residential and commercial stores from 1887 to 1950. From 1950 to present day this portion of the Site has been vacant land and is currently utilized for parking

*948 Myrtle Avenue (northeast portion of the Site)*- The northeast portion of the Site was vacant land in 1887. From 1904 to 1918 this portion of the Site was developed with five (5) commercial buildings occupied by stores. From 1935 to 1950 the northeast portion of the site was developed with a single story commercial building which was occupied by a garage. Gasoline tanks were noted on the southeast side of this structure. From 1965 to present day this portion of the Site has been occupied by a commercial store; currently a Key Food Supermarket and a two-story mixed use residential and commercial building with basement currently occupied by Eliza Coffee Shop.

*258 Throop Avenue (south portion of Site)* - The southern portion of the Site was vacant land in 1887. In 1904, this portion of the site was occupied by a coal and wood yard; S Tuttle Sons & Co. In 1918, a portion of a storage structure occupies this portion of the Site. From 1935 to 1947, the southern portion of the Site was developed with a single story garage. From 1965 to 1986, this portion of the Site was developed with a single story commercial building occupied as a garage and a filling station. In 1987, the southern portion of the Site was developed in its current configuration of one single story commercial building occupied as a garage. Since 1987 to present day, this portion of the Site has remained in this configuration and is currently occupied as a warehouse for Key Foods Supermarket.

## **4.0 USER PROVIDED INFORMATION**

### **4.1 Title Records**

As of the date of this report the user has not requested that EBC perform a title search.

### **4.2 Environmental Liens**

An environmental lien is a charge, security or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup or other remediation of hazardous substances or petroleum products upon a property, including, but not limited to, liens imposed pursuant to CERCLA 42 USC § 9607 (1) & 9607(r) and similar state and local laws.

The user has not made EBC aware of any environmental liens against the Site and has not requested that EBC perform an environmental lien search for the Site.

### **4.3 Specialized Knowledge**

The user has not made EBC aware of any specialized knowledge regarding the chemicals or processes formerly in use at the Site or surrounding property.

### **4.4 Commonly Known or Reasonably Ascertainable Information**

The user has not made EBC aware of any commonly known or reasonably ascertainable information regarding the past uses of the Site, specific chemicals in use at the Site or any spills, chemical releases or environmental cleanups at the Site.

### **4.5 Valuation Reduction for Environmental Issues**

The user has not made EBC aware of any valuation reduction regarding the sale price of the property.

### **4.6 Owner, Property Manager and Occupant Information**

According to New York City Department of Finance records, the current owner of the site is identified as 948 Myrtle Avenue Corp.

### **4.7 Reason for Performing Phase I ESA**

The Phase I ESA was performed to identify recognized environmental conditions at the Site as part of the due diligence to support the acquisition of the property by The Rabsky Group.

## 5.0 RECORDS REVIEW

### 5.1 Standard Environmental Record Sources

Environmental Data Resources (EDR) of Southport, Connecticut was retained to provide a computerized database search of the project area within an ASTM-standard radius of the Site. A list of the databases searched and the search radius is shown on the summary table below. EBC reviewed the database output to determine if the property appears on any of the regulatory agency lists. Detailed information concerning each database list is provided in the EDR report (**Appendix E**). A summary of standard environmental record sources researched is as follows:

#### 5.1.1 Federal Databases

The table below summarizes the Federal databases that were searched.

**Federal Databases Searched**

Agency	Listing Name or Database Searched	Abbreviation	Search Distance
USEPA	National Priority List	NPL	1.0 mile
USEPA	National Priority List Deletions	Delisted NPL	1.0 mile
USEPA	Comprehensive Environmental Response Compensation and Liability Act Registry	CERCLIS	0.5 mile
USEPA	CERCLIS No Further Remedial Action Planned	CERCLIS-NFRAP	0.5 mile
USEPA	Resource Conservation and Recovery Act Corrective Action Activity	CORRACTS	1.0 mile
USEPA	Resource Conservation and Recovery Act Treatment/Storage/Disposal Facilities	RCRA TSD	0.5 mile
USEPA	Resource Conservation and Recovery Act Small/Large Quantity Hazardous Waste Generators	RCRA SQG/LQG	Site and Adjoining
USEPA	Federal Institutional/Engineering Control registries	US INST/ENG Controls	Site
USEPA	Emergency Response Notification System	ERNS	Site
USEPA	Superfund (CERCLA) Consent Decrees	CONSENT	1.0 mile
USEPA	Records of Decision	ROD	1.0 mile
USEPA	Mines Master Index	MINES	0.25 mile

**Federal NPL List** - The National Priority List (NPL) is the United States Environmental Protection Agency (USEPA) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the federal Superfund Program.

*Findings:* The Site is not listed as an NPL facility. No NPL sites were identified within a 1-mile radius of the Site.

**Federal Delisted NPL List** – NPL Delisted Sites are former NPL sites that have been remediated and removed from the USEPA’s priority list. Sites are deleted where the USEPA has determined that no further response is appropriate.

*Findings:* The Site is not identified as a Delisted NPL facility. There were no Delisted NPL sites identified within a one-mile radius of the Site.

**Federal CERCLIS List** - The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) list is a compilation of sites that the USEPA has investigated or is currently investigating for a release or threatened release of hazardous substances.

*Findings:* The Site is not listed as a CERCLIS facility. No CERCLIS sites were listed within a half-mile radius of the Site.

**Federal CERCLIS-NFRAP List** – No Further Remedial Action Planned (NFRAP) sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of USEPA’s knowledge, assessment at a site has been completed and that USEPA has determined no further steps will be taken to list this site on the National Priorities List (NPL).

*Findings:* The Site is not listed as a CERCLIS-NFRAP facility. One (1) CERCLIS-NFRAP site was identified within a half mile radius of the Site. This site is located in excess of ¼-mile from the site and is hydraulically down gradient. Based on this information this site is not expected to represent a significant environmental concern.

**Federal RCRA CORRACTS List** - The RCRA Corrective Actions (CORRACTS) database is the USEPA’s list of hazardous waste treatment, storage or disposal facilities subject to corrective action under RCRA.

*Findings:* The Site is not listed as a RCRA CORRACTS facility. Two (2) RCRA CORRACTS sites were identified within a one mile radius of the Site. These sites are located in excess of 1/4-

mile from the Site and are hydraulically down gradient. Based on the distance from the Site and inferred direction of ground water flow, these sites are not expected to represent a significant environmental concern.

**Federal RCRA Treatment, Storage and Disposal Facilities** - The USEPA Resource Conservation and Recovery Act (RCRA) program identifies reporting facilities that treat, store or dispose of hazardous waste.

*Findings:* The Site is not listed as a RCRA TSDF and no TSDFs were identified within a ½ mile radius of the Site.

**Federal RCRA Generators** - The RCRA Generators database is a compilation of reporting facilities that generate hazardous waste. A LQG is a site which generates more than 1,000 kilograms (kg) of hazardous waste during any one calendar month and can store waste on-site for up to 90 days. A SQG is a site which generates more than 100 and less than 1,000 kg of hazardous waste during any one calendar month and accumulates less than 6,000 kg of hazardous waste at any time; or a site which generates less than 100 kg of hazardous waste during any one calendar month and accumulates less than 1,000 kg of hazardous waste at any time. A CESQG is a site which generates less than 100 kg of hazardous waste or less than one kg of acutely hazardous waste during any one calendar month. A NonGen site is a former registered/regulated generator which does not presently generate hazardous waste.

*Findings:* The Site is not listed as a RCRA-LQG, RCRA-SQG, RCRA-NonGen or RCRA-CESQG facility. No RCRA-LQG, six (6) RCRA-SQG, four (4) RCRA-CESQG and four (4) RCRA NonGen facilities were identified within a 1/4 mile radius of the Site. None of these sites are located adjacent to the Site. According to the EDR database, no violations are listed or corrective action has been taken for any of these sites. Based on this information, these sites are not expected to represent a significant environmental concern.

**Federal Institutional/Engineering Controls** – Federal Institutional/Engineering Controls databases list sites with institutional/engineering controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and

post remediation care requirements intended to prevent exposure to contaminants remaining on site. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

*Findings:* No Federal Institutional/Engineering Controls were listed for the Site and no sites were identified within a ½ mile radius of the Site.

**Federal Emergency Response Notification System** - The Emergency Response Notification System (ERNS) is national database used collect information on reported releases of oil or hazardous substances.

*Findings:* Neither Site nor the adjacent properties were identified in the ERNS databases.

**Federal Superfund Consent Decrees** - The Superfund Consent Decrees (CONSENT) list identifies major legal settlements that establish responsibility and standards for cleanup at NPL sites.

*Findings:* The Site was not identified in the CONSENT database. No sites within a one mile of the Site were identified in the CONSENT database.

**Federal Records of Decision** - Record of Decision (ROD) documents mandate a permanent remedy at an NPL site containing technical and health information to aid in the cleanup.

*Findings:* The Site was not identified as a ROD site. No sites within a one mile of the Site were identified in the ROD database.

**Federal Master Mines Index** - The Master Mines Index (MINES) file contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

*Findings:* Neither the Site nor any property within ¼ mile of the Site is listed in the MINES database.

#### 5.1.2 New York State Databases

The table below summarizes the State databases that were searched.

### New York State Databases Searched

Agency	Listing Name or Database Searched	Abbreviation	Search Distance
NYSDEC	Inactive Hazardous Waste Disposal Sites in New York State	SHWS	1.0 mile
NYSDEC	Solid Waste Facility Register	SWF	0.5 mile
NYSDEC	Registered Recycling Facilities	SWRCY	0.5 mile
NYSDEC	Registered Waste Tire Storage Facilities	SWTIRE	0.5 mile
NYSDEC	Leaking Underground Storage Tank Sites	LTANKS	0.5 mile
NYSDEC	Petroleum Bulk Storage (PBS)	UST/AST	Site and Adjoining
NYSDEC	Chemical Bulk Storage (CBS)	CBS AST/UST	Site and Adjoining
NYSDEC	Institutional/Engineering Control registries	INST/ENG Controls	Site
NYSDEC	Voluntary Cleanup Agreements	VCP	0.5 mile
NYSDEC	Brownfield sites	Brownfields	0.5 mile
NYSDEC	Major Oil Storage Facilities	MOSF	0.5 mile
NYSDEC	New York State Spills	NYSPILLS	0.125 mile
NYSDEC	Dry Cleaner Site	Drycleaners	0.25 mile

**NYS Inactive Hazardous Waste Disposal Sites** - The New York State Department of Environmental Conservation (NYSDEC) maintains a state priority list of Inactive Hazardous Waste Disposal Sites (SHWS) considered to be actually or potentially contaminated and presenting a possible threat to human health and the environment. Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance/waste sites.

*Findings:* The Site is not listed as a SHWS site. No SHWS facilities were identified within a one mile radius of the Site.

**NY Vapor Reopened** – This is a database listing of previously dismissed/closed sites that are being re-evaluated with current knowledge of the potential for soil vapor intrusion.

*Findings:* The Site is not listed as a NY VAPOR REOPENED site. No NY VAPOR REOPENED facilities were identified within a one mile radius of the Site.

**Hazardous Substance Waste Disposal Sites** - The Hazardous Substance Waste Disposal Sites (HSWDS) list includes any known or suspected hazardous substance waste disposal sites. Also included are sites de-listed from the Registry of Inactive Hazardous Waste Disposal Sites list and non-Registry sites that USEPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared.

*Findings:* The Site is not listed on the HSWDS database. One (1) HSWDS site was identified within a half- radius of the Site. This site is located in excess of ¼-mile from the site and is hydraulically down gradient. Based on this information, this site is not expected to represent a significant environmental concern.

**NYS Landfill** - The NYSDEC Solid Waste Facility Register records contain an inventory of solid waste disposal facilities or landfills in New York State.

*Findings:* The Site is not listed as a landfill. One (1) NYS Landfill site was identified within a half mile radius of the Site. This site is not located adjacent to the Site and is hydraulically cross gradient from the Site. Based on the relative distance and the inferred direction of groundwater flow, this site is not expected to represent a significant environmental concern.

**NYS Registered Recycling Facilities** - The Registered Recycling Facilities List (SWRCY) is a NYSDEC list of recycling facilities.

*Findings:* The Site is not listed as a SWRCY site. No SWRCY sites were identified within a ½ mile radius of the Site.

**NYS Registered Waste Tire Storage Facilities** - The Registered Recycling Facilities List (SWTIRE) is a NYSDEC list of Registered Waste Tire Storage & Facility List.

*Findings:* The Site is not listed as a SWTIRE site. There were no SWTIRE sites identified within a ½ mile radius of the Site.

**NYS Leaking Underground Storage Tank Sites** - The Leaking Underground Storage Tank Sites (LTANKS) database contains a NYSDEC inventory of reported leaking storage tank incidents. They

can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

- *Findings:* The Site was not identified as a LTANKS site. Twenty two (22) LTANK sites were identified within ½ mile of the Site. All of these sites are located in excess of 1/8-mile from the Site. Eighteen (18) of these sites have received closure from the NYSDEC. Four (4) sites, located in excess of 1/8-mile from the Sites are open and are hydraulically cross or down gradient from the Site. Based on the relative distance and inferred direction of ground water flow, these sites not expected to represent a significant environmental concern.

**NYS Petroleum Bulk Storage** - The NYSDEC Petroleum Bulk Storage - Underground Tanks (UST) database lists facilities with a petroleum storage capacity of more than 1,100 gallons and less than 400,000 gallons. The NYSDEC Petroleum Bulk Storage - Aboveground Tanks (AST) database lists facilities with registered above ground storage tanks.

*Findings:* The Site is not listed as a UST, Hist UST site, TANKS site, AST or Hist AST site. Six (6) UST sites, two (2) HIST UST sites, and ten (10) AST sites are registered within a ¼ mile radius of the Site. None of the UST, Hist UST, TANKS or AST sites are located adjacent to the Site. Properties with registered ASTs or USTs do not necessarily pose a hazard unless the tanks are leaking or a spill occurs. Most tanks in the area hold home heating oil for on-site boilers and furnaces. Sites with leaking tanks or spills are addressed in the appropriate section.

**NYS Chemical Bulk Storage** - The Chemical Bulk Storage (CBS) database is a NYSDEC list of facilities that store regulated hazardous substances in aboveground tanks (AST) with capacities of 185 gallons or greater or underground tanks (UST) of any size.

*Findings:* The Site is not identified as a CBS facility. No CBS facilities were identified within a ¼ mile radius of the Site.

**NYS Institutional/Engineering Controls** – NYSDEC list of Environmental Remediation sites with Institutional or Engineering Controls in place.

*Findings:* The Site is not identified in the NYSDEC Institutional/Engineering Controls databases. No sites within a ½ mile of the Site were identified in the NYSDEC Institutional/Engineering Controls databases.

**NYS Voluntary Cleanup Agreements** - The NYSDEC Voluntary Cleanup Program (VCP) database identifies hazardous waste sites undergoing private sector cleanup as part of redevelopment.

*Findings:* The Site was not identified as a VCP site. Three (3) VCP sites were identified within a one-half mile radius of the subject property. All of these sites are located in excess of 1/4-mile from the Site and are all hydraulically down gradient. Based on the relative distance and inferred direction of groundwater flow, these sites are not expected to represent a significant environmental concern.

**NYS Brownfields** - A Brownfield is any real property where redevelopment or re-use may be complicated by the presence or potential presence of a hazardous waste, petroleum, pollutant, or contaminant.

*Findings:* The Site was not identified as a Brownfield site. One (1) Brownfield site is located within ½ mile radius of the Site. This site is located in excess of ¼-mile from the site and is hydraulically down-gradient. Based on this information this site is not expected to represent a significant environmental concern.

**NYS Major Oil Storage Facilities** - The NYSDEC Major Oil Storage Facilities (MOSF) database lists facilities or vessels with a petroleum storage capacity of more than 400,000 gallons.

*Findings:* The Site was not identified as an MOSF site. No MOSF sites were identified within ½ mile of the Site

**NYS Spills** - The New York State Spills Information Database (NY SPILLS) contains data collected on chemical and petroleum spill incidents reported to NYSDEC since April 1, 1986.

*Findings:* The Site is not listed as a NY SPILLS site. Fourteen (14) spill sites were identified within 1/8 mile of the Site. None of these sites are located adjacent to the Site. With the exception of one site, all of these spill listings have received closure from the NYSDEC and do not

represent a significant environmental concern. The open SPILLS listing is further discussed in detail below:

- Tompkins Houses NYCHA at 921 Myrtle Avenue is located 197 feet to the west (hydraulically cross-gradient) of the Site. A release of # 6 fuel oil was reported on October 6, 1993. Two (2) 30,000-gallon fuel oil # 6 USTs were installed in 1963 and removed in 1993. One (1) 30,000-gallon fuel oil # 6 replaced the former UST and 925 cubic yards of contaminated soil was removed from the site. Eleven (11) VOC compounds were identified about standards in soil and five (5) VOC compounds were identified above standards in a site investigation conducted in 1995. No further information regarding this release was available from the regulatory database. Based on the inferred direction of groundwater flow, this site is not expected to represent a significant environmental concern.

**FUDS:** The listing includes locations of formerly used defense sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

*Findings:* The Site is not listed as a FUDS site. No FUDS sites were identified within a one mile radius of the Site.

**MANIFEST:** Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSDF.

*Findings:* The Site is not listed as a MANIFEST site. However, Twenty-six (26) manifest sites were identified within a ¼ mile radius of the Site. None of these sites are located adjacent to the Site and information provided within the EDR report indicates that there are no listed violations or that corrective action has been taken to address the violations listed for these sites. Therefore, it is unlikely that these facilities present a significant environmental risk to the Site, and they are not considered RECs.

**Drycleaner Sites** - The NYSDEC maintains a listing of all registered drycleaners. Drycleaner sites do not necessarily pose a hazard unless a spill occurs. Sites at which spills have been identified are addressed in the appropriate section.

*Findings:* The Site is not identified as drycleaner. Two (2) Drycleaner sites were identified within ¼ mile of the site. These sites are not located adjacent to the Site and information provided within the EDR report indicates that there are no listed violations listed for this site. Based on this information, these sites are not expected to represent a significant environmental risk to the Site.

**NYS Manufactured Gas Plants** - Manufactured gas plants (MGP) were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar, sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

*Findings:* The Site is not identified as an MGP site. Three (3) MGP sites were identified within a one-mile radius of the Site. These sites are located in excess of 1/2-mile from the Site and information provided within the EDR report indicates that there are no listed violations or that corrective action has been taken to address the violations listed for these sites. Based on this information, these sites are not expected to represent a significant environmental risk to the Site.

**E Designation** - The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designation also includes a mandatory construction-related health and safety plan which must be approved by NYCDEP.

*Findings:* The Site is identified as an E Designation site. Five (5) E Designation sites were identified within 1/8-mile of the Site. None of these sites are located adjacent to the Site and

information provided within the EDR report indicates that there are no listed violations or that corrective action has been taken to address the violations listed for these sites. Therefore, it is unlikely that these facilities present a significant environmental risk to the Site, and they are not considered RECs. The Site is further discussed in detail below:

- The Site (Block 1756 Lots 33, 37 and 42) at 938-948 Myrtle Avenue and 258 Throop Avenue was identified as an E Designation site and is assigned the E number of E-285, with the description of “underground gasoline storage tanks testing protocol”, “window wall attenuation and alternate ventilation” and air quality - HVAC fuel limited to natural gas. This designation came into effect on October 11, 2012. 948 Myrtle Avenue Corp was identified as the owner of the Site. No further information was available from the EDR database for review. This listing is further discussed in the previous sections.

**EDR Historical Auto Stations** - EDR has searched selected national collections of business directories and has collected listings of potential gas station/ filling station/ service station sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include gas station/ filling station/ service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station etc.

*Findings:* The Site was not identified as an EDR Historical Auto Station site. Five (5) sites were identified within ¼ mile of the Site. These sites are not located adjacent to the Site and information provided within the EDR report indicates that there are no listed violations or that corrective action has been taken to address the violations listed for this site. Based on this information, these sites are not expected to represent a significant environmental risk to the Site.

**EDR Historical Cleaners** - EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash and dry etc.

*Findings:* The Site was not identified as an EDR Historical Cleaners site. Eight (8) sites were identified within ¼ mile of the Site. These sites are not located adjacent to the Site and information provided within the EDR report indicates that there are no listed violations or that corrective action has been taken to address the violations listed for these sites. Based on this information, these sites are not expected to represent a significant environmental risk to the Site.

## 5.2 Additional Environmental Record Sources

### 5.2.1 Local Agency Review

Freedom of Information Act (FOIA) requests were sent to the New York City Department of Environmental Protection (NYCDEP), New York City Fire Department, New York City Department of Health (NYCDOH) and the New York City Fire Department (FDNY) for information regarding hazardous operations and or other environmental reports/investigations for the Site, including the registration of fuel storage tanks, past spills, or violations. As of the date of this report, a response had not been received for the FOIA request. Regulatory agencies usually take six to eight weeks to process FOIA requests. Any pertinent information received will be reviewed and forwarded upon receipt. Copies of FOIA requests and regulatory agency responses are included in **Appendix B**.

### 5.2.2 New York City Department of Finance

The following is a summary of pertinent information obtained from the New York City Department of Finance website:

Tax Lot:	Block 1756 – Lot No. 33
Address:	938 Myrtle Avenue
Owner:	948 Myrtle Avenue Corp.
Lot Size:	10,000 square feet – rectangular
Building Class:	G7-Garage / Gas Station
Zoning:	Residential (R6) and Commercial (C2-2)
Tax Lot:	Block 1756 – Lot No. 37
Address:	948 Myrtle Avenue

Owner: 948 Myrtle Avenue Corp.  
Lot Size: 10,000 square feet – rectangular  
Building Class: G7-Garage / Gas Station  
Zoning: Residential (R6) and Commercial (C2-2)

Tax Lot: Block 1756 – Lot No. 42  
Address: 258 Throop Avenue  
Owner: 948 Myrtle Avenue Corp.  
Lot Size: 10,000 square feet – rectangular  
Building Class: G7-Garage / Gas Station  
Zoning: Residential (R6) and Commercial (C2-2)

### 5.2.3 New York City Department of Buildings

The Department of Buildings (DOB) computerized Property Profile Overviews (PPOs) were reviewed. Pertinent information regarding Site is summarized below:

#### **938 Myrtle Avenue**

According to the PPO reviewed, thirty-eight (38) actions are listed which consist of; alterations (1916, 1947, 1911, 1912, 1919), building notice (1944, 1993), new building (1949, 1953, 1954, 1962), plumbing (1934, 1941), unsafe building (1908, 1924, 1941), construction (1994), demolition (1905, 1963), fire escape (1903), sign (1903) and oil burner application (1907). A certificate of occupancy (1947) for the storage of plumbing and heating supplies was noted. Four DOB violations were listed as closed for the Site. The site is listed as a E designation site for hazmat. noise and air.

#### **948 Myrtle Avenue**

According to the PPO, one complaint was listed as resolved for the Site. One hundred fourteen (114) actions consisting of; alterations (1912, 1918, 1919, 1937, 1945, 1947, 1950, 1963, 1983, 1984, 1994, 1995) electric sign (1902, 1903, 1904, 1906, 1909, 1924, 1925, 1965, 1966), new building (1907, 1911), plumbing (1903), unsafe building (1925), building notice (1983, 1984, 1995), public assembly (1944, 1963, 1994) and sign (1908). Five (5) DOB violations were listed as closed for the Site. Seven

(7) certificates of occupancy for a garage (1919), garage and gasoline station (1951 and 1974) and supermarket (1966). The site is listed as a E designation site for hazmat. noise and air.

### **258 Throop Avenue**

According to the PPO, sixteen (16) actions consisting of; alterations (1947, 1982) electric sign (1946, 1972), plumbing (1951, 1957) and building notice (1927, 1951, 1967). The site is listed as a E designation site for hazmat. noise and air.

#### *5.2.4 Previous Environmental Reports*

No previous ESAs or information regarding previous environmental investigations/reports for the Site was provided to EBC for review at the time of preparation of this document.

#### *5.2.5 Historic Zoning Map*

A review of the NYC Department of City Planning Zoning Maps for the years 1961 through 2012 indicates that the Site has been zoned residential (R6) and commercial (C8-2) from December 1961 to November 1962, from November 1962 to September 2012 the Site was zoned residential (R6) and commercial (C1-3), from October 2012 to present day the Site has been zoned residential (R6B) and commercial (C2-2). A copy of the December 1961 zoning map is included as **Figure 5B**.

#### *5.2.6 Activity and Use Limitations*

A search was conducted for Activity and Use Limitations (AULs) associated with the subject properties, more specifically Institutional Controls (ICs) and/or Engineering Controls (ECs), which have been placed upon the property as a result of environmental issue identified at the property. In the City of New York, information on such AULs is maintained by the City of New York Department of City Planning (NYCDCP) and is commonly depicted on zoning maps with an “E” designation, as well as maintained within Chain of Title Records. For a site to be designated with an “E” restriction, several criteria must be met. First, a property must be included within a designated re-zoning area, then the property must be identified as a “Potential” or “Projected” re-development property, and finally, the site must be listed on one or more environmental regulatory databases as listed in the ASTM standard, be adjacent to such a site, and/or have historical usage associated with hazardous materials with the potential to impact human health and/or the environment should a release have occurred. Sites with an

“E” designation require additional investigation and/or remediation be performed in order to determine if the historical use of a property, typically manufacturing or chemical usage, have impacted the site. No change of use or development requiring a building permit will be issued for an “E” designated site without approval from the NYCOER.

The search for environmental liens and AULs also included a review of information available from the New York City Department of Finance, New York City DOB, the EDR database report, City of New York Environmental Quality Review Requirement Declarations, City of New York Zoning maps, and the NYCDCP and NYCOER websites. The Site was identified as a Hazmat/Noise/ Air designated site (E-285) with the description of (Underground Gasoline Storage Tank Testing Protocol, Window Wall Attenuation & Alternate Ventilation and air quality - HVAC fuel limited to natural gas).

Typical NYCOER Phase II investigation/sampling requirements for hazmat “E” sites are as follows:

- Collection and laboratory analysis of for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), target analyte list (TAL) metals, PCBs and pesticides.
- Collection and laboratory analysis of groundwater samples for VOCs, SVOCs, TAL metals (filtered and unfiltered), PCBs and pesticides.
- Collection and laboratory analysis of soil gas samples for laboratory analysis of VOCs via EPA Method TO-15.

The Noise E requires that any new building constructed on the property include a window wall system which will achieve a noise attenuation of 28 dBA to maintain a maximum interior noise level of 45 dBA. An alternate means of ventilation such as through the wall or central air conditioning will also be required to maintain a closed window condition. Satisfaction of the Noise E requires the submission of a Noise Remedial Action Plan and an Installation Report certified by a Professional Engineer or Registered Architect.

The Air E requires any new residential or commercial development to ensure that heating ventilation and air conditioning use natural gas for space heating and hot water.

## 6.0 SITE RECONNAISSANCE

### 6.1 Methodology and Limiting Conditions

**Kristen Discenza** of EBC performed the site inspection on **Thursday, February 6, 2014**; beginning at approximately **2:00 pm**. The reconnaissance included a visual inspection of the Site the sidewalk immediately in front of the Site, and the exterior of adjacent properties.

Photographs taken during the inspection are attached (**Appendix A**).

### 6.2 Observations

The northwest portion of the Site at 938 Myrtle Avenue is developed as a parking lot. The northeast portion of the Site located at 948 Myrtle Avenue is developed with one single story commercial building occupied by a Key Food supermarket and one (1) two story mixed use commercial building with basement occupied by a Elisa cafe and 2nd floor storage area. The south portion of the Site at 258 Throop Avenue is developed with one (1) single-story commercial building occupied as a warehouse for key foods. All structures on Sites are heated by natural gas fired equipment.

### 6.3 Aboveground and Underground Storage Tanks (ASTs/USTs)

EBC did not note any USTs or ASTs during the site inspection.

### 6.4 Hazardous and Non-Hazardous Chemical Storage and Disposal

EBC did not note any other hazardous during site inspection. EBC noted 55-gallon drums filled with plastic bottles in the parking lot area of 938 Myrtle Avenue.

### 6.5 Underground Injection Control (UIC) Structures

Underground injection wells are regulated by the Underground Injection Control (UIC) Program under the authority of Part C of the Safe Drinking Water Act (SDWA) (42 U.S.C. 300h et seq.). The SDWA is designed to protect the quality of drinking water in the United States, and Part C specifically mandates the regulation of underground injection fluids through wells. The USEPA has promulgated a series of UIC regulations under this authority. Recent applicable revisions to UIC regulations were published in the State Implementation Guide - Revisions to the Underground Injection Control Regulations for Class V Injection Wells, September 2000. This document specifically addresses Class

V injection wells, which include on-site wastewater disposal features such as drywells, cesspools and in-situ drains. The USEPA issued a Notice of Final Determination for Class V wells; Final Rule on June 7, 2002. With the exception of motor vehicle waste disposal wells and large-capacity cesspools, Class V wells are “authorized by rule” (40 CFR 144.24) and may inject non-hazardous waste as long as the following criteria are met:

- The injection does not endanger underground sources of drinking water (40 CFR 144.12); and
- The well owners or operators submit basic inventory information (40 CFR 144.26).

The USEPA may, at its discretion, require the owner or operator of any well authorized by rule to submit information for review to determine if a well may be endangering an underground source of drinking water. In regard to motor vehicle waste disposal wells and large capacity cesspools (those that serve more than 20 persons per day), owners and/or operators of such wells in regulated areas must close the wells or obtain a permit. These requirements are being phased-in through 2008. Owners and operators of large-capacity cesspools must close the structures by April 5, 2005.

Sanitary wastewater is discharged from the Site and the surrounding areas to the New York City municipal sewer system. No features subject to UIC regulations were observed on the subject property during the site inspection.

## **6.6 Polychlorinated Biphenyls (PCBs)**

Polychlorinated biphenyls (PCBs) were used until 1978 and are a group of compounds formed by the chlorination of biphenyl. PCBs have extremely high physical and chemical stabilities which led to their being used in many applications, including heat transfer fluids, hydraulic fluids, and dielectrics. PCBs are often found in transformers, capacitors and hydraulic systems.

Electrical equipment containing PCBs are still in use and can pose a serious health hazard if fluids come in direct contact with humans, soil or groundwater. Fires involving electrical equipment containing PCBs can cause the material to be dispersed over a large area and potentially expose many people to a health risk. Because of the health hazard associated with PCBs, they are regulated under the Toxic Substances Control Act (TSCA).

No electrical transformers or other equipment suspected to contain PCBs were identified on or adjacent to the property at the time of the site inspection.

## **6.7 Asbestos**

Asbestos is the name given to a group of fibrous silicate minerals, typically those of the serpentine group. The tensile strength, flexibility, and non-flammability of asbestos have led to many uses including structural materials, brake linings, insulation, and pipe manufacture. Asbestos is of concern as an air pollutant because when inhaled it may cause asbestosis, mesothelioma, and bronchogenic carcinoma. In 1989, the USEPA announced regulations that would phase out most uses of asbestos by 1996.

As part of the site inspection, a visual survey was conducted of accessible areas for the presence of suspect asbestos-containing materials (ACM). Based on the date of construction of the Site asbestos (roofing, roof flashing or other concealed materials) containing materials may be present. Suspect asbestos containing materials were noted to be in good condition for both the buildings located on the Site. Prior to any renovations or demolition of the building, an asbestos survey would be recommended.

## **6.8 Lead-Based Paint (LBP)**

In 1978, the U.S. Product Safety Commission issued a ban on paints or surface coatings that contain greater than 0.06 percent lead. A visual inspection of painted surfaces was conducted during the site inspection. Based on the date of construction for the Site, lead based paint containing materials may be present. The painted surfaces were noted to be in good to fair condition for the Site. Prior to any renovations or demolition of the building, a lead based paint survey would be recommended.

## **6.9 Mold**

Concern about indoor exposure to mold has been increasing as the public becomes aware that exposure to mold can cause a variety of health effects and symptoms, including allergic reactions. Molds can be found almost anywhere; they can grow on virtually any organic substance, as long as moisture and oxygen are present. There are molds that can grow on wood, paper, carpet, foods, sheetrock, plaster and insulation. When excessive moisture accumulates in buildings or on building materials, mold growth will often occur, particularly if the moisture problem remains undiscovered or unaddressed.

As part of this assessment, a visual inspection was conducted for the presence of water damage and odors, indicative of the potential for mold growth. No visual or olfactory evidence of mold was identified at the Site during the Site inspection.

## 6.10 Wetlands

A review of the NYSDEC Freshwater Wetland Map, Brooklyn Quadrangle, indicates that no NYS freshwater wetlands are located within a one mile radius of the Site. ECB also reviewed NYSDEC Tidal Wetlands Maps available online at <http://twi.ligis.org>. The tidal wetlands map indicates that there are no NYS tidal wetlands located within a one-mile radius of the Site.

Potential federal wetlands were identified from the U.S. Fish and Wildlife Service (FWS) Wetlands Mapper software, which indicate that no potential federal wetlands are located within a half mile radius of the Site. Additional information obtained from the FWS website is included in **Appendix B**.

Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRMs) were reviewed to determine if the Site is located within the 100-year or 500-year flood zones. The FIRM showing the property (No. 3604970204F ) indicates that the entire property is located outside the 100-year and 500-year flood zones. This indicates that there is a minimal risk of flooding at the Site. A copy of the FEMA FIRM is included in **Appendix B**

.

---

## 7.0 INTERVIEWS

### 7.1 Owner

EBC did not interview the owner of the Site.

### 7.2 Occupants

EBC interviewed the manager for the property Mr. Sam Musleh, who was not aware of any environmental issues in connection with the Site.

### 7.3 Local Government Officials

Freedom of Information Act (FOIA) requests were sent to the NYCDEP, NYCDOH and FDNY York City Department of Health (NYCDOH) for information regarding hazardous operations and or other environmental reports/investigations for the Site, including the registration of fuel storage tanks, past spills, or violations. As of the date of this report, a response had not been received for the FOIA request. Regulatory agencies usually take six to eight weeks to process FOIA requests. Any pertinent information received will be reviewed and forwarded upon receipt. Copies of FOIA requests and regulatory agency responses are included in **Appendix B**.

## 8.0 FINDINGS AND OPINIONS

Based upon reconnaissance of the Site and surrounding properties, interviews and review of historical records and regulatory agency databases, **two (2) recognized environmental conditions were identified** in connection with the Site as further discussed below:

- Former occupancy of the south portion (258 Throop Avenue) of the Site as a filling station from 1965 to 1986.

*Reason for inclusion: Filling stations are typically equipped with gasoline and or waste oil underground storage tanks. The site is not listed in connection to any USTs on the regulatory database or on the NYS DEC bulk storage database. The location and current status of USTs associated with former filling station is unknown. In addition, underground storage tanks can leak at fittings, through internal or external corrosion and during refilling impacting the sub-surface.*

- Two (2) gasoline USTs noted on the east side of the northeast portion (948 Myrtle Avenue) of the Site in the 1935 to 1950 Sanborn maps.

*Reason for inclusion: The site is not listed in connection to any USTs on the regulatory database or on the NYS DEC bulk storage database. The current status of USTs identified in the Sanborn maps is unknown. In addition, underground storage tanks can leak at fittings, through internal or external corrosion and during refilling impacting the sub-surface.*

### 8.1 Additional Environmental Issues

The property was assigned an E-designation (E-285) for Hazmat, Air and Noise during the Bedford Stuyvesant North Rezoning action completed by the City in October 2012.

An E-designation does not interfere with the present use of the Site; however E-designations do prevent the release of building permits subject to a detailed environmental review and release by the NYC Office of Environmental Remediation. Such release may require a full subsurface investigation, remedial and health and safety planning, implementation of a remedial program and documentation that the remedial program was completed during redevelopment of the property. The Noise E requires that any new building constructed on the property include a window wall system which will achieve a

noise attenuation of 28 dBA to maintain a maximum interior noise level of 45 dBA. An alternate means of ventilation such as through the wall or central air conditioning will also be required to maintain a closed window condition. Satisfaction of the Noise E requires the submission of a Noise Remedial Action Plan and an Installation Report certified by a Professional Engineer or Registered Architect. The Air E requires any new residential or commercial development to ensure that heating ventilation and air conditioning use natural gas for space heating and hot water.

Additional information regarding “E” sites can be found on the New York City Office of Environmental Remediation website:

[http://www.nyc.gov/html/oeer/html/e\\_designation/e\\_designation.shtml](http://www.nyc.gov/html/oeer/html/e_designation/e_designation.shtml).

#### *Asbestos and Lead Based Paint*

Based on the date of construction, asbestos containing materials (roof, roof flashing, other concealed materials) and or lead based paint may be present. All suspect materials were noted to be in good to fair condition. Prior to any renovations or demolition of the building, an asbestos and lead based paint survey would be needed to determine the asbestos and or lead based paint content of suspect materials.

## 9.0 CONCLUSIONS AND RECOMMENDATIONS

EBC performed a Phase I Environmental Site Assessment in conformance with the scope and limitations as described under ASTM Practice E1527-05 for the commercial property identified by the street addresses of 948 Myrtle Avenue, Block 1756 Lot Nos. 33, 37, & 42 in Brooklyn, New York. Any exceptions to, or deletions from, this practice are described in **Section 1.4** of this report. Based upon reconnaissance of the subject and surrounding properties, interviews and review of historical records and regulatory agency databases, this assessment has revealed recognized environmental conditions in connection with the Site and are further discussed below:

- The southern portion of the Site (258 Throop Avenue) was occupied by a filling station from approximately 1965 to 1986. Filling stations are typically equipped with gasoline and or waste oil USTs. The Site was not identified on the regulatory database or the NYS DEC bulk storage database in connection with any USTs. No information regarding removal of USTs was available. The current status and location of the USTs is unknown. The former occupancy of the Site as a filling station and possible presence of USTs represents a recognized environmental concern.
- Historical Sanborn maps indicate that the northeastern side (948 Myrtle Avenue) was equipped with two gasoline USTs during the time period of 1935 to 1950. The Site was not identified on the regulatory database or the NYS DEC bulk storage database in connection with any USTs. No information regarding removal of USTs was available. The current status of the USTs is unknown. The lack of information regarding the removal, closure, confirmation soil and ground water sampling represents a recognized environmental concern.

EBC recommends a ground penetrating radar (GPR) survey and Phase II investigation in the areas of the former filling station (258 Throop Avenue) and two gasoline USTs noted within historical Sanborn maps on the east side of the northeastern side (948 Myrtle Avenue) of the Site to determine if an impact to the sub-surface exists.

### **ADDITIONAL ENVIROMENTAL ISSUES**

Both lots have been assigned an E-designation (E-285) for Hazmat and Noise as part of the Bedford Stuyvesant North Rezoning action completed by the City in October 2012 (CEQR 12DCP156Y).

An E-designation does not interfere with the present use of the Site; however E-designations do prevent the release of building permits subject to a detailed environmental review and release by the NYC Office of Environmental Remediation. Such release may require a full subsurface investigation, remedial and health and safety planning, implementation of a remedial program and documentation that the remedial program was completed during redevelopment of the property.

Typical NYCOER Phase II investigation/sampling requirements for hazmat “E” sites are as follows:

- Collection and laboratory analysis of for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), target analyte list (TAL) metals, PCBs and pesticides.
- Collection and laboratory analysis of groundwater samples for VOCs, SVOCs, TAL metals (filtered and unfiltered), PCBs and pesticides.
- Collection and laboratory analysis of soil gas samples for laboratory analysis of VOCs via EPA Method TO-15.

The Noise E requires that any new building constructed on the property include a window wall system which will achieve a noise attenuation of 28 dBA to maintain a maximum interior noise level of 45 dBA. An alternate means of ventilation such as through the wall or central air conditioning will also be required to maintain a closed window condition. Satisfaction of the Noise E requires the submission of a Noise Remedial Action Plan and an Installation Report certified by a Professional Engineer or Registered Architect.

The Air E requires any new residential or commercial development to ensure that heating ventilation and air conditioning use natural gas for space heating and hot water.

Additional information regarding “E” sites can be found on the New York City Office of Environmental Remediation website:

[http://www.nyc.gov/html/oer/html/e\\_designation/e\\_designation.shtml](http://www.nyc.gov/html/oer/html/e_designation/e_designation.shtml)

*Asbestos and Lead Based Paint*

Based on the date of construction, asbestos containing materials (roof, roof flashing, other concealed materials) and or lead based paint may be present. All suspect materials were noted to be in good to fair condition. Prior to any renovations or demolition of the building, an asbestos and lead based paint survey would be needed to determine the asbestos and or lead based paint content of suspect materials.

## 10.0 DEVIATIONS

This Phase I ESA was conducted in accordance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard E 1527-05 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process) and 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final Rule). Excluding additional services outlined in Section 11.0, there were no deviations or deletions from this practice.

## 11.0 ADDITIONAL SERVICES

EBC has included, in addition to those items outlined by ASTM E 1527-05, a general evaluation of the following is a list of non-scope considerations, which may be addressed, in a limited capacity within this Phase I Environmental Site Assessment:

- Radon;
- Lead-based Paint;
- Asbestos-containing Materials; and
- Wetlands.

## 12.0 REFERENCES

Standard practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Standard E 1527-05

### 13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the Site. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Chawinie Miller

Project Manager / Industrial Hygienist

# QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

**ENVIRONMENTAL BUSINESS CONSULTANTS**

## **Chawinie Miller, Project Manager / Industrial Hygienist**

---

### **Professional Experience**

EBC: March 2013

Prior: 7.5 years

### **Education**

Bachelor of Science, Environmental Health and Safety, Stony Brook University, NY

### **Areas of Expertise**

- Phase I / Property Condition Assessments
- Occupational Health and Safety Sampling
- Indoor Air Quality (IAQ) Investigations
- Mold Investigations and Remediation
- Soil and Ground Water Investigations
- Noise Studies

### **Professional Certification**

- OSHA 40-hr HAZWOPER
- NYS Asbestos Inspector
- NYC Asbestos Investigator
- OSHA 10-hr Construction Health and Safety
- Hazard Analysis and Critical Control Point (HACCP) Certified

### **PROFILE**

---

Ms. Miller has 7.5 years experience as an environmental consultant/contractor and has worked on and managed a wide range of environmental projects. Ms. Miller has conducted Phase Is and Property Condition Assessments for commercial, industrial, and residential properties in New York, New Jersey and Connecticut. In addition, Ms. Miller has conducted various IAQ, asbestos, mold and occupational health and safety sampling investigations for a variety of city, state, federal and private clients.

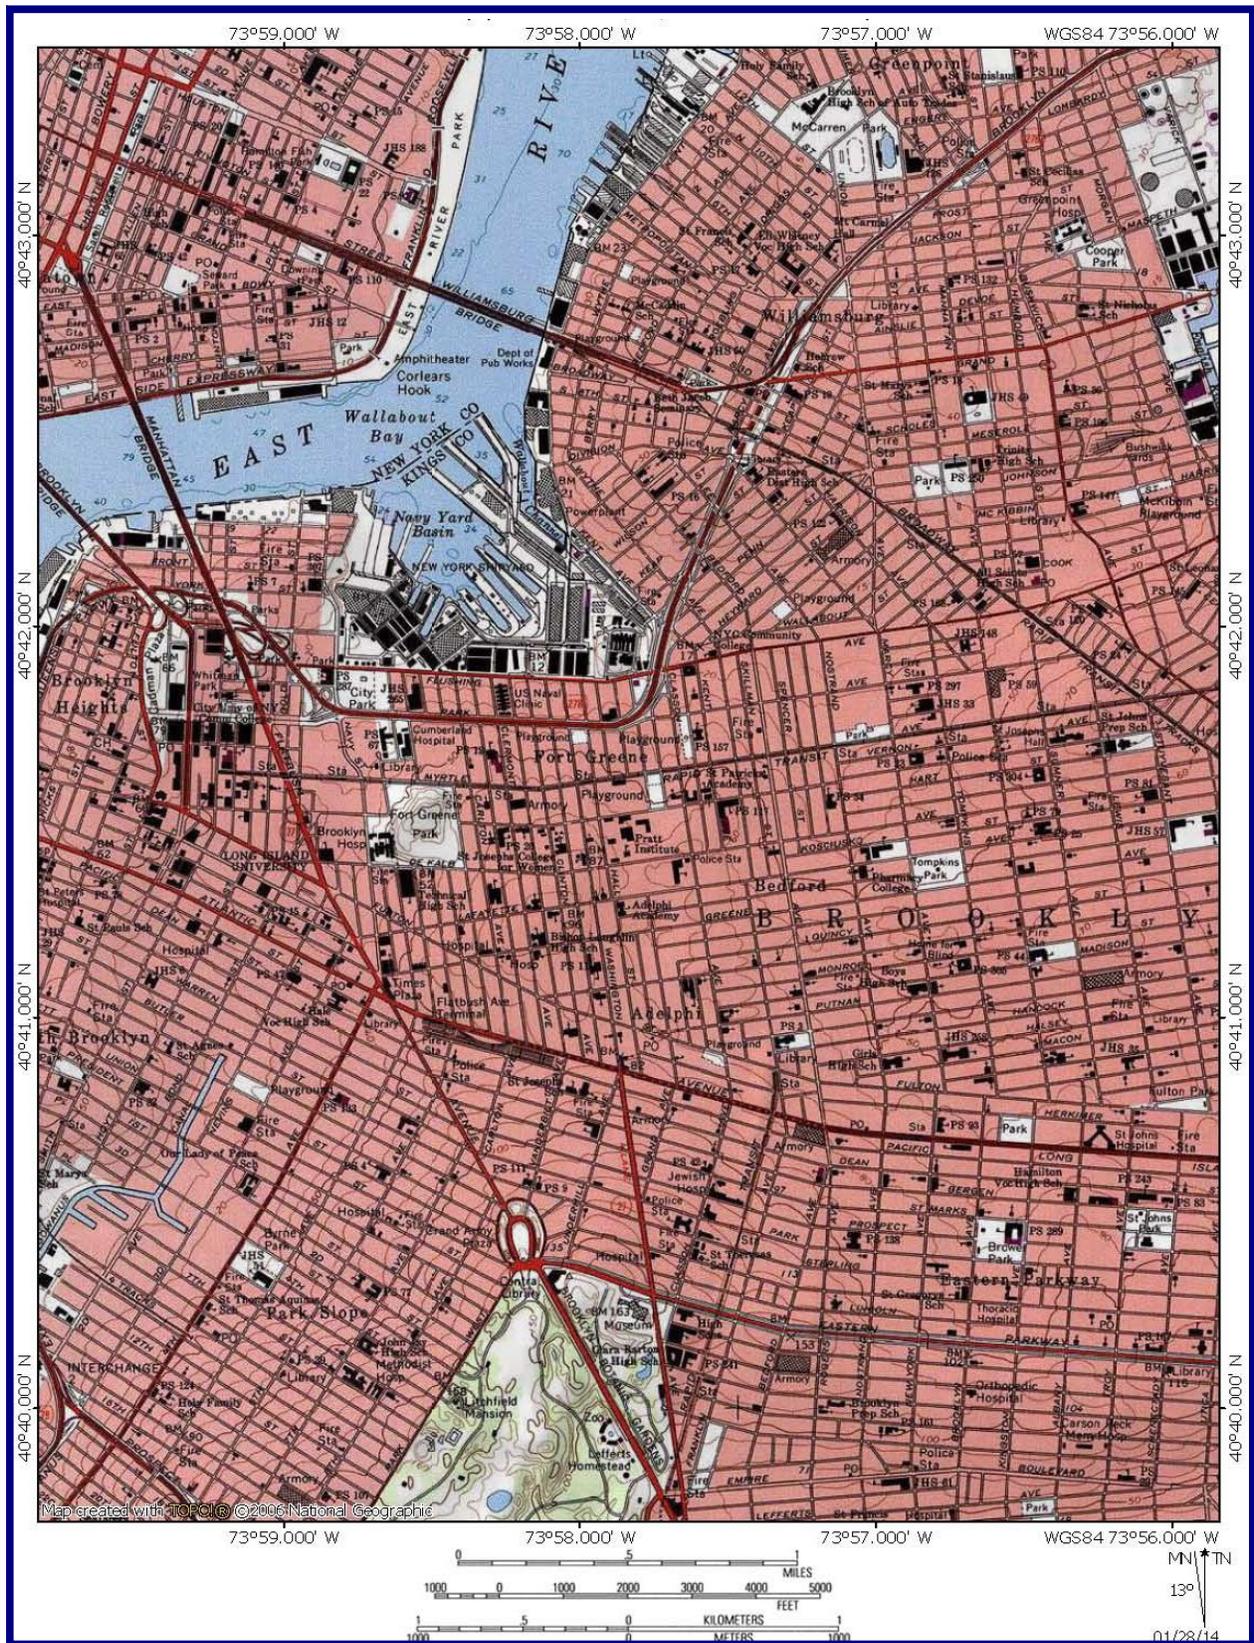

### **PREVIOUS EXPERIENCE**

---

The Louis Berger Group, New York, New York  
Industrial Hygienist, 2008-2013

AEI Consultants, Jersey City, New Jersey  
Environmental Scientist, 2005-2008

**CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT—THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY.**

**THIS INDENTURE**, made the 14th day of May, nineteen hundred and ninety seven  
**BETWEEN** SALEH M. ODETALLAH  
652 East 82nd Street, Brooklyn, New York 11236

*RS  
800.00*

party of the first part, and 948 MYRTLE AVENUE CORP.,  
59 Chester Avenue, Staten Island, New York 10312

REEL 4233 PG 1981

party of the second part,

**WITNESSETH**, that the party of the first part, in consideration of Ten Dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

**ALL** that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, County of Kings, City and the State of New York, and known as:

- 946-952 Myrtle Avenue, Block: 1756, Lot: 37
- 258-964 Throop Avenue, Block: 1756, Lot: 42
- 936-944 Myrtle Avenue, Block: 1756, Lot: 33

More fully bounded and described as follows:

See description of the three parcels annexed hereto.

Being the same premises conveyed to the grantor herein by deed dated 06/24/94, recorded 07/26/94 in Reel 3343 Page 725.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

**IN WITNESS WHEREOF**, the party of the first part has duly executed this deed the day and year first above written.

## Certified Sanborn® Map Report

# Certified Sanborn® Map Report

2/04/14

**Site Name:**

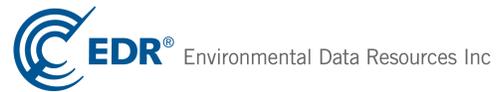

948 Myrtle Avenue  
948 Myrtle Avenue  
Brooklyn, NY 11206

**Client Name:**

Env. Business Consultants  
1808 Middle Country Road  
Ridge, NY 11961

EDR Inquiry # 3845181.3

Contact: Kevin Brussee

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Env. Business Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

### Certified Sanborn Results:

**Site Name:** 948 Myrtle Avenue  
**Address:** 948 Myrtle Avenue

Sanborn® Library search results  
Certification # 0154-4D32-AF1A

### Maps Provided:

2007	2001	1989	1980	1935
2006	1996	1987	1979	1918
2005	1995	1986	1977	1904
2004	1993	1984	1965	1887
2003	1992	1982	1950	
2002	1991	1981	1947	

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Env. Business Consultants (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

948 MYRTLE AVENUE  
BROOKLYN, NY 11206

#### COORDINATES

Latitude (North): 40.6957000 - 40° 41' 44.52"  
Longitude (West): 73.9438000 - 73° 56' 37.68"  
Universal Transverse Mercator: Zone 18  
UTM X (Meters): 589238.4  
UTM Y (Meters): 4505303.0  
Elevation: 45 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# EXECUTIVE SUMMARY

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal CERCLIS NFRAP site List***

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 04/26/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/10/2013 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/10/2013 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/10/2013 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

### **State and tribal landfill and/or solid waste disposal site lists**

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the SWF/LF list, as provided by EDR, and dated 10/08/2013 has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>BEDFORD AUTO SALES</b>	<b>984 MYRTLE AVE</b>	<b>ENE 0 - 1/8 (0.084 mi.)</b>	<b>G36</b>	<b>96</b>

### **State and tribal leaking storage tank lists**

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 09/25/2013 has revealed that there are 22 LTANKS sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### **State and tribal registered storage tank lists**

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the UST list, as provided by EDR, and dated 11/13/2013 has revealed that there are 6 UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### **State and tribal voluntary cleanup sites**

VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the VCP list, as provided by EDR, and dated 11/13/2013 has revealed that there are 3 VCP sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

#### **Records of Emergency Release Reports**

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 09/25/2013 has revealed that there are

## EXECUTIVE SUMMARY

14 NY Spills sites within approximately 0.125 miles of the target property.

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/10/2013 has revealed that

## EXECUTIVE SUMMARY

there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 HSWDS site within approximately 0.5 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States

## EXECUTIVE SUMMARY

from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 3 EDR MGP sites within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
NASSAU GAS	SKILLMAN AVE	W 1/2 - 1 (0.692 mi.)	125	347
SKILLMAN STATION	SKILLMAN ST. FLUSHING A	WNW 1/2 - 1 (0.742 mi.)	126	347
RUTLEDGE STATION	RUTLEDGE ST. WYTHE AND	WNW 1/2 - 1 (0.898 mi.)	127	347

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 5 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Not reported	834 MYRTLE AVE	W 1/8 - 1/4 (0.236 mi.)	W96	226

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 8 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

### EDR RECOVERED GOVERNMENT ARCHIVES

#### ***Exclusive Recovered Govt. Archives***

RGA LF: The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists.

A review of the RGA LF list, as provided by EDR, has revealed that there is 1 RGA LF site within approximately 0.5 miles of the target property.

DEC Memo: 01/17/06: This spill transferred from J.Kolleeny to S.Kraszewski. Two 30K tanks installed in 1963 were removed in 1993 and replaced by one 30K tank. The new 30K tank rests in one of the previous tank beds. 925 cubic yards of contaminated soil was removed during excavation. No recorded TTF for either tank on file. A site investigation was performed in 1995 to delineate the contamination. Seven soil borings were performed and three of those borings were converted to MWs. GW was roughly 40 fbg. No semi-volatiles wer detected in the samples taken for the investigation. 2 soil samples found 11 volatiles, 7 of

Remarks: them slightly above STARS. GW samples showed 5 volatiles but all below AWQS. The report notes that oil impacts are primarily in the soil: impacted soil to 25 fbg while the GW is at 40 fbg. The report mentioned that the full lateral extent of the contamination was not determined due to obstructions. The MWs were used for monitoring and no other remedial action was recommended. Only one Monitoring and Bailing report is on file from 1996. No oil was detected during this observation. - SK03/22/06: This spill transferred to K.Tang - SK09/23/10: J.Kann - spill transferred from K. Tang to J.Kann.  
 CONTAMINATED SOIL FOUND DURING TANK PULL. SOIL EXCAVATED, STOCKPILED. TO BE REMOVED.

Spiller City,St,Zip: BROOKLYN, NY  
Spiller Company: 001  
Contact Name: CHARLES MCINNIS  
Contact Phone: (718) 707-7841  
DEC Memo: 3/6 1PM & 3PM Sangesland tried to call Mr. McInnis - No answer 3/7 2PM  
Sangesland heard from Mr. McInnis' co-worker that the problem was  
taken care of and Mr. McInnis should be back in the office later  
today. Outdoor boiler (on truck trailer) nipple on tank broke, spilled  
to ground. Clean Ventures was hired to dig out an area 12' x 20' x 8"  
deep. Clean Ventures contact is David Quiones 908-354-02103/11/08. Same  
location had another spill which Vought responded to. Cross ref with  
spill #0713059 from 3/11/08. 03/1/08-Vought-This spill closed and  
referred to second and later (one week later) open heating oil  
spill (#713059) at same location caused by same problem.

Remarks: NIPPLE BROKE OFF AND IN PROCESS OF CLEANING

DEC Memo: Cross ref to spill #0712810 from 3/6/2008 Vought went to this site. 03/20/08-Vought-Daytime runner. See also closed spill #0712810 at same exact location caused by same problem (broken nipple possibly by vandalism) on 3/6/08. Spills consolidated into one spill due to same exact location, same spilled material (#2 fuel oil) and comprehensive remedial action (soil excavation). Spill caused by broken nipple from copper line in truck used along with temporary 80,000lb boiler that services over 20,000 residents. Note that even though boiler setup is temporary (DEC witnessed crew working on permanent boiler installation in building) to remove system and piping for soil excavation not feasible until permanent boilers operational. NYCHA hiring Clean Ventures to place down speedy dry and perform limited excavation around boiler set up and will perform additional excavation once permanent boilers installed. Vought spoke with NYCHA Ralph Trocchio (718-707-5725) and new boiler will be operational within 5 months and therefore impacted soil underneath boiler will be excavated and endpoint samples collected within same time frame. No seepage into adjacent basement and hence no indoor impact of spill. DEC requires CSL with five month deadline requiring collection of endpoint samples. Vought sent CSL to: Mr. Ralph Trocchio New York City Housing Authority Oil Remediation 23-02 49th Avenue Long Island City, NY 11101 Ph: (718) 707-5725 Cell: (917) 968-6201 Fax: (718) 707-5266 03/12/08-Vought-Received call from Frank Inoa (718-707-5718) from NYCHA. 06/26/08-Vought-Received email from NYCHA Trocchio requesting additional time to clean oil spill as "the problem is the interior boiler work is still on going and the need for a mobile boiler still exists to supply hot water to the residents. Expected date of completion is 7/28/08. Request to submit a report "no later than 11/12/08". Vought granted request pending receipt of email of no continued impact to boiler room and residents by spill. Vought received email that still no impact to boiler room and residents and granted extension till 11/12/08. 12/23/08-Vought-Reviewed report received from PW Grosser and No Further Action Letter granted and faxed to Trocchio and PW Grosser. Report notes to be entered at later date due to holiday vacation and end of day. 12/30/08-Vought-Entry of notes: Received and reviewed Letter Report Detailing Excavation of Fuel Oil Contaminated Soil dated 11/13/08. "On March 6, 2008, the above ground copper supply line leading into the boilers experienced damage causing a release of approximately 35 gallons of fuel oil." "On March 11, 2008 the second incident occurred; vandalism of the above ground copper supply lines resulted in approximately 40 gallons of fuel oil being released. Eight geoprobe borings performed in Sept

2008. Borings delineated vertical contamination to depth of 8'bg. Excavation of soils occurred in Oct. 2008. Areas of excavation limited by concrete sidewalks, a building and a stairwell. Excavation of a total of 104.79 tons of soil to a depth of 10'bg. Five endpoint soil samples were collected. Two wells onsite installed in 1990's due to former tanks. Groundwater sample collected from MW2 and groundwater at depth of 33'bg. Soil analyticals show SVOC exceedences attributable to fill material which was noted in excavation. Soil analyticals show no detections for VOCs and no TAGM 4046 Required Soil Cleanup Objective exceedences except for PAH's attributable to fill material. Groundwater analyticals showed non-detect. Spill closed by Vought as per 12/23/08 notes.

Remarks: Broken oil line caused spill. Into soil. In process of being cleaned up.

EPA Region: 02

Classification: Conditionally Exempt Small Quantity Generator

Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: No

Mixed waste (haz. and radioactive): No

Recycler of hazardous waste: No

Transporter of hazardous waste: No

Treater, storer or disposer of HW: No

Underground injection activity: No

On-site burner exemption: No

Furnace exemption: No

Used oil fuel burner: No

Used oil processor: No

User oil refiner: No

Used oil fuel marketer to burner: No

Used oil Specification marketer: No

Used oil transfer facility: No

Used oil transporter: No

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001  
Tank Id: 34765  
Material Code: 0003  
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None  
D01 - Pipe Type - Steel/Carbon Steel/Iron  
G02 - Tank Secondary Containment - Vault (w/access)  
J02 - Dispenser - Suction Dispenser  
B01 - Tank External Protection - Painted/Asphalt Coating  
I04 - Overfill - Product Level Gauge (A/G)  
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)  
L00 - Piping Leak Detection - None  
K00 - Spill Prevention - None  
C03 - Pipe Location - Aboveground/Underground Combination  
E00 - Piping Secondary Containment - None  
F01 - Pipe External Protection - Painted/Asphalt Coating

Tank Location: 3  
Tank Type: Steel/Carbon Steel/Iron  
Tank Status: In Service  
Pipe Model: Not reported  
Install Date: 03/19/1965  
Capacity Gallons: 7500  
Tightness Test Method: NN  
Date Test: Not reported  
Next Test Date: Not reported  
Date Tank Closed: Not reported  
Register: True

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "VOUGHT"3/14/2002-VOUGHT-Site visit by Vought on 2/7/2002. Spill was a result of overflow and an unscheduled delivery. Small spill (1/2 gal out of vent and large spill (approximately 30 gallons in basement). The spill in basement was the result of a ruptured tank patch caused by overflow pressure. No sewers or drains affected. Spill was on concrete and no cracks were evident. Building super is Joseph Connets (718-573-9329). Resident above tank room is Keisha Hancock (718-443-3769). Spiller was County Oil Company (David Rosen 718-626-7000). Spill was cleaned by County oil using speedy dry, biosolve, sweet air and a vacuum truck to pump out the tank so repairs could be performed (AB Oil). All contaminated materials in basement were disposed of by JB Waste Oil Co. (invoice provided 718-777-8298). County Oil Company hired New York City Tank Testing Inc (718-731-7011) to tightness test the tank after they dug and replaced the vent line, refitted the suction and return, resealed tank patch and resealed manway to the tank (invoice and tightness test results provided). Site visit on 3/7/2002 by Vought confirmed that the cleanup was complete. Interview with Keisha Hancock revealed that she no longer had any odors in her apartment. Spill closed by Vought.

Remarks: customer probly recieved a delivery he did not order fd is on the scene and shut down his burner they did ventilate the cellar the homeowner did flush with water down the sewer

 DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "SUN"1/2/2004 Reassigned from Rommel to Sun. (Also refer to Spill # 93-03325 for this site)07/08/04 This spill is closed. To be investigated and remediated under Spill #93-03325.01/12/06-The spill is reopened since this spill was caused by gasoline, while Spill #93-03325 was caused by #6 fuel oil. 1/12/2006 - Feng - Called Pfizer Inc and spoke with Manuel Lopez (718-780-0947). He remembers that they have been sent the some report to DEC. He would contact his engineer and find the information DEC need and get back to DEC. (RJF)1/12/2006 - Feng - Faxed the two spill report to Samantha Plourde (718-780-8380) and request to send 1) tank closure report, 2) any other site investigation/site assessment, to DEC. (RJF)1/27/2006 - Feng - Reviewed the Tank Closure Report of 12/10/1999, sent on 1/20/2006 by Pfizer. These 6 USTs were discovered during pre-construction activities in the northwestern corner. The site was a former Texaco gasoline station some time in the 1940's. 6 USTs in the northwestern corner of the site were confirmed by the insurance maps. Pfizer registered and removed the USTs performed from 5/17/1999 to 9/30/1999. 6 soil boringw were done prior the removal activities.

Analyticals show SB-6 (10'-12' bg) with high contamination, 840 ppb Toluene, 10,000 ppb Ethylbenzene, 51,800 ppb Xylene, 20,000 ppb 1,3,5-Trimethylbenzene, and 40,000 ppb 1,2,4-Trimethylbenzene. To further delineate the SB-6, SB-6A to SB-6E (12'-14') were drilled and sampled, lab result indicated low VOCs. And removed all the soil above the clay layer (12' bg plus 0.5'-1.0' of the clay). The tanks found no cracks or holes. After tank removal, precipitation occurred for several days and the rain water run into the excavation, water removed and tested, found 6,047 ppb BTEX. All the piping associated with the USTs were removed. Soil removal extended to where the pre-UST removal soil samples contained concentration of VOCs below DEC STARS. Total of 286.18 tons of soil were removed. The report attached with lab analyticals sheet for soil sample, but not indicated the location of sample taken and not mentioned in the narrative text. Backfilled with clean sand and permanent asphalt pavement was placed on top. Requested spill closure. (RJF)1/27/2006 - Feng - Send letter to Pfizer request of 1) groundwater sample in the vicinity of the former SB-6 boring location, 2) clarification of the soil sample presented in the lab report attached in App C. Result due 4/3/2006. Faxed to Scott Glash (Roux). (RJF)02/09/06: This spill transferred from R.Feng to S.Kraszewski.03/06/06: Received letter from Pfizer, dated March 2, 2006. Pfizer is requesting that the Department suspend the April 3rd deadline for the subsurface investigation. Pfizer believes that the Department is not familiar with all documentation related to this spill. Pfizer will collect and review all historic documentation and correspondence related to the closure and removal of the gasoline USTs. This information will be submitted to the DEC by March 15, 2006. Pfizer believes that based on the contents of this letter that an additional investigation will not be necessary. - SK 03/24/06: Received detailed summary of closure activities from Pfizer. Currently under review. - SK03/27/06: Reviewed all documents for the UST closure. This additional information was sent in response to the DEC's request for a complete subsurface delineation both on-site and off-site. Pfizer believes that with the information supplied in this closure summary that there is no need for further investigation and NFA should be issued. Pfizer has also included documentation and explanations in response to R.Feng's letter issued January 2006 and previous DEC requests: No post-exc samples taken: Pfizer contests that retrieving samples would cause stockpiling of contaminated soil and leave the excavation open, which is a hazard. Instead, they conducted soil borings to eliminate the hazards associated with an open excavation. Furthermore, Pfizer feels that the soil borings properly delineated the horizontal extent of the contamination since they were conducted until no VOCs were detected by PID. Rainwater from the excavation was sampled and found to contain high levels of BTEX: It was a waste characterization sample, a composite from several sources. Pfizer states this water sample was mixture of rainwater from the USTs, the excavation and waste water used to clean each UST. A soil samples with highly elevated VOC concentrations was detected but it was not mentioned in the report summary nor is it given a location on the site plan: This sample was also a composite sample, collected from each UST. Sand material was discovered within the USTs and this sample was used to characterize the tank solids for proper disposal. It did not come from the excavation. R.Feng requests GW samples: Pfizer attached results from two GW samples taken from the former tank area in June 2004. The samples were taken from 8 to 10 fbg using low-flow purging

techniques. Actetone was detected in both samples, a common laboratory contaminant. Naphthalene and Xylenes were detected but below GW standards. Boring logs, PID logs, information of perched GW and explanations of work methods are also included in response to a February 2000 letter from DEC to provide information for these shortcomings in the UST closure report from 1999. - SK03/27/03: Called Manuel Lopez to ask about the report. He said it would be best to contact Omar at Roux & Associates. I called and left Omar (631-232-2600) a voicemail to call me back. - SK03/28/06: Rob Kovacs for Roux and Associates called in place of Omar. I asked Rob about the clay layer and he said based on historic production wells used by Pfizer and Roux & Associates' experience with the surrounding area they have mapped out the extent of the clay layer. Rob is emailing me a map with the known extent of the clay layer. - SK03/31/06: Received PDF of the geologic cross section for that area and an overhead map. After careful consultation and consideration with supervisor J.Kolleeny, we feel that based on all of the available information at hand, this spill poses no threat to GW, the environment or the public. NFA letter sent out. Closed out. - SK

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "ZHAO/DEMEO"7/14/2002 - 21:05pm: Ms Zhao spoke with Nathan Edeson. Spill has been contained. There is no drains or valves involved. Clean up was in progress by contractor Tradewind by the time of contact. Zhao has requested clean up statement from Tradewind and will follow-up on it.7/16/2002 - A follow up call Zhao made to Mr Edeson. Spill cause was found due to the gauge system, not the pump. Tradewind went back yesterday and have got clean up completed. Clean

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "SUN"7/6/04 - AUSTIN - TRANSFERRED FROM GARDINEER TO SUN - RELATED TO SPILL #990181 - END07/08/04-Sun- Also refer to Spill # 99-01811 for the same site. 02/09/06: This spill transferred from R.Feng to S.Kraszewski.03/06/06: Recieved letter from Pfizer, dated March 2, 2006. The letter states that the Department's verbal request for documentation of UST closure from 1993 is unnecessary since significant remedial work has taken place to address this spill since 1993 and also an NFA letter has been issued. The NFA supposedly declares that the VCA (Voluntary Cleanup Agreement) performed by Pfizer has been completed. SK spoke with Manuel Lopez, Director of Environmental Health and Safety for Pfizer. I requested a copy of the NFA letter be faxed for confirmation. - SK03/07/06: Reviewed NFA letter faxed by Pfizer. Will discuss with J.Kolleeny and K.Tang. - SK04/05/06: Apparently, when this site became involved with the Voluntary Clean-Up Agreement (VCP) the spill number should have been closed. This spill closed out. - SK

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "SANGESLAND"4/2/2001 Sangesland and NYCDEP Wai Man Wan made a site visit to the Pfizer facility to look for a reported Acetone leak. After initial inspection, DEC - ECO Shawn Dussault arrived to make a similar inspection of the roof top equipment. According to Pfizer Engineer Mr. Daniel Shiel the following is a description of the process and then the system problem: Process: Acetone is used in the process of coating pills. After the material leaves the "pills bath" area, the vapor acetone is collected and piped to a chiller/condensor on the plant roof. This "Edwards Unit" chiller/condensor has 3 stages which drops the vapor temperature in 3 steps to 85°F below zero. At that point the acetone is in liquid form and is recovered via pipe and collected. This material is then tanked and removed from the site. (Pfizer states that a company purchases this recondensed acetone from them). Problem: Somewhere in the second stage of this unit is a leak. The Pfizer representative stated that there is probably a crack in the line someplace, but the exact location has not been found. Pfizer states that they first became aware of the problem in early March 2001 and took the system out of service for approx. 10 days to perform routine maintenance to the unit and to try to find the problem. The specific problem was not found and not fixed. The equipment was put back into operation. At the site visit, it was clear that acetone was leaking to the atmosphere. Pfizer says that they have done a mass balance which shows that they are still retrieving approx. 91% of the total process acetone, above their legal limit (limit is someplace in the low 80's %). Pfizer also had LEL meters on the equipment to show that they have remained below approx 50% of the LEL explosive limits. However, there is no alarm on this meter. The meter is read several times per day by plant personnel. Pfizer rep also said the units are actually 2 separate parallel process lines running at the same time. He believes that the leak is only in one side of the system. The system can operate with only one side of the process system in operation, only at a lower volume and therefore a lower pill production rate. In order to repair the system, the unit would need to be lifted off the roof of the building, lowered to the street level, opened and re-welded. Pfizer said they had an equipment

rep on site later today to quote them on the cost and time needed to build a replacement unit. ECO Dussault issued 2 tickets. 6NYCRR Part 595.3.a.2.ii and .iii with a May 17, 2001 court appearance date. Since this is a release to the atmosphere it may include the NYSDEC Air Unit. Since it is a material AFTER production (of the pills) it may be considered by NYSDEC RCRA Dept. 4/3/2001 Officer Dussault spoke with Dan Shiel (Pfizer) later on the afternoon of 4/2. Mr. Shiel said that Pfizer met with the manufacturer of the Edwards unit and he said it would take about 6 to 8 weeks to build and install a new unit. Until that time, Mr. Shiel said they may try to find a way to run just the first and third stage of the system and bypass the second unit. This will still allow some condensation of the process acetone and may allow the production line to operate (perhaps at a reduced rate)

Remarks: caller states that the company has had a leak since June on the roof of the building from the Edwards unit. They do not want to fix this due to the down time and the cost. Dennis Pappas, engineer in charge

DEC Memo: 02/02/11- Zhune spoke to Russel Downey 908-413-0811. Site is a Pfizer Factory. Property is going to be sold. During investigation found groundwater contamination. Requested report. Mr. Russel will send the report.04/04/12-Roux Associates sent the Petroleum Investigation Report dated June 24, 2011.Property solution performed Phase I and Phase II subsurface investigation activities at site E and F on behalf of Acumen Capital Partner, LLC (Acumen)(buyer). Phase II - Included the completion of 24 soil borings, with the collection of 24 soil borings samples and 7 groundwater samples were collected from temporary well. Of the 24 borings completed 12 were located on Site E and 12 were located on Site F. Four (4) of the seven groundwater samples were collected on Site E, and the remaining three collected on Site F.Only The property solution's borings designated SB-19,SB-20/GW-20, SB-21, SB-22/GW-22, SB-23, SB-24 and SB-25 were completed within the former Main Plant near the former Fitness Center. The analytical results indicated that soil and groundwater collected from boring SB-22/GW-22 (located within the Former Fitness Center) contained elevated concentrations of VOCs. The soil samples collected from the four (4) borings located near SB-22 as well as borings located at the west end of the former Main Plant (SB-19 and SB-20) did not have any exceedances. The groundwater sample collected from boring SB-20/GW-20) at 15 to 16 ft bls. detected VOCs below the applicable limit. In response to the identification of groundwater impacts in phase II beneath the Main Plant, Roux Associates on behalf of Pfizer conducted focused investigation activities in April, May and June 2011. The focused investigation included the installation of four(4) deep wells BMW-10, BMW-11, BMW-12, BMW-13 and a total of three (3) soil borings TPNE, TPSE, TPSW. Groundwater samples were collected from wells BMW-10 through BMW-13 and soil borings TPNE, TPSE, TPSW.The analytical results indicated the following VOCs ( BTEX, 1,3,5 trimethylbenzene, Isopropylbenzene, naphthalene, n-propylbenzene, and p-isopropyltoluene) were detected above the acceptable limits in the groundwater sample collected from BMW-11. LNAPL was found in well BMW-11 at a thickness of 2.76 feet. A sample of LNAPL was collected for gas chromatography product characterization analysis. The LNAPL was identified as leaded gasoline. The groundwater sample collected from boring TPNE indicated the following VOCs(BTEX, 1,3,5 trimethylbenzene,Isopropylbenzene, MTBE, naphthalene and n-propylbenzene) detected above the acceptable limits.BP evaluated Groundwater flow directions in shallow perched water. BP reported groundwater flow to be in the northeast direction at the BP service station. Pfizer's assessment evaluated Groundwater flow directions in deep water. Pfizer reported that Groundwater flow in the deep zone was to the southwest. 04/11/12- Roux Associated Inc. sent the

Supplemental Petroleum Investigation Report dated July 22, 2011 05/07/12 - This spill has been transferred to Hassan Hussein of the Hazardous Material Unit. 1/24/2013 - Raphael Ketani. The spill case for this Commercial Property at 630 Flushing Avenue, Brooklyn, 11206 was transferred to me. The spill was called in on 2/1/11 due to the discovery of oil contaminated soil samples. The block and lot are 1720 and 1. The deed date is 2/11/11. The property was sold by Pfizer, Inc., 235 East 42nd Street, NY, 10017 to Acumen Capital Partners (ACP) BK I, LLC, 37-18 Northern Blvd., Ste. 300, LIC, 11101. PBS is #2-017329. There were 31 tanks. Twenty five (25) were closed, 1 was converted to non-regulatory use and 5 are active. The tank sizes ranged from 62 gals. to 30,000 gal. The products contained were #6 oil, #2 oil, diesel, gasoline and other. Presently, there are 6 active tanks. They range in size from 62 gals. to 20,000 gals. The two 20,000 gal. tanks contain #6 oil and others (300 gal., 275 gal. and 62 gal.) contain diesel fuel. A 275 gal. tank contains #2 heating oil is also active. 3/18/13 - Raphael Ketani. Matthew (Mat) Carroll, P.E., of Tenen Environmental, LLC (646) 606-2332, ext 103 [121 West 27th Street, Suite 1004, New York, NY 10001, mcarroll@tenen-env.com] called today regarding the site. He is the new consultant for ACP. I tried to contact him, but could only leave a message. Mr. Carroll called me back. He said that Pfizer is still involved in the remediation of the property, even though ACP bought the site. They are the responsible party. Mr. Carroll will send me the two ROUX reports for my review. However, Pfizer is contending that there is a gas station upgradient which is the source of the contamination. Mr. Carroll sent me the following contact information: Please address all correspondence related for Spill #1011062 to: Robert Kovacs, Sr. Environmental Scientist Roux Associates, Inc. 209 Shafter Street Islandia, New York 11749 rkovacs@rouxinc.com Please also cc Pfizer, the site owner and myself. Office addresses and email addresses are as follows: Matthew R. Basso, MS, CHMM Manager, ERT Pfizer 100 Route 206N (M/S 414) Peapack, NJ 07977 Matt.Basso@pfizer.com Jeffrey Rosenblum ACP BK 1 LLC The Standard Motor Products Building 37-18 Northern Boulevard, Suite 300 Long Island City, NY 11101 jrosenblum@acumen.com 3/28/13 - Raphael Ketani. I reviewed the 6/24/11 Petroleum Investigation Report which was produced by Roux Associates, Inc. for Pfizer. Groundwater impacts were found under the main plant on the north side where the former Fitness Center used to be. Roux did investigations during April, May and June of 2011. Borings and wells were installed. The data indicates that the source is the BP Service Station (formerly AMOCO; active spill #0104597) to the north at 655 Flushing Avenue. The BP investigation was limited to the shallow soil and groundwater above the silty clay (which averages 10 feet bgs). Pfizer investigated the groundwater in the deeper zone. Roux states in the report that their evidence for BP being the source is the following:

- 1) BP is 70 feet away from the main building (site E) and has a long history of impacts to the soil and the groundwater
- 2) petroleum contamination was found beneath the Pfizer main plant as part of utility work which took place by the utility company (they don't state who this is, but it was probably Con Ed) - the utility company filed reports regarding the contamination
- 3) the deeper groundwater zone is hydraulically downgradient from BP
- 4) almost 3 feet of NAPL was found on the south side of Flushing Avenue and the fingerprint of the oil indicated that it was leaded gasoline
- 5) Roux identified extremely elevated VOC concentrations in the deeper groundwater zone - there were 38,700 ppb of total BTEX in the groundwater 8 feet south

**PFIZER INC BROOKLYN PLANT (Continued)**

**U003074670**

of BP in the deeper zone6) Pfizer had 2 small USTs under the north part of the main building (former Fitness Center) - the soil results did not indicate any impacts from the USTs - the USTs were in 12 inches of concrete in an intact vault and were decommissioned in 19887) information from Pfizer and BP for routine groundwater sampling provides data from the south side of Flushing Avenue supporting that the Pfizer USTs did not leak 8) MTBE is present in the deeper groundwater samples from the Pfizer site, but the timing does not support that the impacts are related to the Pfizer operations - Pfizer decommissioned the USTs in 1988 before the widespread use of MTBE in 1992 - MTBE bearing gasoline was stored at BP for years and BP had many releases of gas - in 2001 there was a gasoline release with MTBE where the MTBE concentrations were up to 385,000 ppb in the groundwaterThe main plant consists of buildings 55, 16, 16A, warehouse A and warehouse AA. The majority of the main plant (site E) is buildings 16 and 16A - 8 story buildings. Operations at the plant ceased during November 2008. On 2/11/11, the ownership changed to Acumen Capital Partners (ACP) BK I LLC. Site F is the parking lot to the south. Property Solutions performed the Phase II during October 2010 and January 2011 for sites E and F. They did 24 borings. Seven (7) groundwater samples were taken from temporary wells. Twelve (12) borings were performed at site E and 12 borings were performed at site F. Four (4) groundwater samples were taken at site E and 3 groundwater samples were taken at site F. A small portion of the sampling was done near the former Fitness Center in warehouse A and pertains to this investigation. The borings and wells were SB-19, SB-20/GW20, SB-21, SB-22/GW-22, SB-23 to SB-25. Groundwater from G-22 was taken on 1/6/11 and had elevated VOCs of gasoline. The sample was collected at 16.5 to 20 feet bgs, below the perched water table at 10 feet bgs. Anthropogenic fill is present from 5 to 12 feet bgs. Silty clay is present throughout the area and is 15 feet thick. The Upper Glacial Aquifer underlies the silty clay at 20 to 30 feet bgs. Thin perched lenses of groundwater are present throughout the area. A perched water table is present at 5 to 8 feet below the site. The perched water table follows the surficial topography of the clay. The clay is 6 feet below the southwest part of the BP site and 11 feet below the northeast part of the site. The BP wells are in the perched horizon. BP reported that the groundwater flowed to the northeast. Permanent wells BMW-10 to BMW-13 indicate that the deeper groundwater flows to the southwest. The deeper groundwater is likely affected by pumping by NYCT for its subway tunnels. Their pumping wells are to the west of the main building. The pumping also likely affects the vertical gradient. Gauging took place at BMW-10 to BMW-13 on May 3 to June 8 during 2011. LNAPL was found to be 2.76 feet thick at BMW-11 on 6/8/11. Property Solutions did borings SB-19 to SB-25 near the Fitness Center. Only SB-22 at 7.5 to 8 feet bgs had soil VOCs that were above the unrestricted CP-51 standards. There were 5 VOCs above the standards. Naphthalene at 16,000 ppb, n-butylbenzene at 14,000 ppb, n-propylbenzene at 7000 ppb, ethylbenzene at 2300 ppb. The soil samples from the rest of the borings had results that were below the unrestricted standards. On 1/26/11, Property Solutions collected groundwater samples from GW-20 and GW-22. Low levels of BTEX were detected at 15 to 16 feet bgs. The sample from GW-22 beneath the Fitness Center had many VOC hits that were above the unrestricted standards. Permanent well BMW-11 had many VOC hits that were above the unrestricted standards. From 6/6/11 to 6/8/11, Roux took groundwater samples from 3 borings. All had samples with exceedences.

Groundwater samples from boring TPNE (in the sidewalk at the south edge of the BP station) were taken at 13 to 15 feet bgs, 15 to 17 feet bgs, and at 17 to 19 feet bgs. There were many VOC exceedences amongst the samples. The highest BTEX result was from the sample from 13 to 15 feet bgs. The groundwater samples that were taken at 15 to 17 feet bgs and at 17 to 19 feet bgs from boring TPSW directly downgradient (southwest) of the station had low VOC hits. I finished my review of the 6/24/11 Petroleum Investigation Report. I looked at Plate 1 - Generalized Hydrogeological Cross Section - of the report. All of the wells - temporary and permanent - were partially screened at the top in the silty clay. This is not proper practice. There is no explanation in the report why this was done. Any groundwater samples that would be taken from these wells would entrain some of the clay sediment due to disturbance of the clay as a result of the collection process. So, the geochemistry of the groundwater is not representative of just the Upper Glacial Aquifer. Analytes which had adhered to the clay flakes were incorporated in each groundwater sample. Additionally, water samples which are taken from soil borings typically do not have as high concentrations of analytes as would samples from permanent wells. Also, from the boring logs in the report, it is not entirely clear that the perched aquifer and the glacial aquifer are truly separated at a distance. If the NYCT is pumping groundwater, then their actions could cause some groundwater to seep down from above. \_\_\_\_\_ Comments by Ketani: -----The soil results from SB-22 for the sample from 7.5 to 8 feet bgs in the former diesel and gasoline USTs area (the former Fitness Center) had naphthalene and n-butylbenzene hits above 10,000 ppb. The ethylbenzene hit was 2,300 ppb and the n-propylbenzene hit was 7,000 ppb. Though the soil results for the samples from SB-21 and SB-23 to SB-25 which surround SB-22 did not have exceedences or were non-detect. The groundwater results from temporary well GW-22 in the former diesel and gasoline USTs area had high VOC exceedences in the sample from 16.5 to 20 feet bgs. However, the groundwater results from temporary well TPSW about 65 feet to the east and permanent well BMW-10 about 35 feet to the east have a small number of very low hits and no exceedences. These soil and groundwater results suggest that one of the UST systems probably leaked. More borings and permanent wells need to be installed in this area. Additionally, the BP Service Station that is referred to in the report has an active spill number, #0104597. According to a report in the e-docs, groundwater flow in the perched water table is due northeast, away from the Pfizer site. 3/29/13 - Raphael Ketani. Next, I reviewed the Roux Supplement to Petroleum Investigation Report dated 7/22/11. Of significance was that staff from Roux stated in this Supplement report that the former DEC case manager should obtain all of the UST and piping information for the BP Service Station from the respective DEC file. They also stated that the Phase I and the Phase II were not done for Pfizer. So, Pfizer can't vouch for the reliability of the reports. Also, they stated, Acumen Capital Partners may consider the reports to be confidential and may not feel comfortable releasing them to the DEC. However, Roux did provide some information regarding the USTs under the Pfizer site and neighboring facilities in this Supplement report. The staff from Roux stated that tank closure reports weren't required to be submitted when the tanks were decommissioned during 1988. They state that soil samples were collected from TPNE, TPSW, TPSE, BMW-10 to BMW-13, but the samples were not submitted to the laboratory for analysis. The information

contained in the report consisted of documents related to the UST decommissioning which took place throughout the site and Sanborn maps. The 550 gal. diesel UST (#211) and the 550 gal. gasoline UST (#212) under the Fitness Center were pressure tested during 1984 and held the pressure (9/27/84 and 10/24/84 Tone Gasoline Tank and Pump Inc. letters). In a 12/28/88 tank decommissioning letter, it is stated that tanks #211 and #212 in the former Wha garage were cut up from 12/13/88 to 12/16/88. In the process of cutting them up, it was noticed that the gasoline UST had leaked into the vault. The gasoline was collected and the vault was ventilated in order to remove the vapors. It was noticed that the floor of the vault was pitted due to leaked gasoline. However, it was reported in the letter that the tank removal crew did not notice signs of chipping of the floor or any loose concrete.\_\_\_\_\_Comments by

Ketani:----- From the information in the 7/22/11 report, it is apparent that there was at least a gasoline spill. How the gasoline UST could have passed its integrity test in 1984 and be found to have leaked anyway is not clear. There are no details regarding how the testing was performed. So the test may not have been valid compared to later integrity testing methods. Additionally, the pitted floor suggests that the leaking had been going on for some time. Also, there still is no information regarding the locations of the associated piping for the USTs and the locations of the pump islands. Clearly, more investigation needs to be done. A draft letter was submitted to Hassan Hussein, EE III and head of Unit C, requesting that a work plan be submitted for conducting an investigation around and under the vault, next to any remaining piping and in the vicinity of the pump islands. Soil and groundwater sampling was requested. The letter was approved by Mr. Hussein and was sent out. A due date of April 30 was set for submission of the work plan.4/15/13 - Raphael Ketani. Mr. Kovacs (631) 232-2600 tried to call me today regarding the March 29, 2013 letter and left a voice message. I tried to contact him, but could only leave a voice message.4/16/13 - Raphael Ketani. Mr. Kovacs and I discussed the site and the soil and groundwater results for SB-22 and GW-22, respectively. I pointed out that the soil contamination results from the surrounding borings at the same level did not have exceedences. Also, the groundwater results for GW-22 were higher than a sidegradient well that was sampled at the same depth. I added that there was a letter in the Roux 7/22/11 report which stated that a gasoline leak had been discovered. Mr. Kovacs argued that all of the contamination was from the BP site across the street. I reiterated that the soil and groundwater results and the letter suggested a local source of contamination. I asked him for soil and groundwater contamination delineation. Mr. Kovacs stated that the tank vault was in the former loading dock area, which had been filled in with 4 feet of concrete. However, they had cored thick concrete before. So they could do borings in this area. Mr. Kovacs added that Pfizer was not objecting to doing more investigative work in this area, but that they wanted to make sure everyone was on the same page and that the DEC was considering the groundwater flow from the northeast from the BP site. I repeated my previous statement that the DEC had determined that there is a local source of contamination under the former Pfizer site and that delineation is being required. Mr. Kovacs stated that he will talk to the people at Pfizer. With that, the conversation ended. 4/17/13 - Raphael Ketani. Mr. Kovacs sent me an e-mail requesting an extension of the deadline for submitting the work plan.

He asked for a deadline of June 3, 2013. I granted his request.6/4/13 - Raphael Ketani. I reviewed the Work Plan for Additional Petroleum Investigation Activities dated 5/29/13 and submitted by Roux Associates on behalf of Pfizer, Inc. The work plan contained the same information and arguments as I had read in the previous 6/24/11 Petroleum Investigation Report and the Supplement to Petroleum Investigation Report dated 7/22/11. Roux Associates added that the timing of the use of the gasoline and diesel USTs below the former fitness center and the soil data generated by Property Solutions does not support that the impacts associated with spill #1011062 are related to the Pfizer operations. Pfizer removed the USTs in 1988 before the widespread use of high concentrations of MTBE beginning in 1992. There was no MTBE in the soil samples below the Pfizer site where the USTs used to be. High concentrations of MTBE were found in the groundwater beneath the former fitness center. Property Solutions collected 7 soil samples from 5 borings in the vicinity of the USTs and found only slight soil contamination in one sample. In the work plan, Roux proposes conducting three tasks. Task 1 would be to do one round of groundwater gauging and sampling at wells BMW-10 to 13. Roux would request that the DEC gain access for them to the wells on the BP site. They will have the samples tested only via method 8260. Task 2 would involve submitting a report of their findings. Roux will make recommendations for either additional investigations, or to close the spill case, or to link the spill case to the BP site. Task 3 involved having a meeting with the DEC to discuss their findings and additional data. I drafted a response letter for the review of Mr. Hussein. In the letter, I explained that the information and statements that were in the 5/29/13 work plan were the same as were included in the 6/24/11 Petroleum Investigation Report and the Supplement to Petroleum Investigation Report dated 7/22/11. So, the Department was again requesting that a soil and groundwater investigation take place as previously requested in our 3/29/13 letter. I added that we will send a letter to Acumen requesting their cooperation for allowing the wells to be installed. However, it would be up to Pfizer to obtain permission from BP for gaining access to their wells. I set a deadline of 7/12/13 for submission of a new work plan.6/5/13 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out.6/6/13 - Raphael Ketani. In response to the 6/5/13 letter, Matthew Basso of Pfizer called me. He tried to explain to me that Pfizer wasn't responsible for the contamination under the vault. He used the same information as had been presented in the 6/24/11 report and the 7/22/11 report. I explained to him that his discussion wasn't going to change the Department's request for a soil and groundwater investigation. I added the lower groundwater hits of the deep well to the northeast, the finding of free product in the vault, the discovery of soil contamination in the unsaturated zone below the vault and the presence of high contamination in the groundwater just under the vault. Mr. Basso explained that he had witnessed the consultants for the BP station across the street doing remedial work. He said that they were injecting treatment solutions. Mr. Basso added that the gas station has lost a lot of product and it is going under the former Pfizer site. I told Mr. Basso that the Department was aware of the problems at the BP station and that they were being addressed. I did admit to him that some of the contamination may be going under part of the former Pfizer site, but that the contamination in the former vault area was a different matter that was solely the responsibility of Pfizer. Mr. Basso stated that the

**PFIZER INC BROOKLYN PLANT (Continued)**

**U003074670**

groundwater was flowing from the BP site to the former Pfizer building. I told him that this was not true for the perched water table. He also stated that he didn't believe the new owners of the property, Acumen, would allow Pfizer to drill through the floor of the former fitness center. I told him that I will write a letter requesting Acumen's cooperation regarding the investigation. At the end of the conversation, Mr. Basso requested a meeting with the DEC. I told him to talk to everyone at his end and get them to agree on a date for next week. He said that he will do this. Later, Mr. Kovacs (631) 232-2600 sent me an e-mail stating that Pfizer, Acumen and Roux would be able to meet with staff from the DEC on Monday, June 10th, at 2:00PM. I confirmed that this was an acceptable meeting time. A draft letter was submitted to Mr. Hussein which requested the cooperation of Acumen in allowing Roux Associates to conduct an investigation in the vicinity of the vault. Mr. Hussein approved the letter and it was sent out. 6/10/13 - Raphael Ketani. The meeting took place as scheduled. In attendance were Matthew Basso from Pfizer, Robert Kovacs and Charlie McGuckin from Roux Associates, and Hassan Hussein and myself. The former Pfizer site and the BP gas station to the north were discussed. Mr. Kovacs and Mr. McGuckin presented the same information as I had read from previous reports. They showed one new map which showed that, at one time, the Wallabout Creek had flowed near the vicinity of the former vault and in adjacent areas. So the area contained stream sediments. Mr. Kovacs and Mr. McGuckin stated that the gas contamination in the former vault area was from the BP site due to deep groundwater flow towards the southwest in the regional aquifer. They commented that the NYCT was pumping from a well to the southwest for the G train line. So, this well had moved groundwater flow to the southwest. I stated that groundwater flow was to the northeast in the perched water table and to the southwest in the regional aquifer. I stated that the gas contamination in the vicinity of the vault was from a former gas UST that had been observed to have leaked. I also stated that there was gas contamination in the shallow unsaturated soil in the vicinity of the vault. So the contamination in the immediate vicinity had come from the UST, not the BP site. They countered that the gasoline below the vault contained MTBE and this chemical was not in the Pfizer gas UST when it was removed in 1988. They also stated that the groundwater analytes had the signature of BP gas. I told the Roux consultants that the wells were never screened properly. Some were screened in the clay. So it is not clear what the true groundwater chemical makeup is. I requested a work plan for conducting 4 soil borings around the former vault location, installing a properly screened well in the shallow zone and another in the deeper regional aquifer, and to take a Shelby tube sample and do permeability testing for the confining layer between the two bodies of groundwater. Mr. McGuckin objected to the request for more investigating. He said that Pfizer had done enough to determine subsurface conditions and that there was no point in doing more work. He again stated that all of the contamination was due to the spilling at the BP station. He added that there was a well 75 feet to the east of the Pfizer vault with 3 feet of product in it. Mr. Basso stated that this gasoline could be fingerprinted to prove that it belonged to BP. I added that more soil and groundwater data must be obtained in order to determine the subsurface conditions and in order to determine where the contamination had originated from. Otherwise, BP will not accept responsibility with so little information. Mr. Basso said that he

**PFIZER INC BROOKLYN PLANT (Continued)**

**U003074670**

will approach his management with the DEC demand and our argument why more work needed to be done. Following this meeting, Mr. Hussein and I had a meeting with June Feng, the DEC project manager for the BP station at 655 Flushing Avenue, Brooklyn (spill case #0104597). Specifically, we asked her whether the BP investigation had done off site delineation of the spill and whether there presently were leaking USTs and product on the groundwater. Ms. Feng said that, presently, there were no leaking USTs and no product on the groundwater. She said that wells were only installed on the BP property. I told her about the 3 feet of product that had been found in the Roux Associates well BMW-11, which was about 100 feet east of the vault in question and downgradient from the BP station (as regards the deeper aquifer flow). Ms. Feng asked whether the gasoline had ever been fingerprinted. I told her "No." She said that she could not understand how gasoline could make its way down from the perched water table to the regional aquifer. I told her I was not sure either how this had happened, but the Roux Associates consultants were stating that this happened. She then asked whether the gasoline could have followed a utility conduit. I told her that this was possible, but I wasn't sure it would stay in the aquifer as gasoline floats on water. Ms. Feng and I thought about how the gasoline could have ended up below a perched water table, but we did not find an answer. 6/11/13 - Raphael Ketani. Ms. Feng sent me a "c-c" for an e-mail she had sent to Nicholas Onufrak of BP. She warned him that Pfizer and their consultants were telling the DEC that the gasoline contamination was from the 655 Flushing Avenue site. Later, Mr. Onufrak responded back that he had received the e-mail. 6/12/13 - Raphael Ketani. Mr. Basso sent me an e-mail in which he stated that Pfizer was working on a work plan and intended to submit it by July 12, 2013. 7/22/13 - Raphael Ketani. I reviewed the 7/18/13 Workplan for Additional Focused Subsurface Investigation. The work plan was written in response to the DEC 3/29/13 letter in which additional investigative work was requested around the vault. ROUX also made the same arguments that the source of the contamination under the former Pfizer plant is from the BP service station across the street. They also recapped the results of the previous investigations from 2011. They state that NAPL was found on 6/8/11 at BMW-11 and was identified as leaded gasoline. Also, they state in the report that, given the geologic and hydrogeologic conditions in the subsurface and the presence of NAPL in the deep groundwater zone downgradient of the BP station and the presence of MTBE in the groundwater, it is strongly suggested that the impacts at SB-22/GW-22 are not the result of former Pfizer operations, but the result of the long history of releases from the BP station. ROUX will do a focused field investigation involving a Phase I and, if necessary, a Phase II. After the work is done, a summary report will be prepared and a meeting with DEC staff will be requested to discuss the results and determine what should happen next. The Phase II will be performed only if contaminated soil is found below the former UST locations. Five shallow soil borings will be performed around the vault and dispenser area to the top of the silty clay. Soil and groundwater samples will be analyzed via methods 8260 and 8270. The perched water table samples will be collected from 3 temporary wells. Only temporary wells can be installed due to the height restrictions inside of the Fitness Center (it will only accommodate small equipment). Undisturbed soil samples will be collected from the silty clay and the sandy layer below it for permeability testing. If there

**U003074670**

are no discernable soil impacts in the shallow soil, then they will bore down below the silty clay layer and sample the soil just above the deep groundwater. The existing deep wells BMW-10 to BMW-13 will be gauged and sampled. If the Phase II is necessary, then two additional wells will be installed at two more locations within the Fitness Center footprint and the groundwater will be sampled beneath the silty clay. The Phase II would also involve the collection of additional perched water samples. I looked at the proposed soil boring and well locations depicted in Figure 7 of the report. The locations seemed reasonable. I drafted a letter for the review of Mr. Hussein in which I stated that the Department had approved the 7/18/13 work plan. 7/24/13 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out today.

Remarks: SOIL SAMPLES POSITIVE FOR PETRO. CONTAMINATION, CLEANUP PENDING.

Site Description: The Citric Block Site is located in the Williamsburg section of Brooklyn, New York. Gerry Street, Harrison Avenue, and Union Avenue border the Citric Block Site to the north, east, and west, respectively, while Flushing Avenue border the Citric Block Site to the south. The Citric Block Site is situated within a high-density, mixed urban residential commercial industrial zone, approximately one mile east-southeast of the East River. Pfizer decommissioned the Citric Block Site for future redevelopment and/or beneficial use. As part of the decommissioning process, all Citric Block Site buildings

were demolished, with demolition activities being completed in August 1995. Presently, the reinforced-concrete slab foundation is the only aboveground remnant of the former buildings. The concrete slab is continuous throughout most of the Citric Block Site, and varies in thickness between approximately 0.5 and 1.5 feet. The remaining portion of the Citric Block Site is covered with asphalt pavement approximately two inches thick with a four-inch aggregate subgrade. The entire Citric Block Site is surrounded by a 10-ft high chain-link fence, and is under continuous security surveillance. The Citric Block Site was developed for chemical manufacturing between 1854 and 1888 and it operated continuously until 1985, and was demolished in 1995. Redevelopment is likely to include paved areas for outdoor activities in the center of the Citric Block Site and a small park in the western portion. The remainder of the Citric Block Site would be capped by either the existing concrete slab or by new pavement. The cap will prevent any direct exposure of future users of the property with fill material. Institutional controls involving Deed restrictions have been implemented. The property can be used for industrial/ commercial usage. Site Management Plan requires proper management of all future subgrade construction activities and proper notification to the Department.

Env Problem: The site has been cleaned up. Post remedial groundwater monitoring was satisfactory.

Site Description: The "Organics/Suciac Block" site is located in the central portion of the Pfizer Inc. facility in the Williamsburg section of Brooklyn, NY. Gerry Street, Harrison Avenue, Union Avenue and Wallabout Street border this block. The site was first developed for chemical manufacturing between 1854-1888. Operations continued there

until 1989 and all buildings were demolished by March of 1995. The Organic/SuciAc block is situated within a high-density, mixed urban/commercial/ industrial zone. Pfizer decommissioned the Organic/SuciAc block with the intent to utilize it for future redevelopment and/or beneficial use. As part of the decommissioning process, all buildings were demolished. The present concrete slab is continuous throughout the Block and varies in thickness from 0.5 and 1.5 feet. In 1997, waste from the site was excavated and disposed off site, which included 18.12 tons of mercury and lead hazardous soils. Also, a total of 1,930 tons of benzene hazardous soils were excavated and disposed off-site. In 1999/2000, the excavated soil (approximately 420.3 tons) was classified as a petroleum contaminated non-hazardous material, and was transported off-site and disposed. Institutional Controls: On June 22, 2001, Pfizer presented the deed restrictions for recording in the Kings County Registrars Office. These restrictions state that unless additional response actions are performed at the Site to allow its use for residential purposes, the Site shall be prohibited from being used for purposes other than industrial, commercial and/or recreational purposes without the expressed written permission from the Department.

Env Problem:

In 1997, waste from the site was excavated and disposed off site, which included 18.12 tons of mercury and lead hazardous soils.  Site Description:

Location: Pfizer Sites B and D (collectively Site No. V00350) are located at the addresses 59-71 and 73-87 Gerry St. (Pfizer Site B), and 191 Harrison Ave and 60-66 Gerry St. (Pfizer Site D) in Brooklyn New York. Pfizer Site B is comprised of Block 2266, Lot 46 and part of Lot 1, and Pfizer Site D is comprised of Block 2269 Lot 1. It should be noted that references to Site B and Site D below are names designated by the Volunteer (Pfizer Inc.) for their properties and do not refer to Department designated Sites or operable units. Site Features: The VCP site comprised of Pfizer Site B and Site D is 1.47 acres in size. Pfizer Site B, located on the north side of Gerry

MAP FINDINGS

**PFIZER SITES B AND D (Continued)**

**S106906497**

Street, is bordered by Harrison Avenue to the west; multi-family residences, a former auto body garage and vacant land to the north; vacant land to the east; and Gerry Street and Pfizer Site D to the south. Pfizer Site B is currently vacant. Pfizer Site D, located on the south side of Gerry Street, is bordered by Harrison Avenue to the west; vacant lots to the east; Gerry Street and Pfizer Site B to the north; and a vacant, condemned apartment building and Bartlett Street to the South. Pfizer Site D consists of five interconnected buildings. These buildings surround three sides of a condemned apartment building (not Pfizer owned) that abuts Site D to the south and fronts on Bartlett Street. Current Zoning/uses: The Site is located in a commercial district overlay within a residential zoning district. Historical Use: Pfizer leased the western portion of Site B from the previous owner from 1954 to 2004; it has been vacant since the 1950s and occasionally used as a parking lot. The western portion of Pfizer Site B was sold by then-owner Ruth Apfrelbaum to Congregation YGS in 2004. The eastern portion of the property was purchased by Pfizer in 1964 and used as a warehouse for the storage of raw materials/dry goods, spare equipment parts, and packaging materials. Prior to Pfizer's ownership, it was used as a garage and truck rental facility. Site D was formerly leased from Pfizer by Arlington Press, a company that specializes in labels and package inserts for the pharmaceutical industry. Soil removal activities were performed on the eastern portion of Pfizer Site B in 2002, and included the excavation of 9 Underground Storage Tanks (USTs), 2 tank-like structures, and removal of 4,735 tons of impacted soil and 18,449 gallons of groundwater (including perched groundwater). Sampling performed since the removal activities indicate that VOCs are no longer present in soil; and that petroleum-related VOCs in groundwater have been substantially reduced. Operable Units: An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Because of the separate ownership and separate remediation and development schedules, the Site has been divided into two Operable Units. The eastern portion of Site B as well as Site D, owned by Pfizer, is Operable Unit 1 (OU-1). The western portion of Site B, owned by Congregation YGS, is Operable Unit 2 (OU-2). Site Geology and Hydrogeology: The Site is underlain by a layer of fill material approximately 8 to 10 feet thick. Beneath the fill layer is a green clay/silt stratum of approximately 2 to 3 feet thick, followed by a brown fine to medium sand stratum with small amounts of clay and silt of approximately 15 feet. Beneath the sand is a silt/clay layer which has been identified as a confining layer. Groundwater is approximately 6 to 10 feet below surface grade. On Site B, groundwater flow direction is generally northeast in the eastern portion of the Site and west/northwest in the western portion of the site. It has not yet been confirmed if groundwater flow direction is similar for Site D.

Env Problem:

Nature and Extent of Contamination: OU-1 Eastern portion of Site B and Site D (Pfizer-owned properties): Soil: On the OU-1 portion of Site B, investigations have identified volatile organic compounds (VOCs) in soil; both petroleum-related BTEX compounds (benzene, toluene, ethylbenzene and xylenes) and chlorinated solvents (cVOCs). The source area was determined to be the eastern portion of Site B to a depth of approximately 8 to 10 feet below grade. Soil removal

MAP FINDINGS

**PFIZER SITES B AND D (Continued)**

**S106906497**

activities were performed in 2002, and included the excavation of 9 Underground Storage Tanks (USTs), 2 tank-like structures, and removal of 4,735 tons of impacted soil and 18,449 gallons of groundwater (including perched groundwater). Following the removal activities, sampling indicated that VOCs in soil no longer exceed NYSDEC Soil Cleanup Objectives (SCOs). Semi-volatile organic compounds (SVOCs) and metals have also been identified on Site B. Metals include lead as high as 2,020 parts per million (ppm), mercury as high as 61.4 ppm, arsenic as high as 307 ppm, barium as high as 1,250 ppm, and chromium as high as 75.7 ppm. SVOCs include benzo(a)anthracene as high as 75 ppm, chrysene as high as 87 ppm, benzo(a)pyrene as high as 59 ppm, indeno(1,2,3-cd)pyrene as high as 43 ppm, and dibenz(a,h)anthracene as high as 25 ppm. A Remedial Investigation is underway at Site D. Preliminary sampling has identified chlorinated VOCs in soil at elevated levels in one boring on the eastern part of the site. Tetrachloroethene was detected at 2.2 ppm, trichloroethene at 2.7 ppm, cis-1,2-dichloroethene at 120 ppm, and vinyl chloride at 1.2 ppm. Groundwater: On the OU-1 portion of Site B, investigations have identified two distinct contaminant plumes: a BTEX plume and a cVOC plume. Chlorinated VOCs (cVOCs) were found to persist throughout the majority of the Site, whereas BTEX compounds were limited to the eastern portion of the Site to a depth of approximately 10 to 30 ft bls. The cVOC plume is present across the entire Site to an approximate depth of 10 to 30 ft bls. In 2006, an air sparge/soil vapor extraction (AS/SVE) system was installed to address groundwater contamination remaining at the site following the source removal work. The system was operated from October, 2006 to February, 2011. Quarterly groundwater monitoring performed during that time period indicated that the system was effective (approximately 158.67 pounds of VOCs were removed throughout the operation of the system); however, removal of VOCs became asymptotic and operation of the system was therefore discontinued in February 2011. The system remains intact, however. The AS/SVE system has been effective in reducing BTEX compounds in groundwater to below groundwater standards. Currently, some petroleum-related contaminants are still present; however, the primary contaminants of concern remaining following operation of the AS/SVE system are cVOCs. In February 2011 groundwater sampling on Site B, cVOCs detected in groundwater included: tetrachloroethene as high as 22 ppb, trichloroethene as high as 18 ppb, cis-1,2-dichloroethene as high as 350 ppb, and vinyl chloride as high as 29 ppb. A Remedial Action Work Plan is being prepared to address remaining contamination. On Site D, preliminary sampling performed to date has identified chlorinated VOCs in groundwater on the eastern part of the Site. Tetrachloroethene was detected as high as 4,500 ppb, trichloroethene as high as 1,300 ppb, cis-1,2-dichloroethene as high as 110,000 ppb, and vinyl chloride as high as 15,000 ppb. These contaminants have been identified at levels exceeding standards, criteria and guidance as deep as 30-35 feet below surface grade. Soil vapor: Soil vapor has been monitored quarterly on OU-1 from two sampling points since August, 2010. Chlorinated solvents have been detected in soil vapor at a maximum concentration of 120 ug/m<sup>3</sup> (tetrachloroethene). OU-2: The western portion of Site B (Congregation YGS-owned) is currently under remediation. Following description is for conditions prior to remediation. Soil: Soil on OU-2 contains metals and SVOCs indicative of urban fill, which exists throughout this OU, to depths of approximately 10 feet below grade. Metals that exceed SCOs include

**S106906497**

lead as high as 6,730 parts per million (ppm), mercury as high as 16.1 ppm, arsenic as high as 20.5 ppm, chromium as high as 33.6 ppm, and barium as high as 2,000 ppm. SVOCs include benzo(a)anthracene as high as 250 ppm, chrysene as high as 270 ppm, benzo(a)pyrene as high as 220 ppm, indeno(1,2,3-cd)pyrene as high as 110 ppm, and dibenz(a,h)anthracene as high as 58 ppm. Groundwater: Chlorinated solvents have been detected in on-site groundwater and are suspected to be coming from the Pfizer property (OU-1) to the east and south. Prior to the operation of the air sparge/soil vapor extraction (AS/SVE) system on OU-1, cis-1,2-dichloroethene was detected as high as 390 parts per billion (ppb) and vinyl chloride as high as 45 ppb. Groundwater sampling performed in 2008 (during the time period of AS/SVE system operation) indicated that these contaminants have decreased in concentration but are still present: cis-1,2-dichloroethene was detected at 97 ppb and vinyl chloride at 21 ppb. Groundwater sampling in 2008 also detected benzene at 1.6 ppb. Soil vapor: Chlorinated solvents and BTEX compounds have been detected in soil vapor. In May 2009 (the most recent soil vapor data available), tetrachloroethene was detected in each of 2 soil vapor sampling points, as high as 180 ug/m3. Individual BTEX compounds were detected below 50 ug/m3.

**Health Problem:**

Since the site is fenced and covered with weathered asphalt and gravel people will not come into contact with site-related soil and groundwater contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for people to inhale site contaminants in indoor air due to soil vapor intrusion in any future on-site building development and occupancy.

**BROWNFIELDS:**

Program: BCP  
Site Code: 333571

Site Description: Site B is located in the eastern portion of the Pfizer facility and is bordered on the north by a poultry market and vacant land, a three-story apartment building, and an auto body garage and yard; on the south by Gerry St.; on the east by a portion of the auto body garage and yard, and a storage lot; and on the west by Harrison Ave.. Building demolishing in 1996 has left a reinforced concrete slab across half of the eastern portion of site B. The western portion of site B is covered with gravel and is being used as a parking lot. The site is being investigated and remediated under VP Agreement ? see site no. V00350.

**Env Problem:**

Based upon preliminary investigations, Pfizer completed on-site and off-site delineation of petroleum related impacts in the fill material and conducted an Interim Remedial Measure (IRM) in December 2002. IRM included removal the removal of 4,735 tons of petroleum related impacted soils and more than 18,000 gallons of groundwater (including perched groundwater). In addition, nine UST?s and other subsurface structures were removed and properly disposed off-Site. Investigations indicate a plume of groundwater contamination that extends north to the property border. Soil gas investigation is

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: 12/5/05-Vought-Off hours duty responder. Vought called and spoke to owner's wife who refused access initially as per Petro Wheeler. Vought then spoke to owner (Ariss) who agreed to access. Vought called Petro and told them to contact Ariss who agreed to access and return call if problem. Vought received call from Petro that they were onsite for 1.5 hours and left due to no show of Ariss. Spill extent was still unknown. Vought called Ariss who said just arrived on site, Vought called Petro again to arrange site visit. Later Vought received phone call that spill was limited to top of tank through manway and also through vent on sidewalk. Both spills cleaned by Petro using adsorbent. Spill on concrete and no sewers or drains

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 01/21/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 01/09/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 01/09/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810
Date Made Active in Reports: 08/09/2013	Last EDR Contact: 11/11/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 03/10/2014
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2013	Telephone: 703-603-8704
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 01/10/2014
Number of Days to Update: 151	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810
Date Made Active in Reports: 08/09/2013	Last EDR Contact: 11/11/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 03/10/2014
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 09/10/2013  
Date Data Arrived at EDR: 10/02/2013

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/10/2013  
Date Data Arrived at EDR: 10/02/2013  
Date Made Active in Reports: 12/16/2013  
Number of Days to Update: 75

Next Scheduled EDR Contact: 04/14/2014  
Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013  
Date Data Arrived at EDR: 10/02/2013  
Date Made Active in Reports: 12/16/2013  
Number of Days to Update: 75

Source: Environmental Protection Agency  
Telephone: (212) 637-3660  
Last EDR Contact: 01/02/2014  
Next Scheduled EDR Contact: 04/14/2014  
Data Release Frequency: Quarterly

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/10/2013  
Date Data Arrived at EDR: 10/02/2013  
Date Made Active in Reports: 12/16/2013  
Number of Days to Update: 75

Source: Environmental Protection Agency  
Telephone: (212) 637-3660  
Last EDR Contact: 01/02/2014  
Next Scheduled EDR Contact: 04/14/2014  
Data Release Frequency: Quarterly

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013  
Date Data Arrived at EDR: 10/02/2013  
Date Made Active in Reports: 12/16/2013  
Number of Days to Update: 75

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal institutional controls / engineering controls registries***

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 12/09/2013
Number of Days to Update: 14	Next Scheduled EDR Contact: 03/24/2014
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 12/09/2013
Number of Days to Update: 14	Next Scheduled EDR Contact: 03/24/2014
	Data Release Frequency: Varies

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/20/2013	Source: Department of the Navy
Date Data Arrived at EDR: 08/23/2013	Telephone: 843-820-7326
Date Made Active in Reports: 11/01/2013	Last EDR Contact: 11/18/2013
Number of Days to Update: 70	Next Scheduled EDR Contact: 03/03/2014
	Data Release Frequency: Varies

## ***Federal ERNS list***

### ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/30/2013	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 10/01/2013	Telephone: 202-267-2180
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 01/10/2014
Number of Days to Update: 66	Next Scheduled EDR Contact: 04/14/2014
	Data Release Frequency: Annually

## ***State- and tribal - equivalent CERCLIS***

### SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 11/13/2013	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/13/2013	Telephone: 518-402-9622
Date Made Active in Reports: 11/18/2013	Last EDR Contact: 11/13/2013
Number of Days to Update: 5	Next Scheduled EDR Contact: 03/03/2014
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Date of Government Version: 01/01/2013	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 02/20/2013	Telephone: 518-402-9814
Date Made Active in Reports: 03/15/2013	Last EDR Contact: 11/22/2013
Number of Days to Update: 23	Next Scheduled EDR Contact: 03/03/2014
	Data Release Frequency: Varies

## **State and tribal landfill and/or solid waste disposal site lists**

### SWF/LF: Facility Register

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 10/08/2013	Source: Department of Environmental Conservation

## **State and tribal leaking storage tank lists**

### LTANKS: Spills Information Database

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

Date of Government Version: 09/25/2013	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 09/26/2013	Telephone: 518-402-9549
Date Made Active in Reports: 11/15/2013	Last EDR Contact: 11/22/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: 03/03/2014
	Data Release Frequency: Varies

### HIST LTANKS: Listing of Leaking Storage Tanks

A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database. Department of Environmental Conservation.

## ***State and tribal voluntary cleanup sites***

### VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

Date of Government Version: 11/13/2013	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/13/2013	Telephone: 518-402-9711

## **State and tribal Brownfields sites**

### ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

Date of Government Version: 11/13/2013	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/13/2013	Telephone: 518-402-9622

Number of Days to Update: 5	Next Scheduled EDR Contact: 03/03/2014
	Data Release Frequency: Semi-Annually

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## **Local Lists of Hazardous waste / Contaminated Sites**

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/06/2013

Number of Days to Update: 50	Next Scheduled EDR Contact: 03/03/2014
	Data Release Frequency: Varies

## HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

	Data Release Frequency: No Update Planned

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Next Scheduled EDR Contact: 03/10/2014  
Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 09/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/09/2013	Telephone: 202-343-9775
Date Made Active in Reports: 11/01/2013	Last EDR Contact: 01/10/2014
Number of Days to Update: 23	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 03/08/2013	Source: EPA
Date Data Arrived at EDR: 03/21/2013	Telephone: (212) 637-3000
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 12/10/2013
Number of Days to Update: 111	Next Scheduled EDR Contact: 03/24/2014
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 05/08/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/25/2012	Telephone: 202-564-8600

## HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

## SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

## E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 06/30/2013

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

## Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Longitude (West):	73.9438 - 73° 56' 37.68"
Universal Transverse Mercator:	Zone 18
UTM X (Meters):	589238.4
UTM Y (Meters):	4505303.0
Elevation:	45 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	40073-F8 BROOKLYN, NY
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

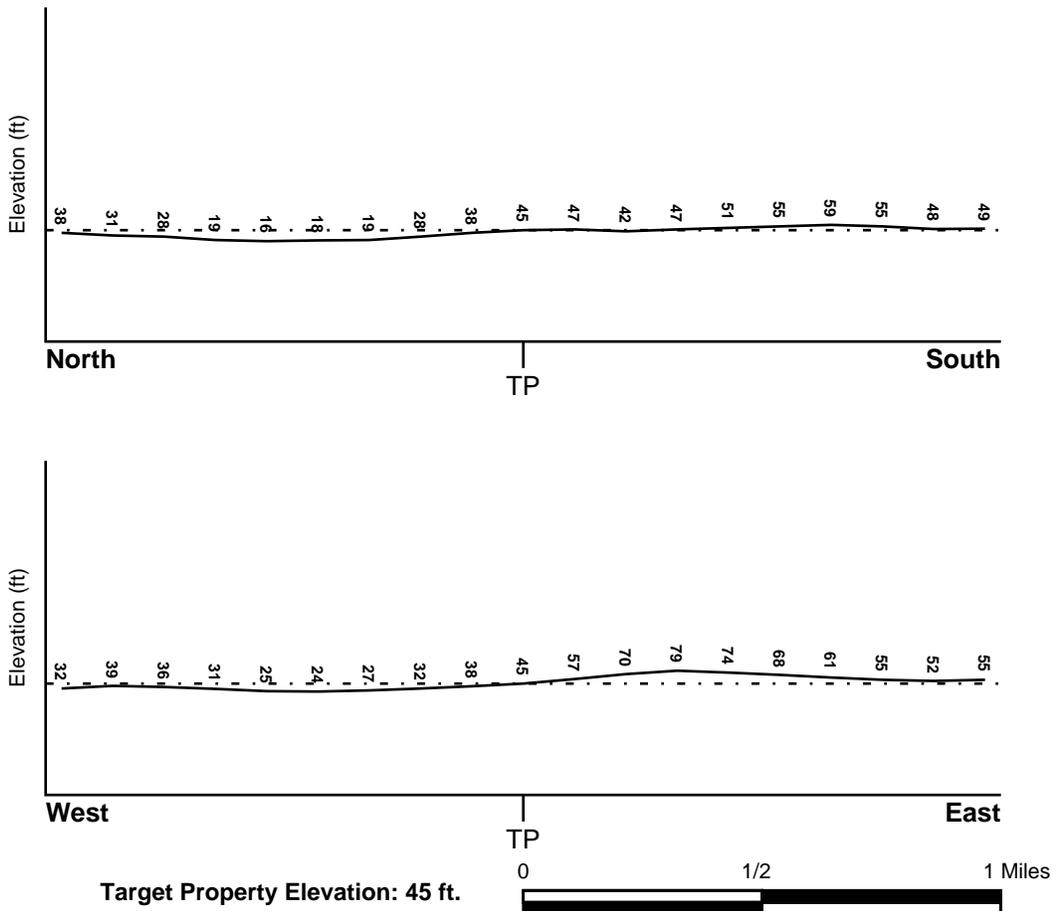

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Target Property County</u> KINGS, NY	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	360497 - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> BROOKLYN	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### *Site-Specific Hydrogeological Data\*:*

Search Radius:	1.25 miles
Status:	Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### **ROCK STRATIGRAPHIC UNIT**

Era: Mesozoic  
System: Cretaceous  
Series: Upper Cretaceous  
Code: uK *(decoded above as Era, System & Series)*

### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## **DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY**

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

## OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Surficial Soil Types: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock  
very gravelly - loamy sand  
stratified  
sandy loam

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### New York Public Water Wells

Source: New York Department of Health

Telephone: 518-458-6731

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Database

Department of Environmental Conservation

Telephone: 518-402-8072

These files contain records, in the database, of wells that have been drilled.

### RADON

#### State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

**APPENDIX E**  
**LABORATORY REPORTS IN DIGITAL**  
**FORMAT**

Monday, March 23, 2015

Attn: Mr. Charles B. Sosik, P.G.  
Environmental Business Consultants  
1808 Middle Country Rd  
Ridge NY 11961-2406

Project ID: 948 MYRTLE AVE BKLYN NY  
Sample ID#s: BH80386 - BH80393, BH80395 - BH80397, BH81173 - BH81175

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

B\* = Present in blank, a bias is possible.

B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected

BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

**Semi-Volatile Comment:**

Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, a dilution was required resulting in an elevated RL for the semivolatile analysis.

**Pesticide Comment:**

Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

B\* = Present in blank, a bias is possible.

B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected

BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

**Pesticide Comment:**

Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected

BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

B\* = Present in blank, a bias is possible.

B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected

BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

B\* = Present in blank, a bias is possible.

B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected

BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected

BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

**Volatile Comment:**

Poor IS recoveries were observed for low level volatiles due to dirt in the threads of the vial preventing the sample from purging. Both low level vials had this problem, results are reported from the methanol high level.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

**Comments:**

Results are reported on an ``as received`` basis, and are not corrected for dry weight.  
 TRIP BLANK INCLUDED.

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

B\* = Present in blank, a bias is possible.

B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected

BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

**Pesticide Comment:**

Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

**Comments:**

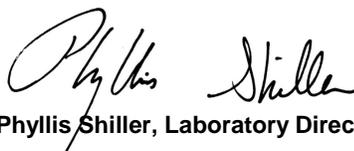

Results are reported on an "as received" basis, and are not corrected for dry weight.  
Trip blank included

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

## SDG Comments

April 03, 2015

SDG I.D.: GBH89867

---

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

Pesticide required dilution due to the presence of target and non-target material.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

**Comments:**

Results are reported on an ``as received`` basis, and are not corrected for dry weight.  
TRIP BLANK INCLUDED

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.  
This report must not be reproduced except in full as defined by the attached chain of custody.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

## SDG Comments

March 26, 2015

SDG I.D.: GBH85552

---

### 8260 Volatile Organics:

1,2-Dibromoethane, 1,2,3 Trichloropropane, and 1,2-Dibromo-3-chloropropane do not meet NY TOGS GA criteria, these compounds are analyzed by GC/FID method 504 or 8011 to achieve this criteria.

### SIM Analysis:

The lowest possible reporting limit under SIM conditions is 0.02 ug/L. The NY TOGS GA criteria for some PAHs is 0.002 ug/L. This level can not be achieved.

Toxaphene is reported to the lowest possible reporting level. The NY TOGS criteria for this compound can not be achieved.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
 3 = This parameter exceeds laboratory specified limits.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
 BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

**Pesticide Comment:**

Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
 3 = This parameter exceeds laboratory specified limits.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
 BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

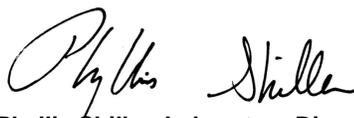

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

**Pesticide Comment:**

Due to a matrix interference in the sample, an elevated RL was reported for dieldrin.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
 3 = This parameter exceeds laboratory specified limits.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
 BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

**Pesticide Comment:**

Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
 3 = This parameter exceeds laboratory specified limits.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
 BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

# Sample Criteria Exceedences Report

## GBH85561 - EBC

Criteria: None

State: NY

SampNo	Acode	Phoenix Analyte	Criteria	Result	RL	Criteria	RL Criteria	Analysis Units
--------	-------	-----------------	----------	--------	----	----------	----------------	-------------------

---

\*\*\* No Data to Display \*\*\*

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

Project ID: 948 MYRTLE AVE., BROOKLYN  
Sample ID#s: BH81166 - BH81172

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

# Sample Criteria Exceedences Report

## GBH81166 - EBC

Criteria: None

State: NY

SampNo	Acode	Phoenix Analyte	Criteria	Result	RL	Criteria	RL Criteria	Analysis Units
--------	-------	-----------------	----------	--------	----	----------	----------------	-------------------

---

\*\*\* No Data to Display \*\*\*

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

Project ID: 948 MYRTLE AVE., BROOKLYN  
Sample ID#s: BH78830 - BH78834

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

## SDG Comments

March 09, 2015

SDG I.D.: GBH78830

---

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

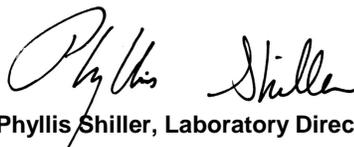

**Semi-Volatile Comment:**

Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, a dilution was required resulting in an elevated RL for the semivolatile analysis.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

**Pesticide Comment:**

Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.
