+1 212 676 1101 fax

**ATTENTION: ALL CURRENT
AND FORMER DDS CUSTOMERS**

You are receiving this notice because you previously signed a contract with Digital Dispatch Systems Inc., now known as DDS Wireless International, Inc. (DDS)

As you know, the TLC set a deadline of December 31, 2010, to sign up with one of the two other TPEP providers: Creative Mobile Technologies (CMT) or VeriFone, Inc. (VTS).

The CMT or VTS system must be installed and functioning in your vehicle before your vehicle's first regularly scheduled Taxicab inspection on or after February 1, 2011.

This means that, depending on which TPEP vendor you have contracted, in order to pass inspection at your first inspection after February 1, 2011, you will be required to have a fully functioning CMT or VTS TPEP system in your vehicle.

Those vehicles that are due for inspection in May 2011 will be required to have their vehicles inspected for purposes of this TPEP system installation in April 2011, and must arrange for a TPEP inspection with the TLC Safety and Emissions facility no later than April 30, 2011.

**CMT: (718) 937-4444
VTS: (718) 752-1656 x255**
